*Interior Design
Request for Proposal*

Fire Stone Wood Fired Grill is a family-owned and operated restaurant located in Historic Downtown Dothan, Alabama. Started in 2010, we strive to meet our community at their special moments: birthdays, reunions, first dates, and wedding anniversaries. A major part of our ability to host these special events is our special event space located behind our main restaurant. For years we've hosted everything from birthdays to weddings. With a comfortable capacity of 65, it's the perfect location for Dothan to come together and celebrate while enjoying the great food and hospitality our restaurant has become known for in a celebratory and intimate setting.

With a recent interior revamp of our main dining room, our event space is in need of an interior redesign to ensure the hospitality that we are known for is experienced by guests regardless of whether they're dining in our main dining room, or they're celebrating with a group in our event space.

All proposals due no later than Friday, February 14th, 2020 at 5:00 PM Central Time.

Budget: \$5,000 - \$7,500

Collaborative Design Sessions: The Fire Stone management team would like to enter into a collaborative design environment with the designer to develop a look and feel based on professional preferences with growth and expansion in mind.

Scope: The event space has a "warehouse" vibe to it. It's a large square room that's framed by cinderblocks. It has an epoxied concrete floor, with small windows and 3 doorways. We would like to create a southern industrial/metropolitan feel in the room, utilizing the "rustic" aura the room currently possesses. *(You may stop by any time during business hours to review the space before submitting your proposal.)*

Timeline: Fire Stone will review the proposals and have a designer chosen by the end of March. We would like the room to be fully redesigned and ready for use by Friday, May 29th, 2020.

If you are interested in submitting a proposal for this project, please email Nicole at the email listed above. We look forward to your feedback.
