

SN&N Electronics is built on a strong team of expert engineers and scientists who specialize in bringing client ideas to life. It is the critical combination of physics and practical engineering that allows us to innovate and ensure precision design. Together, we work rapidly to save clients valuable time and money by placing an emphasis on the initial prototype phase of every project so that expensive, time-consuming iterations are minimized.

SN&N has an opening for a qualified Android developer to write applications to communicate with medical devices. The successful candidate will write efficient code, work independently and collaboratively with a team of engineers to guide the process of integrating the Android application with various products.

Position: Software Engineer Android Developer (Contract)

Requirements:

- Intermediate to advanced level of understanding of Android/Java
- Good understanding of Linux and Kernel
- Proficient with UART and USB communication with Android
- Proficient with Android studio or Eclipse to design the Android application GUI
- Proficient with real-time XML parsing
- Good writing skills to document code as per company protocol
- Ability to work independently on Android development
- Good team player to work with software, firmware, and EEs

Qualifications:

- The candidate has a natural curiosity for learning new skills, a positive attitude, is detail oriented, self-motivated and a creative problem solver.
- Bachelor's or Master's degree in computer science or related field
- 3 years of experience desirable
- Work to be performed on-site in San Jose, CA
- Applicants from the Bay Area are preferred
- In possession of appropriate paperwork to gain and maintain employment in the US

Job Type: Contract

Work Location: San Jose, CA

Compensation: DOE
