About the Book

The Chypre is my favorite fragrance family. It can be found in men and women's fine fragrances with a variety of interpretations. Francois Coty the Founder of Coty, Inc., created his Chypre fragrance in 1917. It was supposedly based on ingredients found in his home island of Cyprus located in the Mediterranean. In those days a fine fragrance would contain close to one hundred percent of essential oils. There was no regulatory agency (IFRA) that governed the use of materials such as we have today. The synthetic industry was in its infancy, and would take several generations to mature into its present hated form.

The Chypre is a combination of woods, moss and citrus. Henceforth, thanks to this ground breaking fragrance, all perfumes in the chypre category contained some combination of a sparkling citrus note (bergamot), floral heart notes, and rested on bases of vetiver, oakmoss, labdanum and patchouli. Typically the aromatic materials vetiver and labdanum would be found in the men's fragrances.

Unfortunately this wonderful family of scents has been slowly destroyed courtesy of the folks at the International Fragrance Association. Indirectly by RIFM at the behest of Givaudan, IFF, Firmenich, Symrise and Takasago. The five biggest players control approximately eighty percent of the market. Several of these houses started as essential oil concerns. Today, they produce synthetic materials, which are based on petroleum. A fine fragrance today can not incorporate many citrus materials, particularly bergamot plus natural oakmoss and patchouli due to the over regulation of this once fine art.

One description describes Coty's remarkable scent as one that can be enjoyed only for its historical notoriety as the first perfume that opened the door for later, superior incarnations. The Coty Chypre stands alone as an incredibly beautiful and complex scent. At once fresh and bracing, warm and woody, and softly floral, Chypre dries down into what can only describe as a powdery butter. By inhaling the almost milky richness of what's left behind, combined with a disquieting hint of civet, which adds enough funk to keep Chypre from signifying "old lady perfume."

Roja Dove (The Professor of Perfume) in his most recent book wrote "Coty managed to put the gentlest whisper of orris, vanillin, and coumarin into this creation which gave it a note of intimate luxury redolent of the warmth of soft intimacy where the shoulder joins the neck."

My book contains over 500 compositions. Do any of these work you ask? The fragrance industry does not wish to teach the creative art to anyone outside the hands of a select few. A composition is nothing more than a harmonic blend of pleasing materials in parts per thousand otherwise known as 100 percent. In order to learn

what the materials actually mean, and how they work together, takes years. One must serve in an officially sponsored apprenticeship to master this trade. There are several fragrance schools including the ISIPCA in France along with one's at Givaudan, International Flavors & Fragrances plus Symrise. However, there are only several job opening each year with dozens of qualified graduates. Only the best connected get into this coveted profession.

A perfume formula is a carefully guarded trade secret. A perfumer swears allegiance to his employer to safeguard the company treasures. What each artist creates is owned by the fragrance house, and is classified as a trade secret. Thus no perfumer will ever display or publish a correct formulation book. As a member of a secret society one also swears not to divulge any aspect of their craft to outsiders. Again, this is part of the reason why there are so few books available on the aroma art. If one can find one the arrangements are awful containing formulas from the 19th century in incorrect portions.

It is my opinion that sooner or later consumers will have skin reactions to the synthetic blends. Again, no one has any idea what long term exposure to synthetic materials based on petroleum will in the long term due to one's health, nor do the fragrance houses care. Again, the fine art of fragrance creation is being ruined by (IFRA) a Gestapo type agency indirectly through the major five players to create a nightmarish creative atmosphere constantly strangling the perfumer's palette of aromatic materials.

In turn it is getting close to impossible for a perfumer to incorporate natural materials, or for that matter come up with anything new. Most of the folks who inhabit positions outside the art possess little understanding of what they are doing. Creative directors, evaluators, test panels, sales, marketing, advertising, public relations, and of course management create exaggerations which in certain circles could be construed as consumer fraud.

Many years ago fragrance houses were run by perfumers. Today, fragrance houses are in the hands of the above folks who help create myths about fragrances. The untruths along with increasingly more and more launches are fueling the industries declining sales. Sadly the fine creative art is also in the decline. Banning natural materials in lieu of synthetics and falsely claiming a fragrance contains essential oils is robbing the consumer of a quality product. More and more fragrance launches plus improved versions of fragrances in fact incorporate less and less aromatic materials. In certain cases this kind of misdirection can be found on the TNT show Leverage. Not understanding the art is part of the problem. The other side of the coin is the folks who love it, don't know it, and are envious of those who do create the scents.

Do my fragrances that are in this book work you next want to know? My answer to that of course is who knows. I do realize formulation books that you see today are for the most part misleading. Any one of my creations can be endlessly changed, and adapted with experimenting. Taking into the account the cost for many of the materials I doubt whether any listed in this book could be made. However, that in a nutshell is the fine art of fragrance. It is my opinion that the composition itself should be an integral part of advertising, and marketing of a fine fragrance. However, due to the paranoia in the fragrance industry governing a trade secret, which is the composition, I doubt whether this will ever happen. In order to understand a formula one must know at the very least several thousand aromatic materials.

It is my opinion in the not too distant future of thirty to fifty years of time the fine art of fragrance will have completely disappeared. High-speed computers plus automatic compounding machines will replace it. Each fragrance house has millions of compositions in their libraries. A single successful fragrance can have thousands of variations. The major players in the industry Givaudan, IFF and Symrise have opened fine art creative centers in China, Brazil and India. Sooner or later due to cutting costs no one will know for sure the true source of any given fragrance. A perfumer in China can create a fine fragrance for a Wall Mart or Chanel.

This is part of the reason why there is nothing new today. An individual scent belongs to a fragrance family. To be in that family one has to be related to a fragrance in that family. If a perfumer comes up with something different which I believe is not possible, a competitor will duplicate it with a gas-chromatography computer inside a week. In today's fragrance world there is nothing new except the endless hype show casing something unique when in reality there is nothing new except cheaper, and cheaper fragrances that contain little or no essential oils plus fewer aromatic materials.

As I said in my other books I was blacklisted by the fragrance industry through an unscrupulous former employer many years ago. Due to the computer and the world wide web I have been able to display my creative talents to its fullest. No one has come knocking on my door seeking my services. If I can do this type of original creative work, and am underemployed what does that tell you about this industry? Non of my books will ever be printed. Due to the nature of the pdf file I can not sell a single copy without fear of unauthorized distribution to other channels.

This book titled Arranging Fine Perfume Compositions - The Chypre's took over five months to create. Others will follow. Careful study will display how similar many fragrances actually are, and why perfumers are able to come up with new fine fragrances with several days of experimentation. As more fragrances are being created they will eventually all smell alike because they are all alike.

Enjoy.

Coty

WOMEN OF THE U. S. WHO LIKE TO PUT A DROP OF COTY PERFUME BEHIND THEIR EARS were all approval, last week, when gallant Perfumer-Publisher Francois Coty founded a new newspaper, The Evening Friend-of-the-People (L'Ami du Peuple du Soir), and took up editorial cudgels in defense of the U. S. cinema industry, which sorely needs a champion in France.

Like Great Britain, Germany, Italy, Spain and many another European state, France has long had a system of restricting U. S. film imports. The reason is similar to that which caused Congress to put a tariff on French gowns and hats. Supreme and unrivaled in their own fields are Parisian modistes and Hollywood producers. As yet, however, Congress has not decreed that for every three gowns that a Parisienne sells in the U. S., she must buy one U. S. gown and try to sell it in France. The uproar, the heaven-piercing cries for justice which would rise from Paris if the U. S. took such a stand may be imagined. None the less the French Government was last week

on the point of imposing precisely similar conditions with respect to U. S. films shown in France.

Almost every Paris newspaper except those owned by Perfumer-Publisher Coty has been urging for months that a one-for-three quota be imposed, instead of the present one-for-seven arrangement which U. S. Cinema Tsar Will H. Hays secured on his famed visit to Paris (TIME, May 14), but which expires next September.

The virtual unanimity of the Paris press is supposed to be due to M. Jean Sapene, soft-spoken head of the French Cinema Trust (Chambre Syndicate). "Far from desiring a controversy with the Americans we seek a friendly agreement with them," said suave M. Sapene recently. "The so-called one-for-three arrangement is an absolute necessity if the French industry is to live." A feature of negotiations which have been going on literally for years, is the refusal of M. Sapene to approve a suggestion from U. S. cinemakers that they would be quite willing to

face a tariff on their films instead of having to buy French pictures. The candid objection of M. Sapene to any sort of tariff is that the cash collected would go to the French Treasury instead of to his Cinema Trust. Wrote Publisher-Perfumer Coty, last week, in his new newspaper: "In the opinion of everyone and our own sense of fairness compels us to admit it the French motion pictures were never so poor or inferior as they are at present.

The French public likes the American films and we cannot do without them because, on the whole, the quality equals the quantity in American films shown to us. "If the American public does not like most of the French films, it is not because of a spirit of chauvinism or because of the Monroe Doctrine, but because of their inferiority. As a matter of fact, Americans do appreciate good French films and there never has been an example of a good French film failing in the United States. "No! American films must not disappear from the French screen. Let us also have great French films!

