
Podcast Script Format

Podcasts typically focus on voice and tone, so clarity is essential. Here's a streamlined format:

[Title]

Podcast Episode Title

[Intro]

Brief script to introduce the podcast episode, including the host's names and a hook to draw in listeners.

[Segments]

Podcasts are often broken into segments, like *Opening Remarks*, *Main Discussion*, and *Conclusion*.

[Host's Name]

Who's speaking, followed by their dialogue.

[Sound Cues]

Indicate any sound effects, music, or transitions, e.g., *[Sound of footsteps]* or *[Background music fades]*.

Example:

Title: *Episode 5: The Science of Happiness*
