WARNING NOTICE

WARNING NOTICE TO ALL CUSTOMERS

It is part of the conditions of the Approval for Approved Tachograph Centres that they are required to report, to DVSA, details of any vehicle that is submitted for tachograph work on which the Tachograph system has been interfered with. This interference would include such items as the fitment of unauthorised devices, or where the system is showing the signs of tampering.

Failure to report such items will result in disciplinary action being taken against the Approved Tachograph Centre. This action could lead to the withdrawal of this centres approval.

DVSA needs your help in maintaining the reputation of the Tachograph calibration scheme and road safety.

If you have any information, contact DVSA on

0300 123 9000

(calls provided by BT are charged at a low rate. Charges from other providers may vary),

All calls and information will be treated in the strictest confidence.