"Very few people in France know the inside of this situation. Tricks have been played! One man and one man alone, a man whom all the world knows, intends to reserve the French market for his own mediocre productions." Decision as to whether the one-for-three plan will go into effect rests with the French Ministry of Fine Arts, which M. Sapene is believed to dominate.

Last week Under-Secretary of Fine Arts Andre François-Poncet called what purported to be a show-down conference between U. S. and French cinemen. The State Department instructed U. S. Commercial Attache Henry Coit MacLean to attend, to champion U. S. interests. Tsar Hays was represented by his permanent Paris agent, Harold L. Smith, who has lately threatened complete withdrawal of U. S. films from France if the one-for-three plan is imposed. As the negotiants sat down to play a game of haggle, most observers thought the deck had been stacked in favor of M. Sapene. None the less there was a surprising, significant eleventh hour development.

Meeting in haste, members of the French Provincial Cinema Exhibitors Association passed unanimously a resolution against the one-for-three plan. Apostrophizing the French Cinema Trust, this resolution declared: "Begin by making your own production worth while! Create a

national industry having the support of the French banks and French capital. Find directors worthy of the name. Give your film stars the proper kind of intelligent publicity. In a word, organize and demonstrate that you are capable!

"If American films are forced out, France will soon be overwhelmed by morbid and pornographic productions made in Germany. In any event, it is not our interest to force foreign capital from our doors at a moment when it is about to be invested in the construction of new theaters in Paris.

Perfume

Francois Coty

FRANÇOIS COTY, professional perfumer, politician, journalist, idealist, and millionaire, is a gentleman of mystery. Regiments of employees in uniform white smocks, all uniformly smelling sweetly, gather at his parent scent factory on the banks of the Seine near the Bois de Boulogne; hundreds more, dressed and smelling alike, troop to his newer filial establishment near the banks of the Hudson in western Manhattan. Hundreds of pressmen coöperate on the morning and evening editions of his new proletarian *Ami du Peuple* in the Rue de Bassano; a few hundred fewer at the Rond-Point work over old *Figaro*, which, being destined for aristocrats, takes less labor. Of these thousands of French and American citizens who owe him their livelihood, few except those at the top of the tree have ever laid eyes on him. Those who have never tell what they have seen. He gives no interviews, they give no information.

In Paris, where he lives, little that is precise is known about him even when he says it himself. He

says that he is related to Napoleon Bonaparte; it is known that his real name is Spoturno, that Coty is a *nom de plume* he signs to perfumes, as poets, with modesty, might sign their young verse. It is known that he recently bought the hunting pavilion of Luciennes near St. Germain-en-Laye, once the property of Madame duBarry; that he is building an enormous modern pile placed like a restaurant on a high road in the Bois and affording from its bedrooms a free sight of the horse-racing at Longchamp, in which he is not interested; and that he owns a mansion in the Avenue Raphael which he uses as a postal address. It is known, furthermore, that he does not, and likely will not, reside in any of these. For Coty, as a man with views, takes his new Fascism and his more antique imperial descent both separately and seriously; in political life what he most fears is modern Bolshevism; in private life, old-fashioned assassination. He lives quietly in a hotel in the Champs-Élysées. He is not seen in public places, he dislikes congregations of all sorts. Though momentarily in

favor of France's paying her war debt, when the American Debt Commission recently wished to descend upon his hotel, he threatened to pack up and leave rather than be surrounded by a crowd, even of industrial experts. Personal contact with the masses, so necessary to a man so determined to stamp out Communism, he establishes via his comforting curly-haired profile and his evangelist's message pasted on the boulevard billboards. Like a typographical vision, Coty appears to his followers only sidewise and in print. With that clannishness that marks the French *nouveaux riches*, the few friends to whom he appears in the flesh brag freely of the meetings but guardedly refrain from quoting what, if anything, might have been said. For Coty is powerful, hot-tempered, a watchful dreamer, creative, secretive, a man described as apt to make or break events with a "yes" or a "no," a man known to be red-haired and a Corsican. In consequence a vast, inexact, and fairly unfriendly legend hangs over him like a smoke screen which his enemies, among them the five greatest

newspapers in Paris, have belched out to asphyxiate him, and in which, with superb psychology, he comfortably hides.

He was born in Ajaccio, Corsica, and in stature is one of those important little men in whom France has specialized since the rise of his relative, Napoleon. Two natural endowments are necessary to a fine perfumer good taste and an olfactory nerve suited to segregating not only kinds of odors but their qualities. Coty's gift for his career was an olfactory nerve, marvellously talented and acute. Its judgment, incidentally, was once unquestioningly accepted by a rival who was bringing suit. Though he began by exporting essences from the flower fields of Grasse on the Riviera, and can still be recalled later peddling his perfumes to the barbers of Paris, it was by way of his bottles that he really broke into the big perfume business of Europe. For his was the merchandising genius that perceived perfume as something in a lovely bottle, rather than as merely something lovely in a bottle. Because of its Midi gardens and Bourbon courts, France had for generations made the world's perfume, but Coty changed its guise and its psychology. Viewed by the older houses as an upstart in the business, he revolutionized it and them by presenting scent in modern dress and as a luxury necessary to everybody. (It had hitherto been presented, with conservative lack of appeal, only to people who could

afford it.) Coty was the first to have bottles designed by the great ceramist, Lalique; first to utilize the new decorative trend toward color, metal, lines; the first, in a word, to make perfume appeal to the eye as well as the nose. Presenting it as a symbol of luxury, he shrewdly sent it to America, where it was clamored for as a sign of class by women of every class. His also was the first effort to aestheticize the humble talc in his famous orange-and-white L'Origan box which, along with the Standard Oil can, may still be found in remote outposts the world over pathetic signs of advancing civilization. His policy won eight million Frenchwomen alone to use his powder at the rate of sixteen million boxes a year, and changed the face of the cosmetic business.

Though ranking with Citroën as the outstanding Horatio Alger hero of modern selfmade French financiers, Coty has known downs as well as ups in the twenty-five stormy years of his career. What could be bankruptcy for other men, however, he manages as a success, for he is a great organizer in whom great organizations believe.

His Rose Jacqueminot scent, a floral base perfume, was his first huge success; L'Origan, an animal odor, was the second and, in conjunction with Chypre, constitutes three-quarters of his sales today. In volume Coty is not the largest producer in Paris, but though his out-

put is less than one or two others, he is better known. Four and a half million bottles of his Paris-made perfumes are annually sold in all of the countries of the world except Rumania, the British Isles, and the United States. Branch establishments, separately incorporated, are maintained in these three, and make and sell their own from materials supplied to them by the Parisian parent house. Racial female taste furnishes quaint statistics; for instance, American women like middling-passionate fantasy odors and no posy smells, whereas the chillier, land-loving British dames require only the chastest invented odors and pure garden bouquets. Blunt amber and heliotrope, most passionate of beast and blossom odors, intoxicate all the Spanish-speaking señoritas. Amber and rose in their rarest forms, considered by perfumers to be the peak of their art, please the French.

Manufacturing modern perfumes is a complicated, expensive, far-reaching job. As contribution to a bottle of scent they never see, foreign fishermen stroll oceans with a weather eye open for ambergris, that odd, floating bilious attack of the sperm whale; Chinese merchants wrangle in Tonkin over the spoils of the Tibetan musk ox; hunters trap the male civet. These three beasts form the main trio necessary to the making of most fine perfumes today, for they furnish the fatty fixatives which prevent the perfume itself from evaporating.

Then alcohol must be added to the fixatives to preserve them from decay, and doubtless something must be done to the alcohol to preserve it from being drunk. In any case, Coty's chemists, who are highly paid and sworn to secrecy, take at least a year to formulate a new odor, whose degree of perfection even then must be variable, since good perfume, like good wine, depends on the flavor of the year's crop. In Coty's New York warehouse are priceless bottles of flower essence of vintage seasons, being allowed to ripen as herbs ripen in the famous Chartreuse liqueur, and being rolled on their cribs as champagne is rolled to insure its primary purifying.

No one knows exactly the relation between Coty and his old associate, B. Levy, the head of the New York establishment. In Paris there was a rumor that Coty had sold his business here for an enormous sum, but this was denied. The staff here still refers to M. Coty, on the rare occasions when he comes to New York, as hierarchal head of the house. It cannot be decided whether it was his or Levy's shrewd eye which shrewdly saw the desirability of avoiding the high tariff on bottled perfumes by importing raw essences, assembling them according to the French formula in New York, and thus endearing themselves to the American perfume-buying public by prices lower than some of their foreign competitors could stoop to. More than half the

New York employees are, like the establishment's essential oils, also imported from France, including the half-dozen "smellers" whose delicate, important duty would correspond to that of tasters in a Chinese tea house.

Until recently, like all the other perfume manufacturers, Coty bought most of his floral essences near the vast flower fields of Grasse on the Riviera, where common attar of roses could cost one hundred and twenty dollars a pound. Three years ago the Coty interests started to develop their own gardens in France and Italy, concentrating on raising the two flowers most constantly used and most expensive orange blossoms and jasmine. Jasmine oil can fetch as high as eight hundred dollars a pound in the open market.

