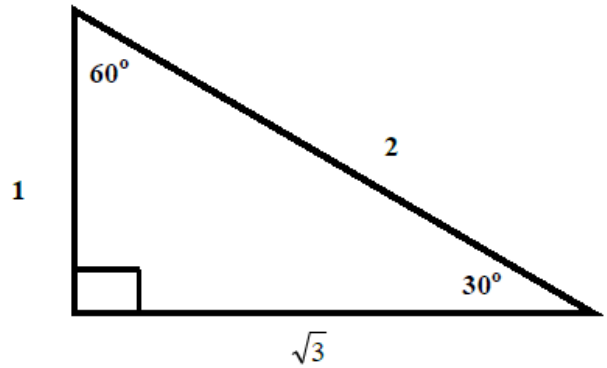
Trigonometry Fundamentals and the Unit Circle

The six trigonometric functions sine, cosine, tangent, cosecant, secant, cotangent are derived from relationships with right triangles. Common values result from two right triangles:

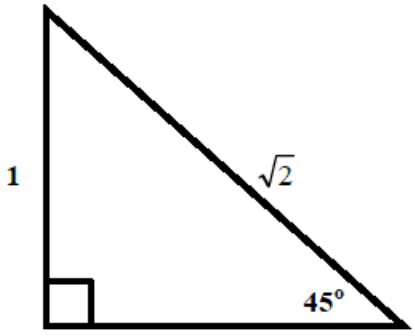


$$\sin(30°) = \frac{OPP}{HYP} = \frac{1}{2}$$

$$\cos(30°) = \frac{ADJ}{HYP} = \frac{\sqrt{3}}{2}$$

$$\tan(30°) = \frac{OPP}{ADJ} = \frac{1}{\sqrt{3}} = \frac{\sqrt{3}}{3}$$

(Note: values for 60° are found similarly.)

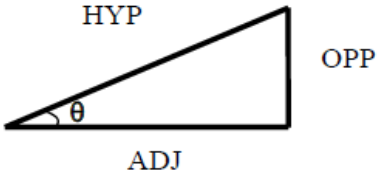


$$\sin(45°) = \frac{OPP}{HYP} = \frac{1}{\sqrt{2}} = \frac{\sqrt{2}}{2}$$

$$\cos(45°) = \frac{ADJ}{HYP} = \frac{1}{\sqrt{2}} = \frac{\sqrt{2}}{2}$$

$$\tan(45°) = \frac{OPP}{ADJ} = \frac{1}{1} = 1$$

"SOH CAH TOA"



SOH $\sin\theta = \frac{OPP}{HYP}$ $\csc\theta = \frac{HYP}{OPP}$

CAH $\cos\theta = \frac{ADJ}{HYP}$ $\sec\theta = \frac{HYP}{ADJ}$

TOA $\tan\theta = \frac{OPP}{ADJ}$ $\cot\theta = \frac{ADJ}{OPP}$

"All Students Take Calculus"

Students	**All**
Sin positive sin: + cos: - tan: -	All positive sin: + cos: + tan: +
Take	**Calculus**
Tan positive sin: - cos: - tan: +	Cos positive sin: - cos: + tan: -

The Unit Circle – the center at the origin; a radius of 1.

Coordinates of $(\cos\theta, \sin\theta)$
