

# Drink Tracking Log

**Instructions:** Choosing healthy drinks is one way to quickly improve your eating habits. Sugary drinks like soda and sweet tea can add many calories to your day if you choose them often. To work on making a change, start by tracking what you drink each day. This worksheet can help you with tracking. Simply print out the worksheet and mark off the beverages you drink during the day. You can repeat this over several days or a week for a full picture of your habits. Consider sharing your log with your Primary Care Provider or Care Manager for help in setting goals.