The flower essence and animal organs once obtained, Old Mother Nature is dismissed by him; from then on everything is made by Coty for himself, and alone. His organizations not only blend his perfumes, make his soaps, creams, etc., at the laboratories at Suresnes, but on the Île de Puteaux make all metal gadgetry such as powder and rouge cases, capsules, and other odds and ends which include nickelling, gilding, and printing. At Neuilly he manufactures his own boxes of leather and paper, and at Pantin and at Lilas cuts the Baccarat crystal for his grander bottles and runs six furnaces for mold-

ing his commoner phials of glass. When Coty can find a moment off from all these details, he occasionally founds his own banks for his own purposes, his energy interlocking money and industries in a fury of domineering organization and brilliant economic efficiency rarely seen in France. What Coty does not make for himself, he subsidizes others to make for him atomizers or other odd distractions for the toilet table. It is part of Coty's financial genius that he will pay no tribute; everything that touches upon the exploitation of his properties he finally gathers, willing or unwilling, into his own hands. Because of his vague connection with Napoleon, Coty, more specifically than most triumphant industrialists, probably sees himself as a Little Conqueror indeed.

It was doubtless this psychology, coupled with his Messiah-instinct for leading his fellow-men, that directed Coty toward politics, which he entered in 1923 as Senator-elect from Corsica. It was a brief venture, however, for after listening to reports of one Corsican electoral delegate who swore Coty's henchmen offered him "two thousand francs, which wouldn't buy a horse today, let alone a vote," and to another patriarch who, when offered a similar sum, regretted that he'd been honest for ninety years and found himself too old to change, the French Senate's High Commission decided that Coty's election had perhaps been a trifle

irregular. They turned their thumbs down. Coty lost his seat in the Senate without, indeed, ever having sat in it. A Bonaparte by blood, a perfumer by trade, this was his little Waterloo.

His subsequent retreat into journalism was admirable. Restrained from governing, he decided to guide. To this end he founded his famous *L'Ami du Peuple*, a paper written by capitalists to be read by the working classes and, to make sure of their reading it, offered at the cut-rate price of two sous. French thrift being what it is, all classes read it; the journal automatically gained an ascendancy which could be more ascendant only if it sold for one sou. Three years after its founding, *L'Ami du Peuple's* morning and evening editions combined have a circulation of almost a million. Its news is limited, its paid advertising small; its rivals swear it costs Coty millions of francs annually to run. However, the Big Five five-sous Parisian papers, among them *Le Matin*, *Le Journal*, and *Le Petit Parisien*, in their lawsuit apropos of the two-sous fight, were ordered by the court to pay him nearly two million francs' damages. At such a rate, *L'Ami du Peuple*, as a losing proposition, should make money.

The only regular contributions signed in it by Coty are a solemn series of Roman-numeralled belles-lettres against Bolshevism now high in their XXX's. Half of his

enemies say he couldn't have written them himself; the other half say no one else could. In local politics *L'Ami du Peuple* has been occasionally against the French payment of debts, against the British Labor Party lately, and against Lloyd George, the Bloc National, and Herriot forever. On the whole, the lofty ideals of prime ministers do not distract it; it keeps its eyes on the budget boys. So far as international treaties are concerned, the only scrap of paper Coty seems to believe in is a certified cheque. For the purely personal reasons of a mere millionaire, he rightly envisages the political peace of Europe as a public financial necessity and properly regards vulgar trade as a higher envoy than refined plenipotentiaries. It was probably more with a realist's eye on his and everyone's bank account than on the theoretic dove of peace that he was first among French industrialists to bury the hatchet with Germany after the war. As a big French businessman in the new American manner, Coty is, after twenty-five years of commerce, still greatly respected. As a journalist-politician and public mentor of briefer practice, he is still enormously enjoyed. In a government crisis he can always be relied upon to offer, not a solution, but a gesture which is magnificent, usually unacceptable, and which makes delicious reading as described fully in *L'Ami du Peuple* and, depending upon circumstances, a little more or less so in his two upper-class jour-

nals, *Figaro* and *Le Gaulois*. At the worst of France's fiscal crises he offered a loan of one hundred million francs, presumably to be applied to her war debt, the political conditions he imposed being such that he and Poincaré started a new war of their own and France's amortization was left where they had found it. Another time he offered to buy the gem-like Renaissance château of Chambord, which had once housed Charles X, and which he rhetorically promised the Beaux Arts would, under his care, house nothing more anachronistic than his strictly up-to-date perfume factory.

Harassed by falling cabinets and fallen francs, postwar politicians in France are a solemn lot. Against them Coty, with his bright ideas and Mediterranean blood, seems like a red-wigged character from the old Italian comedy one of those sympathetic and declamatory saltimbanques who from the top of a tight-rope offer marvellous cure-alls which have the high merit of relieving nothing but public tedium. Such humorists (even when they take their jokes seriously) are peculiarly useful to an impatient, critical people like the French, who, especially when troubled, would be under the necessity of inventing such persons, as Voltaire said of someone else, if they did not already exist. In a certain fashion, Coty has spared French ingenuity that necessity.

Francois Coty

This week in the magazine and here online, Chandler Burr writes about the creation of a new fragrance for the French company Hermès. In this piece from 1930, the New Yorker Paris correspondent Janet Flanner, under the name Hippolyta, profiles the perfumer François Coty.

François Coty, professional perfumer, politician, journalist, idealist, and millionaire, is a gentleman of mystery. Regiments of employees in uniform white smocks, all uniformly smelling sweetly, gather at his parent scent factory on the banks of the Seine near the Bois de Boulogne; hundreds more, dressed and smelling alike, troop to his newer filial establishment near the banks of the Hudson in western Manhattan. Hundreds of pressmen coöperate on the morning and evening editions of his new proletarian *Ami du Peuple* in the Rue de Bassano; a few hundred fewer at the *Rond-Point* work over old *Figaro*, which, being destined for aristocrats, takes less labor. Of these thousands of French and American citizens who

owe him their livelihood, few except those at the top of the tree have ever laid eyes on him. Those who have never tell what they have seen. He gives no interviews, they give no information.

In Paris, where he lives, little that is precise is known about him even when he says it himself. He says that he is related to Napoleon Bonaparte; it is known that his real name is Spoturno, that Coty is a *nom de plume* he signs to perfumes, as poets, with modesty, might sign their young verse. It is known that he recently bought the hunting pavilion of Luciennes near St. Germain-en-Laye, once the property of Madame duBarry; that he is building an enormous modern pile placed like a restaurant on a high road in the Bois and affording from its bedrooms a free sight of the horse-racing at Longchamp, in which he is not interested; and that he owns a mansion in the Avenue Raphael which he uses as a postal address. It is known, furthermore, that he does not, and likely will not, reside in any of these.

For Coty, as a man with views, takes his new Fascism and his more antique imperial descent both separately and seriously; in political life what he most fears is modern Bolshevism; in private life, old-fashioned assassination. He lives quietly in a hotel in the Champs-Élysées. He is not seen in public places, he dislikes congregations of all sorts. Though momentarily in favor of France's paying her war debt, when the American Debt Commission recently wished to descend upon his hotel, he threatened to pack up and leave rather than be surrounded by a crowd, even of industrial experts. Personal contact with the masses, so necessary to a man so determined to stamp out Communism, he establishes via his comforting curly-haired profile and his evangelist's message pasted on the boulevard billboards. Like a typographical vision, Coty appears to his followers only sidewise and in print. With that clannishness that marks the French *nouveaux riches*, the few friends to whom he appears in the flesh brag freely of the meetings but guardedly refrain from quoting

what, if anything, might have been said.

For Coty is powerful, hot-tempered, a watchful dreamer, creative, secretive, a man described as apt to make or break events with a "yes" or a "no," a man known to be red-haired and a Corsican. In consequence a vast, inexact, and fairly unfriendly legend hangs over him like a smoke screen which his enemies, among them the five greatest newspapers in Paris, have belched out to asphyxiate him, and in which, with superb psychology, he comfortably hides.

He was born in Ajaccio, Corsica, and in stature is one of those important little men in whom France has specialized since the rise of his relative, Napoleon. Two natural endowments are necessary to a fine perfumer good taste and an olfactory nerve suited to segregating not only kinds of odors but their qualities. Coty's gift for his career was an olfactory nerve, marvellously talented and acute. Its judgment, incidentally, was once unquestioningly accepted by a rival who was bringing suit. Though he began by exporting essences from the flower fields of Grasse on the Riviera, and can still be recalled later peddling his perfumes to the barbers of Paris, it was by way of his bottles that he really broke into the big perfume business of Europe. For his was the merchandising genius that perceived perfume as something in a lovely bottle, rather than as merely

something lovely in a bottle. Because of its Midi gardens and Bourbon courts, France had for generations made the world's perfume, but Coty changed its guise and its psychology.

