Shift Schedule

Here is the LCLS Shift Schedule from May 16- July 31, 2011.

Brief list of the role of the Program Deputies (more is in ASD "Operations Directives"):

- 1) Conduct the 8 am accelerator progress meeting each morning to review the progress of the previous day, announce schedule modifications, and dispatch resources as required.
- 2) Give a summary of the day's proposed activities at the 8:15 meeting, as needed.
- 3) Meet with instrument scientists and users outside of the 8am MCC meeting to find out how things have gone so far and what can be improved.
- 4) Monitor and coordinate the activities in the control room (on call 24 hours per day).
- 5) Help interface the operations staff with the various real-time demands of users and instrument scientists.
- 6) Help interface with the support groups to get needed repairs launched to minimize down times.
- 7) Initiate alternate programs if the primary program cannot continue.
