

Strategic Plan Design Team Meeting Summary

December 8, 2021

During the December 8th session, the Design Team refined their work on the commitments they selected to support each SUSD strategic goal. To substantiate their work, they reviewed comments from SUSD principals about the proposed commitments.

For their next step, the Design Team considered Key Performance Indicators (KPIs) to determine the degree to which each commitment is being met. These KPIs will be for District-level data. Schools will also establish goals and indicators that align with the district focus communicated in the new strategic plan.

During the next Design Team session, the KPIs will be finalized in preparation for Governing Board approval. In addition, action plans will be completed to ensure that strategic goals and commitments are implemented and sustained.