Viewed by the older houses as an upstart in the business, he revolutionized it and then by presenting scent in modern dress and as a luxury necessary to everybody. (It had hitherto been presented, with conservative lack of appeal, only to people who could afford it.) Coty was the first to have bottles designed by the great ceramist, Lalique; first to utilize the new decorative trend toward color, metal, lines; the first, in a word, to make perfume appeal to the eye as well as the nose. Presenting it as a symbol of luxury, he shrewdly sent it to America, where it was clamored for as a sign of class by women of every class. His also was the first effort to aestheticize the humble talc in his famous orange-and-white L'Origan box which, along with the Standard Oil can, may still be found in remote outposts the world over pathetic signs of advancing civilization. His policy won eight million Frenchwomen alone to use his powder at the rate of sixteen million boxes a year, and changed the face of the cosmetic business.

Though ranking with Citroën as the outstanding Horatio Alger hero of modern selfmade French financiers, Coty has known downs as

well as ups in the twenty-five stormy years of his career. What could be bankruptcy for other men, however, he manages as a success, for he is a great organizer in whom great organizations believe.

His Rose Jacqueminot scent, a floral base perfume, was his first huge success; L'Origan, an animal odor, was the second and, in conjunction with Chypre, constitutes three-quarters of his sales today. In volume Coty is not the largest producer in Paris, but though his output is less than one or two others, he is better known. Four and a half million bottles of his Paris-made perfumes are annually sold in all of the countries of the world except Rumania, the British Isles, and the United States. Branch establishments, separately incorporated, are maintained in these three, and make and sell their own from materials supplied to them by the Parisian parent house. Racial female taste furnishes quaint statistics; for instance, American women like middling-passionate fantasy odors and no posy smells, whereas the chillier, land-loving British dames require only the chastest invented odors and pure garden bouquets. Blunt amber and heliotrope, most passionate of beast and blossom odors, intoxicate all the Spanish-speaking señoritas. Amber and rose in their rarest forms, considered by perfumers to be the peak of their art, please the French.

Manufacturing modern per-

fumes is a complicated, expensive, far-reaching job. As contribution to a bottle of scent they never see, foreign fishermen stroll oceans with a weather eye open for ambergris, that odd, floating bilious attack of the sperm whale; Chinese merchants wrangle in Tonkin over the spoils of the Tibetan musk ox; hunters trap the male civet. These three beasts form the main trio necessary to the making of most fine perfumes today, for they furnish the fatty fixatives which prevent the perfume itself from evaporating. Then alcohol must be added to the fixatives to preserve them from decay, and doubtless something must be done to the alcohol to preserve it from being drunk.

In any case, Coty's chemists, who are highly paid and sworn to secrecy, take at least a year to formulate a new odor, whose degree of perfection even then must be variable, since good perfume, like good wine, depends on the flavor of the year's crop. In Coty's New York warehouse are priceless bottles of flower essence of vintage seasons, being allowed to ripen as herbs ripen in the famous Chartreuse liqueur, and being rolled on their cribs as champagne is rolled to insure its primary purifying.

No one knows exactly the relation between Coty and his old associate, B. Levy, the head of the New York establishment. In Paris there was a rumor that Coty had sold his business here for an enormous sum,

but this was denied. The staff here still refers to M. Coty, on the rare occasions when he comes to New York, as hierarchal head of the house. It cannot be decided whether it was his or Levy's shrewd eye which shrewdly saw the desirability of avoiding the high tariff on bottled perfumes by importing raw essences, assembling them according to the French formula in New York, and thus endearing themselves to the American perfume-buying public by prices lower than some of their foreign competitors could stoop to. More than half the New York employees are, like the establishment's essential oils, also imported from France, including the half-dozen "smellers" whose delicate, important duty would correspond to that of tasters in a Chinese tea house.

Until recently, like all the other perfume manufacturers, Coty bought most of his floral essences near the vast flower fields of Grasse on the Riviera, where common attar of roses could cost one hundred and twenty dollars a pound. Three years ago the Coty interests started to develop their own gardens in France and Italy, concentrating on raising the two flowers most constantly used and most expensive orange blossoms and jasmine. Jasmine oil can fetch as high as eight hundred dollars a pound in the open market.

The flower essence and animal organs once obtained, Old Mother

Nature is dismissed by him; from then on everything is made by Coty for himself, and alone. His organizations not only blend his perfumes, make his soaps, creams, etc., at the laboratories at Suresnes, but on the Île de Puteaux make all metal gadgetry such as powder and rouge cases, capsules, and other odds and ends which include nickelling, gilding, and printing.

At Neuilly he manufactures his own boxes of leather and paper, and at Pantin and at Lilas cuts the Baccarat crystal for his grander bottles and runs six furnaces for molding his commoner phials of glass. When Coty can find a moment off from all these details, he occasionally founds his own banks for his own purposes, his energy interlocking money and industries in a fury of domineering organization and brilliant economic efficiency rarely seen in France. What Coty does not make for himself, he subsidizes others to make for him—atomizers or other odd distractions for the toilet table. It is part of Coty's financial genius that he will pay no tribute; everything that touches upon the exploitation of his properties he finally gathers, willing or unwilling, into his own hands. Because of his vague connection with Napoleon, Coty, more specifically than most triumphant industrialists, probably sees himself as a Little Conqueror indeed.

It was doubtless this psychology, coupled with his Messiah-

instinct for leading his fellow-men, that directed Coty toward politics, which he entered in 1923 as Senator-elect from Corsica. It was a brief venture, however, for after listening to reports of one Corsican electoral delegate who swore Coty's henchmen offered him "two thousand francs, which wouldn't buy a horse today, let alone a vote," and to another patriarch who, when offered a similar sum, regretted that he'd been honest for ninety years and found himself too old to change, the French Senate's High Commission decided that Coty's election had perhaps been a trifle irregular. They turned their thumbs down. Coty lost his seat in the Senate without, indeed, ever having sat in it. A Bonaparte by blood, a perfumer by trade, this was his little Waterloo.

His subsequent retreat into journalism was admirable. Restrained from governing, he decided to guide. To this end he founded his famous *L'Ami du Peuple*, a paper written by capitalists to be read by the working classes and, to make sure of their reading it, offered at the cut-rate price of two sous. French thrift being what it is, all classes read it; the journal automatically gained an ascendancy which could be more ascendant only if it sold for one sou.

Three years after its founding, *L'Ami du Peuple*'s morning and evening editions combined have a

circulation of almost a million. Its news is limited, its paid advertising small; its rivals swear it costs Coty millions of francs annually to run. However, the Big Five five-sous Parisian papers, among them *Le Matin*, *Le Journal*, and *Le Petit Parisien*, in their lawsuit apropos of the two-sous fight, were ordered by the court to pay him nearly two million francs' damages. At such a rate, *L'Ami du Peuple*, as a losing proposition, should make money.

The only regular contributions signed in it by Coty are a solemn series of Roman-numeralled belles-lettres against Bolshevism now high in their XXX's. Half of his enemies say he couldn't have written them himself; the other half say no one else could. In local politics *L'Ami du Peuple* has been occasionally against the French payment of debts, against the British Labor Party lately, and against Lloyd George, the Bloc National, and Herriot forever. On the whole, the lofty ideals of prime ministers do not distract it; it keeps its eyes on the budget boys. So far as international treaties are concerned, the only scrap of paper Coty seems to believe in is a certified cheque. For the purely personal reasons of a mere millionaire, he rightly envisages the political peace of Europe as a public financial necessity and properly regards vulgar trade as a higher envoy than refined plenipotentiaries. It was probably more with a realist's eye on his and everyone's bank account than on

the theoretic dove of peace that he was first among French industrialists to bury the hatchet with Germany after the war.

As a big French businessman in the new American manner, Coty is, after twenty-five years of commerce, still greatly respected. As a journalist-politician and public mentor of briefer practice, he is still enormously enjoyed. In a government crisis he can always be relied upon to offer, not a solution, but a gesture which is magnificent, usually unacceptable, and which makes delicious reading as described fully in *L'Ami du Peuple* and, depending upon circumstances, a little more or less so in his two upper-class journals, *Figaro* and *Le Gaulois*.

At the worst of France's fiscal crises he offered a loan of one hundred million francs, presumably to be applied to her war debt, the political conditions he imposed being such that he and Poincaré started a new war of their own and France's amortization was left where they had found it. Another time he offered to buy the gem-like Renaissance château of Chambord, which had once housed Charles X, and which he rhetorically promised the Beaux Arts would, under his care, house nothing more anachronistic than his strictly up-to-date perfume factory.

Harassed by falling cabinets and fallen francs, postwar politi-

cians in France are a solemn lot. Against them Coty, with his bright ideas and Mediterranean blood, seems like a red-wigged character from the old Italian comedy one of those sympathetic and declamatory saltimbanques who from the top of a tight-rope offer marvellous cure-alls which have the high merit of relieving nothing but public tedium. Such humorists (even when they take their jokes seriously) are peculiarly useful to an impatient, critical people like the French, who, especially when troubled, would be under the necessity of inventing such persons, as Voltaire said of someone else, if they did not already exist. In a certain fashion, Coty has spared French ingenuity that necessity.

Coty

LOUDER THAN ANY TENOR IN RIGOLETTO, PERFUMER FRANÇOIS COTY COMPLAINED LAST WEEK OF THE FICKLENESS OF WOMEN. Women had smiled upon his perfume business, built up his fortune until it reached nearly \$35,000,000 in the lush days of 1929, allowed him to buy newspapers, attempt to become Senator from Corsica.

