Introduction

This migration guide shows the appropriate mapping (Xpaths) for certain fields in GetReservation API in version 1.19 and TravelItineraryRead API in version 3.10. GetReservation service has some enhancements that TravelItineraryRead does not have. Those are not showed in this migration guide, as they don't have the corresponding elements in TIR. For more information please review documentation of GetReservation.

Legend for the table:

- **Dark blue font** – Root/parent node marking
- **Purple font** – differences in format or in field type e.g.:
