1 Introduction

Q Squared has been engaged by the Renwick Community Memorial Hall Trust to estimate the cost to carry out alterations and additions to an existing hall.

The estimate is based upon a drawing set provided by Redbox Architects.

All costs in this report exclude Goods and Services Tax.

2 Executive Summary

Q Squared estimate the cost to complete the building works will cost:

\$626,490.33 excluding GST

The cost of professional fees or consent fees are not included.

The gross floor area of the total hall is **611 m²**, excluding the new deck and canopy.

| # | Element Group | % | \$/m ² | Total cost |
|-------|---------------------------------------|-------------|-------------------|---------------------|
| 1-5 | Structure | 12% | \$118.30 | \$72,278.56 |
| 6-8 | Exterior fabric | 21% | \$220.36 | \$134,640.00 |
| 9-15 | Interior finishing | 18% | \$186.34 | \$113,851.40 |
| 16-22 | Services | 9% | \$91.64 | \$55,990.00 |
| 23-24 | External works and sundries | 12% | \$124.36 | \$75,981.33 |
| 25-27 | Preliminaries, Margins, Contingencies | 28% | \$284.37 | \$173,749.03 |
| 28 | Other development costs | 0% | \$0.00 | \$0.00 |
| | TOTAL EXCLUDING GST | 100% | \$1,025.35 | \$626,490.33 |

We assess risk to this project as follows:

Medium – a contingency percentage of **10%** for design and construction contingency is appropriate.

Particular areas of risk are:

- No structural design provided
- No fire report provided
- Detailed design and specification not complete

3 Scope

3.1 Site

The site is a relatively level lot in Renwick, Marlborough. Access is good.

Provided documents show the building built across a boundary. No costs associated with the boundary position are included in the estimate.

No site visit has been carried out by Q Squared.

3.2 Documents

The estimate is based upon a developed design drawing set which is **attached** at appendix 6.2.

The provided documents fulfil the description criteria of the New Zealand BIM Handbook, Level of Development **200**. This number describes the amount of detail provided in the documents. Refer to the schedule **attached** at appendix 6.3. The accuracy of the estimate related directly to the level of development.

3.3 Assumptions and limitations

The estimate is based upon the following assumptions and limitations:

- 3.3.1 It is important to note that the documents are not detailed and as such the estimate does not measure every component required to complete the works. The estimate should be used as a guide only as it can only be as accurate as the documents it is based upon. We recommend that a further estimate be carried out upon completion of detailed design.
- 3.3.2 We assume the contract will be a standard form of New Zealand construction, such as New Zealand Institute of Architects form or NZS 3910:2013.
- 3.3.3 We assume the method of procurement will be a competitive tender. Other methods have benefits, but the cost to construct may differ.
- 3.3.4 No inclusion for any inflation or cost escalation.
- 3.3.5 No inclusion for the cost of removing any hazardous materials, such as asbestos unless noted. There are significant costs in dealing with some products.
- 3.3.6 No inclusion for any furniture or loose fittings.
- 3.3.7 No inclusion for any professional fees.
- 3.3.8 No inclusion for any council levies or consent costs.

3.4 Description of the works

The works are set out in the documents in section 3.2 above. They may be broadly described as follows:

- 3.4.1 Establish on site
- 3.4.2 Scaffold exterior of building
- 3.4.3 Remove asbestos cladding in accordance with Worksafe requirements
- 3.4.4 Demolish north wall and rebuild
- 3.4.5 Install new cladding, paint existing roofing and cladding
- 3.4.6 Construct new deck, accessible ramp and canopy
- 3.4.7 Install new commercial aluminium doors and windows to north wall and clerestory in hall
- 3.4.8 Install new linings to clerestory in hall, install Autex cube acoustic linings to hall
- 3.4.9 Remove and replace plasterboard linings to kitchen, committee, and toilets
- 3.4.10 Install new ceiling to foyer, repaint ceilings to kitchen, supper, committee, toilets and foyer

- 3.4.11 Replace kitchen joinery and appliances
- 3.4.12 Replace plumbing fixtures
- 3.4.13 Install new extract and heating as shown
- 3.4.14 Upgrade lighting to kitchen, supper, committee, toilets and foyer
- 3.4.15 Amend fire alarm system as required
- 3.4.16 Complete selected landscaping works
- 3.4.17 All preliminary and general costs required to undertake the works

3.5 Construction Period

As a broad estimate, the contract works should be able to be completed in a period of 6 months. We understand that Stage I works have not been carried out so there will obviously be some dovetailing with that project.

Q Squared certainly recommend carrying out the stage I and stage II works concurrently.

3.6 Market conditions

The site is in Marlborough.

New Zealand is currently experiencing a significant boom in the construction sector. This most often leads to an escalation in margins and reflects in an overall higher build cost. Anecdotally, some projects are having reduced interest from contractors, which also has an escalating factor on price.

The contractors' margins and preliminary costs are the figures most affected by market forces. The estimate has these rates set in a mid-range, but a motivated contractor might provide a submission with lower rates.

4 Estimate

The estimate has been calculated by using the format set out in the "Elemental Analysis of Costs of Building Projects", 5th Edition, January 2017, by the New Zealand Institute of Quantity Surveyors. The elemental format groups certain components together by their function into elements and sub elements. It is helpful for estimating purposes because it allows the client to assess where particular costs are attributed.

4.1 Elemental summary

| | Element | % | \$ / m ² | Cost excluding GST |
|-----|--|-------------|---------------------|---------------------|
| E1 | Site preparation | 6.0% | \$61.84 | \$37,783.06 |
| E2 | Substructure | 0.0% | \$0.00 | \$0.00 |
| E3 | Frame | 4.6% | \$47.18 | \$28,825.50 |
| E4 | Structural walls | 0.9% | \$9.28 | \$5,670.00 |
| E5 | Upper Floors | 0.0% | \$0.00 | \$0.00 |
| E6 | Roof | 7.8% | \$79.92 | \$48,830.00 |
| E7 | Exterior walls and exterior finish | 10.3% | \$105.32 | \$64,350.00 |
| E8 | Windows and exterior doors | 3.4% | \$35.12 | \$21,460.00 |
| E9 | Stairs and balustrades | 0.0% | \$0.00 | \$0.00 |
| E10 | Interior walls | 1.7% | \$17.68 | \$10,800.00 |
| E11 | Interior doors | 1.5% | \$15.48 | \$9,460.00 |
| E12 | Floor finishes | 2.4% | \$24.63 | \$15,046.00 |
| E13 | Wall finishes | 4.8% | \$48.78 | \$29,807.40 |
| E14 | Ceiling finishes | 1.6% | \$16.27 | \$9,938.00 |
| E15 | Fittings and fixtures | 6.2% | \$63.50 | \$38,800.00 |
| E16 | Sanitary plumbing | 4.0% | \$41.08 | \$25,100.00 |
| E17 | Heating and ventilation services | 1.4% | \$14.32 | \$8,750.00 |
| E18 | Fire services | 0.6% | \$6.55 | \$4,000.00 |
| E19 | Electrical services | 2.6% | \$26.50 | \$16,190.00 |
| E20 | Vertical and horizontal transportation | 0.0% | \$0.00 | \$0.00 |
| E21 | Special services | 0.0% | \$0.00 | \$0.00 |
| E22 | Drainage | 0.3% | \$3.19 | \$1,950.00 |
| E23 | External works | 12.1% | \$124.36 | \$75,981.33 |
| E24 | Sundries | 0.0% | \$0.00 | \$0.00 |
| E25 | Preliminaries | 10.4% | \$106.41 | \$65,019.30 |
| | Subtotal | | \$847.40 | \$517,760.60 |
| E26 | Margins | 8.3% | \$84.74 | \$51,776.06 |
| E27 | Contract contingencies | 9.1% | \$93.21 | \$56,953.67 |
| E28 | Other development costs | 0.0% | \$0.00 | \$0.00 |
| | | | | |
| | TOTAL EXCLUDING GST | 100% | \$1,025.35 | \$626,490.33 |

4.2 Schedule

A detailed schedule is **attached** at appendix 6.1.

The detailed schedule describes the scope of works in more detail. It is not sufficient to instruct a contractor in the works, as no detailed design has been completed.

5 Limitations

This report has been prepared solely for the benefit of the client as per our brief and agreed conditions of engagement. The reliance by any other parties on the information or opinions contained in this report shall, without our prior agreement in writing, be at such parties' sole risk. Q Squared Limited disclaims all responsibility and accept no liability to any other party.