The senatorial campaign was very expensive. Perfumer Coty lost partly because, misjudging the people he wished to represent, he dined publicly in Ajaccio with a Corsican bandit. In 1929 came the Wall Street crash and Publisher Coty's divorce. His two papers, the conservative Figaro and blatant Ami du Peuple, have lost money consistently. He lost more in subsidizing the unsuccessful Paris-Tokyo non-stop flight of Aviators Lebrix & Doret. The Coty perfume business has felt Depression. And last week the former Mme Coty obtained a court order forcing François Coty to pay her an additional \$5,200,000.

Mme Coty, so said her petition,

had been more than a wife to the perfumer. He borrowed money from her brother to set up his first laboratory. She had worked day & night in the laboratory in the early days so that the secret of his smells should not escape. Because there was no marriage contract stating the exact financial rights of the wife, Mme Coty claimed half of M. Coty's fortune at the time of her divorce. Last week Perfumer Coty bitterly protested that his business would not be able to stand the strain of obeying the court's order.

"I have already paid out more than \$20,000,000" said he, "and that during hard times. To be forced to pay out an other vast sum at one blow would be catastrophic."

François Coty

François Coty (1874 - 1934) was born in Ajaccio, near the Bonaparte family home (and allegedly he's a descendant). He is remembered in Ajaccio, by having the city's football stadium named after him!

He changed the more traditional spelling Coti to Coty (you can still find plenty of Cotis in the Corsican phone book) after his mother. Apparently, though, his real name was Spoturno.

He was recognised as one of the leading perfumiers between the two world wars and had the nickname 'the Napoleon of Perfume'. He was the first touse Lalique (I recently dug up one of his bottles in my vegetable patch!) and Baccarat for bottling his products.

He amassed an enormous fortune, installed many innovations in his châteaux, was a great philanthropist, but died alone and ruined in his château at Louvenciennes, near Paris.

Coty Made a Fortune in Business

The history of the man and his business are somewhat difficult to unravel, because he was such a secretive fellow, despite being a press baron at one point (owning among other titles, the Figaro).

Coty made his way to Paris at an early age and, noticing that all the fashion houses covered their floors with ostrich feathers, he proved himself as a salesman of these lavish floor ornaments.

However a pharmacist neighbour with whom he played 'piquet' told him one evening that he was unavailable, because he had to prepare his toilet water prescriptions;

Coty helped him and learned the method. His nose was good, both in the business and the olfactory senses. He saw the opportunity to make toilet water and present it in an artistic package. He was to say, "Give a woman the best product you can prepare, present it in a perfect flask of a simple elegance but irreproachable taste and sell it

at a reasonable price, and you will witness the birth of a big business traditional perfumery".

He was trained by the Grassois Antoine Chiris, learning about growing and harvesting flowers and the extraction of their scent. When he finished his training, he peddled his scents to the barbers of Paris.

In 1900 he married Yvonne Alexandrine Le Baron. He later upset traditional perfumery by composing perfumes which married natural essences with synthetic ones that came out of the Industrial Revolution. Born from this period are his la:

Rose Jacqueminot (1904),

l'Origan (1907),

Ambre Antique (1910),

Chypre 1917.

and with them, contemporary perfumery.

With a little money from his grandfather, François Coty set up his first business in the Rue de la Boétie in Paris. Within three years of his first opening, he was so successful that he moved his factory to the more fashionable Bois de Boulogne.

Working with Lalique to revolutionise the Perfume World

Coty revolutionised the sales of perfume by teaming up with René Lalique to present his product in beautiful bottles. "For his was the merchandising genius that perceived perfume as something in a lovely bottle, rather than as merely something lovely in a bottle."

So the story goes, he nearly hit his first bankruptcy soon after he started when sales were lukewarm, but then in a Paris department store a bottle of his first perfume, La Rose Jacqueminot fell to the floor and smashed. A lucky break!

The resulting scent captivated customers and the product sold 500 bottles within days due to the intoxicating and life-like smell of the rose perfume.

Coty had developed a range of synthetic-based fragrances and the technology to produce them in large quantities. He believed that his products should be as appealing "to the eye as much as the nose".

Previously, perfume had been

sold in pharmaceutical bottles but in 1908, Coty commissioned René Lalique not only to design the bottles, but also labels for his new range of fragrances. At the time Lalique was the world's undisputed master jeweler but he had never made glass vessels commercially.

Within a year of the first approach by Coty, Lalique had taken over a small glass works near Fontainebleau and began to produce perfume bottles, powder boxes and dressing table accessories.

Later, creating another fortune in the New World

Coty soon set up in New York (1904), with an associate B Levy, recognising the size of the potential market. Wanting to ensure faithfulness, more than half the US staff were sent over from France, like the essences. Buying initially from Grasse, he soon set up his own gardens in France and Italy, especially to produce orange blossom and jasmine, not least since even in 1930, jasmine oil fetched up to eight hundred dollars a pound in the US.

In 1921, Jean Despres was sent to the New York company, starting as a shipping clerk, but soon became a travelling salesman for perfumes and gift sets. Despres' career carried on long after Coty's death in 1934 and he became Executive Vice President in 1942, a position he held till 1968 when the company was taken over by Pfizer

Inc.

He too was an innovator, creating in-store displays and trained in-store merchandising staff to start the process that has resulted in the cosmetics counters of today's department stores. Branches were soon opened all over the world. Exports went from France, except to the US, UK and Romanian subsidiaries who set up their own manufacturing, using essences from Paris.

Also Using Wealth as Fuel for Political Ambition & Failing...

Corsica has not much recognised Coty, but perhaps this is because there was a cloud over his election as a senator in 1923; irregularities were suggested and he lost the seat before ever having taken it. It was perhaps this that encouraged his controlling nature to take up journalism, through ownership. He went from strength to strength in business, and in 1922 he bought the newspaper, *Le Figaro* and installed very right-wing views, although he'd been a radical socialist earlier in his life.

At the worst of France's post-war financial crises, Coty offered the state a hundred million franc loan, albeit with conditions. His fortune amassed from his perfume business enabled François Coty to indulge in the purchase of châteaux, although he lived out his reclusive life in a Paris hotel. One

he built for himself is the Château d'Artigny in the Indre valley. He bought the old one in 1912 and razed it to the ground. He dreamed of a chapel that rivalled the one at Versailles, as well as the latest and most luxurious fittings. The new eighteenth century-style pile took until 1929 to finish.

On his death in 1934, his creditors took possession of the Château, then it passed to the Navy Ministry, before the German soldiery were installed after the fall of France. But in 1942 it became an annexe of the Tours general hospital. Coty's daughter ultimately inherited it in 1947 and it was finally purchased by René Taversac who transformed it into a luxury hotel.

The hotel provides a home to the Association François Coty and each autumn, offers a workshop on perfume technology during which the hotel chef prepares meals made with ingredients typically used in perfumery rather than gastronomy!

Apart from this 'memorial', Artigny, he had rented the Château de Longchamps from the city of Paris in the 1920s and he also owned the Château Sainte Hélène in Nice, now a museum of naïve art.

In one Figaro editorial in 1927, Coty warned that "the new nationality legislation puts the whole French nation under a death sentence." In 1933, François Coty, an

admirer of Italian fascism, launched L'Ami du Peuple, an anti-semitic and pro-fascist newspaper and founded la Solidarité Française. L'Ami cost him a lot, since he sold it below cost, to further his ideas – and when the circulation rose, he reduced the selling price even further. The following year, with ten thousand members, the Solidarité Française movement tried to bring down democracy, with the cry of "A bas les voleurs!" (down with the robbers). It failed and he died the same year.

In 1923, he had attempted the organization of a fascist group called the "Blue-shirts." Coty advocated Italo-French amity, and the use of the idea of Latinity as a rallying cry for fascism. Coty's widow and ex-wife, then Yvonne Cotnaréanu, sold half the family holding in the Figaro to Jean Prouvost of the Lille woollen industry family in 1950. She sold the rest of her holdings in 1964 and Prouvost acquired them in 1970, with control finally passing to the Dassault group (aviation/armaments...) in 2004. The paper is now considered rightist/centrist in political terms/

And Dying in Poverty

He died in 1934, riddled with debt, but clearly he had managed to look after his family and the term poverty is relative, when you see the nature of the 'humble' abode of the man. He breathed his last at the

ornate Pavillion of Madame du Barry at Lovenciennes, just outside Paris.

This house had been given to Jeanne du Barry by the King, Louis XV, when she became his principal mistress. She ended her days at the guillotine during the French revolution. No doubt the Royalist connection was not lost on François Coty.

Now his Grandson is Returning to Coty's herbal roots...

Coty's grandson, Henri, has an ambition, at 80, to reinvigorate the production of aromatic plants for perfumery in Corsica. He has a project to set up a centre for the study of such plants at the University of Corsica and to establish a certificate for aromatic and medicinal plants studies. It is important to distinguish the difference between the use of essential oils in perfumery and aromatherapy. There is an Association François Coty (tel +33 4 95 22 52 93).

