Presentation Information

This is the Title and Description that will be published in all Conference Materials

Enter the proposed description of your presentation. Your description should be an accurate description of what you intend to present. It should be written to interest CCCAOE members.

Proposals must clearly identify the learner's outcome, takeaways, tools and strategies attendees will have at the end of the session. Subject to final editing by CCCAOE. Remember that sessions run concurrently so attendees must be able to see at a glance what your session has to offer.
