Fish Tank Cleaning Checklist

Daily

____ Remove Excess Food

____ Monitor water level and top off if necessary

____ Check Water Temperature

____ Take note of fish behavior and appetite

Weekly

____ 10% water change using gravel siphon (OR 25% every other week)
**Please note this is a general guideline and will vary between different tanks and filtration systems.

____ Perform water quality testing (ammonia, nitrite, nitrate, and pH) in new systems

____ Scrub algae on tank walls if needed

____ Rinse biological filter gently with tank water

Monthly

____ Perform water quality testing in established systems

____ Remove and scrub/clean décor

Yearly

____ Buy new water quality test kit
