1. An alternate protein product used in meals planned under the provisions in Sec. 226.20 must meet all of the criteria in this section.
 2. An alternate protein product whether used alone or in combination with meat or meat alternate must meet the following criteria:
 - a. The alternate protein product must be processed so that some portion of the non-protein constituents of the food is removed. These alternate protein products must be safe and suitable edible products produced from plant or animal sources.
 - b. The biological quality of the protein in the alternate protein product must be at least 80 percent that of casein, determined by performing a Protein Digestibility Corrected Amino Acid Score (PDCAAS).
 - c. The alternate protein product must contain at least 18 percent protein by weight when fully hydrated or formulated. ("When hydrated or formulated" refers to a dry alternate protein product and the amount of water, fat, oil, colors, flavors or any other substances which have been added).
 - d. Manufacturers supplying an alternate protein product to participating schools or institutions must provide documentation that the product meets the criteria in paragraphs A.2. through c of this appendix.
 - e. Manufacturers should provide information on the percent protein contained in the dry alternate protein product and on an as prepared basis.
 - f. For an alternate protein product mix, manufacturers should provide information on:
 - (1) The amount by weight of dry alternate protein product in the package;
 - (2) Hydration instructions; and
 - (3) Instructions on how to combine the mix with meat or other meat alternates.
- B. How are alternate protein products used in the Child and Adult Care Food Program?
1. Schools, institutions, and service institutions may use alternate protein products to fulfill all or part of the meat/meat alternate component discussed in Sec. 226.20.
 2. The following terms and conditions apply:
 - a. The alternate protein product may be used alone or in combination with other food ingredients. Examples of combination items are beef patties, beef crumbles, pizza topping, meat loaf, meat sauce, taco filling, burritos, and tuna salad.
 - b. Alternate protein products may be used in the dry form (nonhydrated), partially hydrated or fully hydrated form. The moisture content of the fully hydrated alternate protein product (if prepared from a dry concentrated form) must be such that the mixture will have a minimum of 18 percent protein by weight or equivalent amount for the dry or partially hydrated form (based on the level that would be provided if the product were fully hydrated).
- C. How are commercially prepared products used in the Child and Adult Care Food Program?
- Schools, institutions, and service institutions may use commercially prepared meat or meat alternate product combined with alternate protein products, or use a commercially prepared product that contains only alternate protein products

Attachment B – CACFP Meal Pattern Requirements

CACFP Infant Meal Pattern

CACFP infant meal pattern age groups encourage delaying the introduction of solid food until the infant is 6 months. However, the age when solid foods are introduced will depend on the infant. Infants develop at different rates - some infants are ready to consume solid foods before 6 months of age and others are ready after 6 months of age.

Food amounts listed in the meal pattern begin with zero (0) because USDA recognizes that not all infants are developmentally ready to eat solid foods at a certain age. It does not mean serving the food is optional. Once an infant is developmentally ready to eat solid foods, including infants younger than 6 months, programs are required to offer them to the infant.

Breakfast / Lunch / Supper	
Birth through 5 months	6 through 11 months
4-6 fluid ounces breastmilk, iron fortified infant formula, or portions of both	6-8 fluid ounces breastmilk, iron fortified infant formula, or portions of both; AND <i>(One or more items from the following*)</i> 0-4 tablespoons iron fortified infant cereal; OR 0-4 tablespoons meat, fish, poultry, whole egg, cooked dry beans or cooked dry peas); OR 0-2 ounces of cheese; OR 0-4 ounces (volume) of cottage cheese or yogurt AND 0-2 tablespoons vegetable, fruit or a combination of both <i>(no juice)</i>
Snack	
Birth through 5 months	6 through 11 months
4-6 fluid ounces breastmilk, iron fortified infant formula, or portions of both	2-4 fluid ounces breastmilk, iron fortified infant formula, or portions of both; AND <i>(One or more items from the following)</i> 0-½ slice bread; OR 0-2 crackers; OR 0-4 tablespoons iron fortified infant cereal or ready-to-eat breakfast cereal AND 0-2 tablespoons vegetable, fruit, or a combination of both <i>(no juice)</i>

**Grain items (i.e. bread, pancakes, waffles, breakfast cereal, etc.) are not creditable foods at breakfast, lunch and supper in the infant meal pattern. They cannot be served in place of IFIC.*

Additional Requirements

- Breastfed infants who consume less than the minimum amount of breastmilk per feeding may be served less than the minimum with additional breastmilk offered later if the infant will consume more.
- Yogurt must contain no more than 23 grams of total sugars per 6 ounces.
- Grains served at snack must be whole grain-rich, enriched meal, or enriched flour.
- Breakfast cereals served at snack must contain no more than 6 grams of sugar per dry ounce

¹ In NSLP and SBP (grades K-12), all grains served must meet whole grain-rich criteria. For information on flexibilities, please contact your State agency. For all other Child Nutrition Programs, grains are whole grain or enriched or made with enriched or whole-grain meal and/or flour, bran, and/or germ. Under CACFP child and adult meal patterns, and in NSLP/SBP preschool meals, at least one grain serving per day must meet whole grain-rich criteria.

² For NSLP and SBP (grades K-12), grain quantities are determined using ounce equivalents (oz eq). All other Child Nutrition Programs determine grain quantities using grains/bread servings. Beginning Oct. 1, 2019, grain quantities in CACFP and NSLP/SBP infant and preschool meals will be determined using oz eq. Some of the following grains may contain more sugar, salt, and/or fat than others. This should be a consideration when deciding how often to serve them.

⁵ Allowed in NSLP (up to 2.0 oz eq grain-based dessert per week in grades K-12) as specified in §210.10. May count towards the grain component in SBP (grades K-12), CACFP, NSLP/SBP infant and preschool meals, and SFSP.