Henri recently visited Corsica with Steve Mormoris, the senior VP international marketing of Coty Inc, and Armand de Villoutreys, the head of Firmenich, the Geneva-based fragrance and flavour business.

They have conceived a plan to re-create four perfumes from the original range but with modern ingredients as near as possible to

the first Coty products.

Natural products; they met with Joseph Casanova who heads up the natural products group at the University's Vignola scientific centre. In pursuit of setting up a botanic garden near Ajaccio, the group also met with Corsican politicians, and discussed the idea of such a garden that could be open to the public to experience the herbal plants of Corsica.

If you want to read more about the use of Corsican aromatic plants, look at the Corsica Isula website on Corsican Essential Oils. There are many producers in Corsica. The picture of the citrus sinensis is by courtesy of Pierre Antoine Alessandri, who uses it to make the essential oil petit grain d'oranger a standard ingredient of eau de cologne.

There are already two nurseries that grow endemic aromatic plants and you can visit them both: one is the Figionis' Parc Naturel d'Olvane near Sartene and Stéphane Rogliano's Serres de Ferruccione near Porto Vecchio.

Now the world's largest perfume company is Corsican - by origin!

By a twist of business history, Corsican François Coty's company looks set to become the biggest fragrance group in the world! In May 2005, Unilever sold their perfumes business (Calvin Klein, Lagerfeld,

Vivienne Westwood, Chloe and others) to the (now) American beauty company, Coty, for \$800 million.

The Coty company is now the New York based Coty Inc, but springs from François Coty's firm originally established in Paris in 1904. It is ultimately owned by Joh A Benckiser GmbH of Ludwigshafen, Germany.

Bensicker acquired the Coty Beauty brands from Pfizer in 1992. The current Coty Inc was formed in 1996 on the acquisition of the Lancaster Group brands from Beecham of the UK.

The group also includes brands such as addidas, Davidoff, Celine Dion and Jennifer Lopez; it signed a new agreement with David and Victoria Beckham in 2005; it operates in over 25 countries and employs 6500 people. Sales in 2004 were \$1.95 billion; in the same year, the unilever brands' sales were \$600 million.

The group has two R&D Units (Monaco; Morris Plains, New Jersey, US) and five Production Units (Ashford, UK; Granollers, Spain; Chartres, France; Monaco; Sanford, North Carolina, US); with the Unilever acquisition, they will add a manufacturing and distribution centre in Mount Olive, New Jersey and a distribution centre in Lille

François Coty

If one were to enumerate perfumers who wielded great influence over the course of perfume history, François Coty is among them. A person of great talent and creativity, he gave the world fragrances that would serve as inspirations for many perfumers, despite the fact that he did not have formal perfumery training. Born in Ajaccio, Corsica in 1874, Coty realized that in order to expand the perfume market, the high quality product must be presented in beautiful packaging and at a reasonable price. While marketed as luxury, he deemed that perfume had to be affordable for people of every socio-economic class. While *La Rose Jacqueminot* (1904) was his first fragrance, incorporating new floral bases, *L'Origan* (1905) and *Chypre* (1917) would initiate two new genres of perfumery: soft sweet floral and chypre.

L'Origan (1905) cannot be mistaken for anything but a child of its times. Its soft powdery veil embellished with carnation, violet and heliotrope calls to mind gloves and Edwardian silhouettes. A precursor

of *Guerlain L'Heure Bleue* (1912), *L'Origan* reveals the same bitter-sweet anisic top notes that sparkle like diamond dust in its powdery cloud.

The voluptuous richness of the sweet floral heart underscored by the woody spiciness of clove flows into the sensual darkness of the musky base. Like honey dissolving in hot tea, orange blossom and jasmine lose their radiant form amid the vanillic sweetness of coumarin and the leathery duskiness of musk.

While the first decade of the twentieth century saw the introduction of numerous new aroma-chemicals to the perfumer's palette as well as the readymade floral bases, perfumers were cautious in using them, given their strong and aggressive odour profiles. However, Coty saw great potential in the new materials. The originality of *L'Origan* indeed resides in its combination of traditional essences such as bergamot, orange, neroli and ylang ylang with new floral bases and synthetics such as methyl ionone, heliotropin, vanillin,

coumarin, civet, vetiveryl acetate, and nitromusks.*

Neither floral nor oriental, *L'Origan* can claim fragrances like *Oscar de la Renta* (1976), *Vanderbuilt* (1981), *Poison* (1985), and *Cacharel Loulou* (1987) as its offspring. Playing upon the sweet floral theme, it is a fragrance marked by time, especially in the context of modern trends. Yet, the legendary status notwithstanding, the composition is not without appeal, especially if one enjoys rich powdery compositions.

Coty fifth avenue L'Origan is still available quite inexpensively at various discount stores such as *Perfumebay*, however the modern composition does not compare to the vintage. While still transporting one to another era, the vistas it displays are somewhat blanded. It seems to lack both the rich powdery sillage of the vintage version and its dark musky sensuality. Nevertheless, in its pale folds, there lies a whisper of *L'Origan's* past glory.

Coty himself turned toward politics in 1920s, entering the arena as French Senator-elect from Corsica in 1923. However, the bid was short-lived, as his election was deemed to be marked by fraud and the results nullified. The next unfortunate venture was the founding of L'Ami du Peuple, a newspaper that suffered one loss after another. In addition, the burden of an expensive divorce caused Coty's empire to slowly crumble. Yet, whenever I take out my bottles of the Coty classics like Chypre and L'Origan, I cannot but wonder at the genius of the man who created them.

History

In 1904, François Spoturno moved to Paris, took the name Coty and launched his perfume business. François Coty was not only a professional perfumer, but also a politician, journalist, idealist, and millionaire, and to some considered a gentleman of mystery. Coty was one of the first perfumers to understand the importance of fragrance packaging and a beautiful bottle, and his business grew until he was one of the wealthiest men in France. He died in 1934.

Coty Perfume History Highlights

1904 François Coty launches his first perfume La Rose Jacqueminot its famous bottle is designed by Baccarat and acquires a veritable status as a work of art.

1905 Coty develops two masterpiece fragrances L'Origan and Ambre Antique – these legendary fragrances are among the first to combine natural and synthetic ingredients and would soon become archetypes of contemporary perfumery.

1912 Coty launches L'Or, a floral scent designed to blend with the smell of blond tobacco

1917 Coty creates his greatest fragrance masterpiece, Chypre. This seminal fragrance would lend its name to an entire fragrance family, an industry first and a future industry benchmark.

1922 Coty's new fragrance, Paris, becomes a bestseller in both British and American markets. Its release marks the first of 15 Coty fragrances introduced during the Roaring 20s.

1947 As Lancaster introduces its nascent skin care line which includes the bestseller Crème Embryonnaire, a new approach to anti-ageing begins.

1970 The Principality of Monaco appoints Lancaster "Patented Purveyor to her Serene Highness Princess Grace of Monaco"

1970s – Present time - Sun care products, simulated tanning products, breakthrough skin therapy products and hair care products are created by Coty scientists

Le Muguet

Le Muguet (1910) was one of Coty's early fragrances, created by the master himself while his business was on the rise.

Today we might describe Muguet as "simple" and "pleasant" but in its day, its clean simplicity helped set it apart from the competition. Even today an older bottle of Muguet is a great find, not just as a "collector item" but as a to-be-used perfume.

Compared to today's multiplicity of short lived fragrances, Muguet had a long lifespan. Fifteen years after it had joined the Coty family of fragrances, Coty was still spending major dollars to advertise it. His line being that it was "for the woman of sunny, joyous type." Indeed, its light green coloring suggests just that.

In 1942, eight years after François Coty's death, the company's new perfumer, Henri Robert, extended the muguet concept to create Muguet de Bois, a fragrance that is much better known today than Coty's original.

Muguet perfume by Coty, shown with its box

Box and bottle of Muguet perfume by Coty. The design was inspired by Rene Lalique. Note the decorative work of the glass stopper.

Early bottles for Coty's fragrances were designed by Rene Lalique. When Coty ended his exclusive relationship with Lalique, he continued to use Lalique's designs, or designs quite similar to what Lalique had given him. Lalique's influence can be seen on this bottle of Muguet, particularly in the glass stopper. The same bottle, used for a number of Coty fragrances, and was produced in several different sizes.

The seemingly abstract design of the box at the left, like many Coty boxes, conceals that name "Coty" within its design, although you may have difficulty finding it!

Mother's Day Gift

When I asked my mother what she wanted for Mother's Day awhile

back, she surprised me when she asked for Coty's Muguet des Bois because I thought that she still wore Guy Laroche's Fidji and Muguet des Bois was unknown to me. It took me awhile to find it. Luckily a department store SA suggested I try a drugstore and there it was... at an unbelievable price. I bought it for her for several years until I was told that Yardley had licensed the fragrance and the name had changed to Lily of the Valley. One particular year I simply couldn't find it and when I called the head office in Ontario to locate their products, they offered to send my mother free-of-charge the cologne spray, the scented soaps and the talc powder. It was such a wonderful, generous act. I'll never forget it.

The original Muguet des Bois was launched by François Coty in 1936 or 1942 depending on your source. It's a very green, somewhat jarring lily of the valley but it impressed the great Edmond Roudnitska enough to comment on it...

