

Moving Checklist

We've compiled a useful series of checklists for you, to help take the stress out of your move and to help you remember all 101 things you need to do to keep the move simple and stress-free.

1 Month Before the Move			
Ring around for quotes from removal firms, and appoint one. Make sure they're properly insured and establish exactly what they're prepared to do. Get them to come around and confirm the quote before accepting it. If you need some recommendations, we're happy to help!			
If you will be moving things yourself, ring around and book a van and some friends to help lift and carry.

If you will be using self storage, remember to contact us to reserve a room and order your packing materials from Attic Self Storage			
Start packing any non-essential items such as out-of-season clothing, together with your best china, glassware and ornaments. Remember to make clear lists of the contents in each box, and to keep a master record			
Clear out your attic, shed, garage, storage cupboards; pack as many items ahead of time as you can			
Let everyone know that you're changing address. This could be a long list of people so consider a standard letter and set aside a couple of hours			
Arrange to have post re-directed to your new address. If in doubt, or if you will be in between addresses for a while, consider using our mailbox service			
Give notice to any email, broadband or television subscription services, the gym etc.. of your intention to move			
Don't pack your passport, drivers' licence, insurance documents, details of solicitors, banks etc as you will need these over the course of your move			
Prepare a master file containing all the important documents relating to your move			
Contact your insurance company to arrange transfer of your home and contents insurance on the move day. Your buildings insurance should already be in place on the day you complete on your new home

Call your telephone service provider and let them know the time you want your telephone disconnecting or transferring			
Defrost the freezer and fridge (if you intend to transport the freezer and its contents intact, put it on fast-freeze overnight)
