

Jeweled Bookmark Material List

For the string bookmarks you will need:

5-lon nylon cord or something similar

14 6/0 bead whichever color you want to use I used 2 clear and the others would be something that is complementary

2- large beads about a 10 mm - I used cane beads or furnace glass but you use what you like

2 crystal beads 6mm

6 large crystal rondels 8 mm color of your choice

6- 6 mm base metal beads color of your choice

2 – 6 mm hematite beads or something comparable

You will need a pair of sharp embroidery scissors, a beading mat and some white glue or clear to glue, the first beads in place on the ends.

Make sure that all beads have a hole big enough for the string, thread, cord or embroider floss to be able to go through twice.