The conclusions and estimates contained within this report are based on the documents and other factors as described in detail above. The report may not disclose all relevant information and it may rely on information provided by others. Where information is provided by others, or inspections are carried out by others, we accept no responsibility for the accuracy of that information.

Q Squared limited make no representation to soundness, compliance with any terms, plans, specifications, statutory requirements, or safety relating to the proposed work unless specifically stated. The report does not cover land, sales, or market valuations.

not scale from drawings. confirm all dimensions on site. confirm any discrepancies

The diagram illustrates three different wall cladding systems labeled R1, W1, and W2. System R1 shows a vertical corrugated metal panel. System W1 shows a vertical corrugated metal panel with horizontal cladding. System W2 shows a vertical tray system with horizontal cladding. A dashed line indicates the roofline, and a dimension of +6.300 is shown at the top right.

R1 New colorsteel vertical corrugate
cladding.

W1 New colorsteel vertical corrugate
cladding.

W2 New colorsteel heritage tray claddin
system.

W3

+6.300

elevation key & notes:

- W1** New colorsteel vertical corrugate cladding.
- W2** New colorsteel heritage tray claddin system.
- W3** New block wall. Plaster finish.
- W4** New flushglaze system.
- W5** Existing Galvanised cladding
- W6** Existing Asbestos cladding to be removed.
- W7** Existing clearlite cladding to be removed.
- R1** Existing galvanised longrun roofing to remain.
- R2** New colorsteel trimline roofing. Selected colour.

scope exterior:

- NEW ALUMINIUM DOUBLE GLAZED JOINERY AS INDICATED.
- REMOVE ASBESTOS CLADDING.
- NEW CLADDING AS INDICATED.
- PAINT ALL UNFINISHED CLADDINGS AND ROOFING.
- NEW BOX GUTTER SPOUTING AND DOWNPipes.

The figure shows an architectural elevation of a building's exterior. The building has a complex roof structure with multiple gables and skylights. Vertical cladding is present on the upper sections, while horizontal cladding is on the lower ground floor. Callouts point to specific details: W1 points to new vertical corrugated cladding; W2 points to a heritage tray cladding system; W3 points to a new block wall with plaster finish; W4 points to a new flushglaze system; W5 points to existing galvanised cladding; W6 points to existing asbestos cladding to be removed; W7 points to existing clearlite cladding to be removed; R1 points to existing galvanised longrun roofing to remain; and R2 points to new colorsteel trimline roofing in selected colour. The drawing also includes a detailed view of the roofline with labels A through E, and a scale bar indicating 1:100. The roof levels are marked as +6.300, +3.550, +3.550 Story, +800 Ground Floor, and +6.300 Roof.

This figure is an architectural East Elevation drawing of a building. The drawing shows a multi-story structure with a gabled roof. The building features several levels, indicated by horizontal lines and elevation markers. The top level is labeled '+3,550 Story' and the middle level is labeled '+800 Ground Floor'. A legend box contains the letter 'W5'. A north arrow points upwards. The drawing is titled 'Existing East Elevation' and has a scale of '1:100'.

Existing East Elevation

1:100

This architectural elevation drawing illustrates a building's exterior with a prominent, steeply pitched roof. The roof features a series of parallel lines representing shingles or tiles. A vertical dashed line extends from the roofline down to the ground floor, defining the building's footprint. On the left side, a section of the roof is shown with a label 'R1' and a callout line pointing to a specific point. Another section on the left is labeled 'W6'. On the right side, there are two labels 'W5' with callout lines pointing to the roofline. The building's height is indicated by several horizontal reference lines and labels:

- +6,300 Roof
- +3,550 Story
- +800 Ground Floor

The building's facade includes several windows of varying sizes. Some windows have internal frames or grid patterns. The overall style is technical and precise, typical of architectural blueprints.

NOTES

1. Lighting calculations are based on initial lumens with a maintenance factor (LF) as shown.
2. Isolux lines/statistical reports show illuminance levels at floor or workplane level as shown in the numeric summary.
3. Relevant obstructions have been included in the design.
4. The design has been calculated in accordance with AS/NZS 1680.2.2.2008 (at maintained illuminance).