"I remembered that Coty had a lily

that was called Muguet des Bois. No better lily note was ever made. It pushed the green note of the flower. As a lily note, it was magnificent. It was much better than the one I had made myself. I wondered how they had managed to create such a masterpiece in the Thirties, with so little means. But it never became very successful, because it wasn't a perfume one could wear. So when I made my lily, I told myself that I should not fall into the same trap. I had to make it into a perfume."

The current fragrance isn't round like Roudnitska's take on lily of the valley, Diorissimo, nor as beautiful. LotV is more angular and a little difficult to wear. Dosage is a factor and where you spray it might also be a dealbreaker for you. I would avoid spraying it too close to the face. I think it's fun to wear but it isn't a shrinking violet and it's a little loud. Whether the original Muguet des Bois was wearable or not.. I don't know... but the current Lily of the Valley by Yardley IS wearable and quite good considering its price. A librarian friend of mine, Mariouche, wears it and when we kiss hello it smells wonderful on her. It wakes up your senses... it simply smells like spring. Just go easy on the atomizer.

François Coty

François Coty was not a child prodigy. François Coty was not an overnight success. Yet from the moment in 1904 of his great perfume marketing breakthrough as a 29 year old married man his rise to extraordinary wealth came "overnight" thanks to his business insights, hard work, and amazing tenacity.

Coty wanted success on a level the world has rarely seen and he achieved it. But the first twenty-nine years of his life were sprinkled with frustration and only modest success.

At the age of 29, there was nothing yet in Coty's curriculum vitae that would suggest he was about to become by his own efforts one of the richest men on the planet.

Birth, Childhood, School

François Coty was born "Joseph Marie François Spoturno", in Ajaccio, Corsica, on May 3, 1874 to Marie and Jean-Baptiste Spoturno. His mother's maiden name was "Coti" with an "i".

Coty's parents appear to have been respectable, middle-class people of no particular wealth or distinction. Later in life, Coty established a family relationship to Napoleon Bonaparte and discovered a relative who had been awarded, by Napoleon, a title and coat of arms. None of this had brought the family any money.

His mother died when he was four years old; his father died three years later. Coty was turned over to his grandmother and great grandmother.

The women attempted to provide Coty with an education but, in the days before universal public schooling, they found themselves, after several years, no longer able to keep up payments to the school and Coty's formal schooling came to an end. Coty now moved on to Marseilles, to seek his fortune.

It is likely that Coty had some family connection in Marseilles that could help him find lodging and employment or apprenticeship. There is no suggestion that was

ever a street urchin. We do know two things about his days in Marseilles. First, he worked as a salesman; second, he did military service, although this may have simply been as a "weekend warrior." Both of these endeavors were helpful in preparing him for his future.

Coty The Salesman

There has been a good deal of speculation and romancing of Coty's life as a salesman in Marseilles. We do know that he worked for a haberdasher selling women's products linen, lace, ribbons, findings. It appears that Coty became skilled at selling to women. It is said that he also developed "taste", how to judge goods and show merchandise to its best advantage. He also, it is said, learned a good deal about what women want and their the hidden desires that could help close a sale.

Coty The Military Man

During these early years, Coty also did some sort of military service.

The French officer corps was generally made up of the social elite. Coty's commander, Emmanuel Arène, was no exception.

Emmanuel Arène, like Coty, was a Corsican. What Coty may not have known during his period of military service was that Arène had "connections." What Arène knew about Coty was that he was bright, ambitious young man, and looking for a way to make his mark.

Coty received Arène's invitation to look his commander up in Paris, should Coty ever move there.

Coty Moves To Paris

In 1900, at the age of 25, Coty did move to Paris. And, as his former military commander had promised, the door to his house was open to Coty.

Interior of the Grands Magazins du Louvres

Interior of the Grands Magasins du Louvres, where Coty filled the air with 'La Rose Jacqueminot' ... by smashing a bottle on the counter!

While Coty was a newcomer to Paris, his mentor, Emmanuel Arène, was able to get him off to a good start. Arène was something of a celebrity he wrote fashionable plays, he was a member of the Académie Française, and he was a senator with some influence in the government. Apparently Arène's deal with talented young men in

Coty's position was to take them on as unpaid secretaries, feed them and give them calling cards that, as "parliamentary attaches", would open doors for them in Parisian society. It was then up to these men themselves to find their financial fortunes, although Arène was known to make loans to worthy candidates.

Armed with his new credentials, Coty began to mingle, and search for paid employment.

In Paris Coty soon found inspiration, employment and a wife.

Employment was gained once again as a salesman, going door to door to shops selling goods for women. The line now was fashion accessories. Through this occupation, Coty met Yvonne le Baron, a milliner who would become his wife. They were married in 1900, the same year Coty arrived in Paris.

1900 for Paris was the year of the great World's Fair. Perfumers were out in force. It is assumed that Coty took some notice of them, being involved in selling to women. It is also believed that he was more impressed with certain antique bottles than he was by the bottles being used by the major perfume houses.

Coty Plays The Right Card

Coty and Yvonne had social evenings. One of their entertainments was to play cards with Raymond Goery and his wife.

Goery was a pharmacist who also made and sold an eau de Cologne. On days when he could not complete his compounding work during the day, Goery continued to work in his laboratory in the evening. Coty joined him.

Houbigant flask of unknown fragrance, probably quite similar to the Bacarrat flasks initially used by Coty.

The story is that Coty made inquiries to Goery about eau de Cologne a product which he had no doubt encountered on his sales calls. Goery showed him how it was done. Coty's nose told him Goery's cologne wasn't the greatest. Coty suggested that he might be able to make a better fragrance. Goery gave him the opportunity and, swallowing his pride, Goery acknowledged that Coty's good instincts. Coty might, Goery opined, be gifted.

Then, as the two discussed Coty's future, Goery told Coty that, to become a perfumer, he would have to go to Grasse to study perfumery. Coty took the advice.

Coty in Grasse

Grasse, in 1900, was the industrial center of French and international perfumery. The flowers from which perfume was made grew in the hills around Grasse. The equipment needed to process this harvest was located in Grasse. Moreover, the

perfumery wizards of Grasse were beginning to look into the new synthetic aroma materials products of chemistry that were beginning to find their way into "modern" perfumes being introduced by Houbigant, Guerlain, Roger & Gallet, and L.T. Piver.

In Grasse, Coty made a connection with the House of Chiris. Founded in 1768 by the De Chiris family, Chiris was among the largest and most prosperous of the Grasse perfumeries. Its products were shipped worldwide. Today it is a division of Cargill.

Although no longer young and not intending to becoming employed as a Chiris perfumer, Coty was allowed to take perfumery training with Chiris. This proved to be a good move for both Coty and for Chiris for, in time, Coty would give Chiris some of the largest orders they had ever seen.

Coty spent less than a year studying perfumery in Grasse. By all accounts, he was a highly motivated student but one year of study is considered far too little to become a perfumer. Yet after a single year Coty returned to Paris, ready in his mind, anyway to take on the world. The world was not yet ready for Coty.

Coty Becomes "Coty"

Although we have been referring to François Coty as "Coty," in fact his

name at this point was still "Spoturno". It is suggested that his assumed name "Coty" resulted from a consultation with his mentor, Emmanuel Arène. Coty sounded Arène out about his possibilities for launching his own perfume company. Arène, it is said, asked what name he planned to use and Coty replied that he would use his own name, "Spoturno". Arène told him the business would fail. (Too "Corsican" Arène knew how Parisians thought!)

Coty, it is said, then suggested that he might use his mother's family name, "Coti". Arène now indicated that, while it was an improvement, a name ending with "i" was not a good idea. (Even today, a name ending with "i" is considered Italian, not French, and Italians are sometimes referred to, disparagingly, as "I-ties".)

But if the "i" were to become a "y" Thus named, Arène predicted that the new Mister COTY was destined for greatness.

(After Coty's death, his South American sales manager, in starting his own perfume company, went through a similar naming process and, after a few permutations, came up with the made up but very French sounding name, "Lancôme").

Coty, Perfume Salesman

We don't know anything about the

earliest of the Coty perfumes. We don't even know whether they sold or not. We do know that, on his return from Grasse, Coty was making the rounds of the barbers of Paris, attempting to sell floral fragrances (probably) similar to those made by his friend Raymond Goery.

Gorey had packaged his eau de Cologne in medicine bottles and wrapped them in oil proof paper, much as a butcher wraps a fresh cut of meat. Coty, the salesman, began to decorate his bottles with trimmings made with the assistance of his wife.

At this point Coty had no known financial backing. He needed to turn his fragrances into cash and, probably, at the beginning, did exactly what others were doing, hoping that his nose for a good scent would help distinguish his product. Coty's nights were now being spent in his home laboratory, mixing, weighting, testing, smelling, experimenting trying to unlock the secrets of a scent that would resound with women. It almost didn't happen.

1904 La Rose Jacqueminot

Although we knew nothing about Coty's first efforts as a perfumer except, perhaps, that Emmanuel Arène a man of taste and insight appears to have believed that Coty's products were credible and that Coty might become a success. At

this point, his failure to achieve success with his fragrances was likely the result of intense competition and that fact that he was in the perfume world a complete unknown.

