International Programs

Study Plan

It is important to have a clear, well thought-out, realistic academic plan. You will have time when you attend Seattle Colleges to thoroughly research your transfer plans. For your visa interview, you can make more general preparations with this planning sheet.

Long-Term Academic Goal: _____

(For example: 4-year B.A. Degree in Business Administration)

Major: _____

(For example: Accounting, Civil Engineering, Political Science, etc. If you have more than one idea for a major, put both. If you are undecided, still try to think of the subjects you are most interested in and put one down)

2+2 Transfer Plan

2 years at Seattle Colleges (plus additional time for ESL study, if necessary)

Research facts and information about your academic program at Seattle Colleges and write them below:

-
-
-
-
-

+

2 years at university or four-year college (transfer in year 3 for major courses)

List at least three universities you are considering and write in information below (if you have conditional admission to one of our university partners, then it should be one of the universities below). It is important to do some research – make sure that your intended major is actually offered at the school you choose.

<u>OPTION 1</u>

University Name:
Program of Study:
Location:
Estimated cost per year:
Admission Requirements:
Why did you choose this school?:

Career Plan

You must consider what kind of job you will have when you return to your home country. Be sure to link your intended degree to your career plan. Do your research! Look in newspapers, in industry publications, or talk to people who already have a job in your field to find out more about possible jobs.

Your career plan should include the following:

OPTION 1
Job title:
Job description:
Potential Employers (Companies):
1.
2.

OPTION 2
Job title:
Job description:
Potential Employers (Companies):
1.
2.

At the interview, be prepared to talk about the demand for your profession in your home country. If your 2+2 Transfer program will prepare you for a field that is not a high-demand field in your home country, you must consider carefully what kind of job you will have when you return home.
