

NAME: _____

KINGDOMS TRADING CARD PROJECT

Goal/Task: For this project, you will create a set of trading cards for each of the six Kingdoms of life. To begin, you will research and collect accurate and appropriate information available about each of the 6 Kingdoms. Gather the most interesting, useful, important, and memorable ideas about each of the kingdoms.

Delivery:

Your trading cards need to include specific information about each Kingdom presented in a creative format:

- Kingdom name
- Its size relative to the other kingdoms
- Cell types (prokaryotes or eukaryotes), complexity (unicellular or multicellular? Cell wall?) and Nutrition (heterotroph, autotroph, etc.)
- 2 interesting facts (example: mysteries associated with or surrounding the kingdom, startling discoveries about organisms in the kingdom, how the kingdom impacts human society)
- A sample organism that represents that Kingdom well:
 - Common and scientific name
 - Visual (picture, embedded video, etc.) with URL citation for picture
 - Habitat for selected organism

You can choose how to present your trading cards digitally. A template and web tools for creating this project will be made available to you. Students are encouraged to develop projects in a format that best expresses their knowledge of a topic, so no two projects will be alike.

Be creative and have fun. Above all, be sure that you read the rubric so that you earn your points for this project!

Contact your teacher if you have questions. This paper must be turned in when your project is submitted.

mrsyodergsic@gmail.com ***Include your name and “Kingdoms Trading Card Project” in email subject.***

Grading: The following criteria will be used to evaluate your project:	Points Possible
The style/format of the project is clearly a trading card in a digital format	10
For each of the 6 cards : <ul style="list-style-type: none">● Kingdom name and Relative size (12)● Cell type (6)● Cell complexity (6)● Nutrition (6)● 2 interesting facts (18)● Example organism:<ul style="list-style-type: none">○ common/scientific names, (12)○ habitat and (6)○ picture with url (12)	78
Final product is neat, organized and original in appearance. Proper spelling, grammar and sentence structure is used.	12
TOTAL	100
