

Research Training Schedule 2019

Date	Session information
10-5pm March 21 GCUH	Grant Pitch Day: Staff intending to submit a research grant during 2019 are encouraged to come to the Grants Pitch Day to receive constructive feedback from an expert panel.
12-1pm April 2 Griffith University	Clinical Trial Lunch and Learn 1: Australian Clinical Trial Landscape – trends and opportunities. Organised in collaboration with Griffith University.
12-1pm April 17 GCUH	Introduction to quantitative research: An introduction to quantitative research and designs.
12-1pm May 8 GCUH	Ethics and governance approvals (repeated in September): An in-depth introduction to ethics and governance forms and review processes, including tips and tricks from our Research Office to help your approval go smoothly.
12-1pm May 14 Griffith University	Clinical Trial Lunch and Learn 2: New developments in Clinical Trial Protocol Design. Organised in collaboration with Griffith University.
10-12am May 28 Griffith University	Introduction to qualitative research: A broad introduction to qualitative research, including its uses, forming your question, common approaches, data collection, and analysis. Organised in collaboration with Griffith University.
12-2pm June 7 GCUH	Developing a research protocol (repeated in December): How to develop your clinical question or idea into a research project, including developing a research question and choosing a research method. The session will also cover how to write each component of a research protocol and resources for each.
12-1pm June 12 GCUH	Basic statistics and using statistical programs: Basic statistics including sample size calculations and accessing/using statistical programs at GCH from our biostatistician.
<i>Sessions for the second half of 2019 are subject to room availability</i>	
12-1pm June 21 GCUH	Conference abstract writing: A short half hour lunch session on how to write an effective abstract for a conference, with a focus on abstracts for the Gold Coast Health Research Week Conference.
12-1pm June 28 GCUH	Developing a structured search: Learn how to use a systematic approach when searching the literature to provide evidence in support of your research proposal.
12-1pm July 12 GCUH July 19 Robina	Introduction to Research at Gold Coast Health: An introduction to the research services offered through the Research Office- meet each of the team and understand the basics of conducting research (e.g. support available, approvals needed, key contacts and resources).

12-1pm July 23 Griffith University	Clinical Trial Lunch and Learn 3: Use of digital tools in clinical trials. Organised in collaboration with Griffith University.
12-1pm August 16 GCUH	Managing your research data: How to manage and optimise your research data including recommended programs
9am-5pm August 22 Bond University	Systematic Review Workshop: Note this session is run by the Bond University Centre for Research in Evidence Based Practice and there is an associated cost. Refer here for details.
12-1pm September 5 GCUH	Introduction to quantitative research: Introduction to quantitative research and designs. Organised in collaboration with Griffith University.
12-1pm September 10 Griffith University	Clinical Trial Lunch and Learn 4: Clinical Trials outcome measures and analysis. Organised in collaboration with Griffith University.
12-1pm September 12 GCUH September 13 Robina	Ethics and governance approvals (repeat from May): An in-depth introduction to ethics and governance forms and review processes, including tips and tricks from our Research Office to help your approval go smoothly.
12-2pm October 18 GCUH	Grant writing: How to find and apply for grants- including advice from experienced grant reviewers.
12-1pm October 22 Griffith University	Clinical Trial Lunch and Learn 5: Clinical Trial oversight – the various parties, their responsibilities, and audits. Organised in collaboration with Griffith University.
12-1pm November 1 GCUH	Conference Posters: Covering the basics of poster design, content and layout in preparation for the Gold Coast Health Research Week Conference.
11am-1pm November 8 GCUH	Presenting at a conference: Guidance on giving conference presentations. This session will be useful for any Conference presentation but will specifically cover requirements of the Gold Coast Health Research Week Conference.
12-2pm December 5 GCUH December 6 Robina	Developing a research protocol: How to develop your clinical question or idea into a research project, including developing a research question and choosing a research method. The session will also cover how to write each component of a research protocol and resources for each.

Other training:

Please contact us to register your interest for STATA and GCP training later in the year.

Library services also run regular training which is of interest to researchers. Find out more [on LoL](#).

To register or enquire further, please contact the Research Development Team. We also offer inservices and one-to-one assistance with your project.