In the years when Coty was trying to break the ice with his perfume 1902 to 1904 buyers had absolutely no need for his product. France already had over 300 companies, large and small, creating and selling perfume. Some had been in business for over 100 years. Several had established connections as suppliers to various royal courts around Europe. Some were so famous that their names alone could make sales. Coty? Who was he? Where had he come from? What did he have to offer?

Coty had learned to charm women but the buyers for the important stores were all men.

Grands Magasins du Louvres, site of Coty's first sales triumph with 'La Rose Jacqueminot'.

In 1904 Coty had a fragrance he called "La Rose Jacqueminot" (the name refers to the *rosa centifolia*). His target market was no longer the smaller shops but, this time, the retailing giants of Paris the large, prestigious department stores. For their part however, the buyers for these elite stores were unimpressed by Coty and showed no interest in his perfume. Suddenly that all changed.

One day Coty had been attempting to demonstrate "La Rose Jacqueminot" to a buyer for the Grands Magasins du Louvres. The buyer, it is said, showed Coty the door without giving Coty a chance to open his bottle and demonstrate his perfume. Coty, either in a fit of absolute frustration or in a well planned sales promotion smashed the bottle of "La Rose Jacqueminot" on the counter (or perhaps the floor Baccarat bottles don't break that easily!) The store was immediately filled with the aroma of Coty's new perfume and the rest is history.

Women now rushed to Coty's side. Did he have more? Where could they buy a bottle? What was this wonderful new fragrance?

The store reconsidered. A messenger was sent to Coty's address with an order for twelve bottles 12 bottles! for delivery next day. Coty's success rocket had just been ignited.

François Coty

François Coty (born Joseph Marie François Spoturno; 3 May 1874, Ajaccio, Corsica – 25 July 1934, Louveciennes) was a French perfume manufacturer and the founder of the fascist league Solidarité Française, a paramilitary organization founded in 1933, during Edouard Daladier's government supported by the Cartel des gauches (Left-Wings' Coalition).

Life

He married Yvonne Alexandrine Le Baron in 1900, and took the more French-looking name Coty, a variation on his mother's maiden name, when he moved to Paris.

He began by selling essences derived from flowers in Grasse, and then peddled his scents to the barbers of Paris. His genius, however, was in marketing and in recognizing that the bottle made the perfume. He had bottles designed by the great ceramist René Lalique. His first great successes were his Rose Jacqueminot scent, in a bottle by Baccarat, in 1904 and L'Origan

in 1905. One of Coty's greatest success, Chypre (1917), gave its name to an entire fragrance family used in the industry's classifications.

He was one of the wealthiest men in France and owned two Paris newspapers, the working class L'Ami du peuple and the aristocratic Le Figaro. He also bought the hunting pavilion of Louveciennes near Saint-Germain-en-Laye, once the property of Madame du Barry. He built multiple large residences, but lived in a hotel on the Champs-Élysées.

Coty was something of a recluse, disliking crowds of any kind, and hiding behind his public image. The company he founded in 1904 is now Coty, Inc., based in New York City.

The movement he founded drew on the previous Coty-backed far-right leagues the Faisceau and the Croix-de-Feu World War I veterans organization. While Marcel Bucard's Francisme imitated Fascism and Benito Mussolini, Solidarité Française looked more

towards the Nazi party and Adolf Hitler. On July 1, 1933, François Coty was found guilty in court for libel against Jewish war veterans' groups in France. Never anything but marginal, the group peaked during the February 6, 1934 rally in front of the Palais Bourbon, when it attempted, in alliance with other far right leagues, to topple the Third Republic (Coty had the ambition of having it replaced with a monarchy). The group was outlawed in 1936, through a decision taken by the Popular Front government.

Chypre

One of the ground breaking moments in the history of Perfume was Francois Coty's creation of "Chypre". This was a perfume that broke the mould and left in its wake an entire genre.

Francois Coty was born in Corsica and moved to Paris in 1900 when just 25. With a mission to reinvent the perfume industry Coty's first perfume went on sale in 1904. His strategy was simple:- make it look luxurious, make it smell luxurious, sell it at a price that every woman will want to afford.

Coty was one of the first to use custom made bottles from the finest quality glass makers, designed by the likes of Baccarat Glassworks and the jeweller Rene Lalique. Yet he priced his creations for a volume market and industrialised his production. Bravely he stepped away from single flower fragrances and introduced synthesised aromas into his perfumes.

Chypre (pronounced sheep-ruh), the French name for the island of Cyprus, was created in 1917 - it is

sadly no longer in production withdrawn in 80's. It was revolutionary in its complexity and formulation combining an oakmoss and patchouli base with floral heart notes dominated by jasmine and rose and a sharp top of bergamot and green herbals.

The Mediterranean influence of Cyprus is there, but this was a scent that challenged, enhanced by Coty's clever use of synthetics, such as amber, to enhance and pique the natural aromas. Rich, tenacious, elegant, classical, enticing, devastatingly beautiful, the evocation was one of feeling like a Greek goddess.

Chypre sold and sold and helped make Coty's fortune. And his goddesses worshipped him.

The Chypre's

Fragrances in the chypre fragrance family remind me why I love perfume in general. Granted, the topic of chypre could fill a whole book, I offer some tidbits to incite curiosity to explore this great family further. I also offer a selection of favorite chypres, from classical and modern, as well as some advice to those new to exploring this family.

Olfactively, the classical chypre is defined as a combination of five notes citrus (often bergamot), floral (classically, rose or jasmine), woody (often patchouli), oakmoss, amber and/or musk. Much like the variegated olfactory facets that are combined to create a chypre fragrance, the emotional effects of chypres are complex. The past few years have seen the revival of the family, which is in many ways due to its memorable character and unique signature. When the market is inundated with more than 700 new launches, the ability to stand out is important. At the same time, fragrance companies are afraid that too strong of a character will be a deterrent. Chypre fragrances are often able to strike the middle

ground in this respect, although without doubt, the best examples are the ones that do not compromise (see my selection of modern chypres below.) The unique combination of accords in chypre creates a sensual and mysterious effect, a play upon the warm/cool contrast of materials. Unlike the appealing crispness and freshness of many fruity florals or the familiar, mouth-watering effects of gourmands, chypre fragrances evoke a more abstract sensation. While classical chypres are often dark and rich, modern chypres based on experiments with various moss aroma materials and the new family of sheer ambers tend to have an interesting transparency paired with complexity and depth. Moreover, with fashion tending towards retro, it is not surprising that retro fragrance families are coming back. So where did chypre come from in the first place?

The biggest myth of chypre family is that it was created by François Coty when he launched his Chypre in 1917. In fact, chypre (the word is derived from the

French name for the island of Cyprus) was a blend of mossy and animalic raw materials common during the times of the Roman empire. Chypre as a name for an accord is often mentioned in 18th century perfume manuals. Guerlain had at least two very fine chypres, Chypre de Paris and Chypre, both pre-1917. Indeed, my bottle of Guerlain Chypre from the turn of the 20th century turned out to contain a potent mossy-leather blend with a natural musk note.

This being said, Coty has to be given credit for establishing chypre as a fragrance family. Coty took the classical idea and gave it well-defined structure and distinct form. The classical chypre as we know it today is largely due to Coty Chypre establishing the convention. Ironically, its novelty was the reason for its failure the rather startling, roughhewn beauty of Chypre mesmerizes, but it remains aggressive and unrelenting. Nevertheless, perfumers were intrigued. The genius of Jacques Guerlain the great perfumer heading the house that bears his name was to refine

the chypre. In creating Mitsouko, he softened the animalic impact of Coty's Chypre, infused it with the lush sweetness of ripe peaches, added a spicy touch and placed the heart against a backdrop of an ornate mossy-woody accord. I look forward to celebrating Mitsouko's 90th birthday next year; its impressive anniversary contrasting sharply with the short lives of many current launches.

Over the years, the family has evolved tremendously, and in fact, nowadays as long as the five elements of chypre are present in whatever guise (different citrus, different florals, moss synthetics and amber materials), a fragrance can technically be called a chypre. When I think of great chypres, Mitsouko, No 19 and Diorella immediately come to mind. Their elegance is tempered in a brilliant manner by sensuality. The bright, effervescent top notes belie the complex darkness of their hearts. As a result, the unexpected contrasts and the layering of sensations create a modern aesthetic, despite the fact that these fragrances were created in 1919, 1970, and 1972, respectively.

In my classical chypre hall of fame, I would also include Balmain Jolie Madame, Caron Tabac Blond, Chanel Cuir de Russie, Chanel Cristalle EDT, glorious Dior chypres such as Miss Dior and Diorama, Estée Lauder classics such as Azurée and Private

Collection, Guerlain Chant d'Arômes, Parfums Grès Cabochard, Robert Piguet Bandit, Rochas Femme, Hermès Calèche, Jean Couturier Coriandre, Sisley Eau du Soir and Paloma Picasso Mon Parfum. Some great recent examples of modern chypres include Chanel 31 rue Cambon, Sisley Soir de Lune, Acqua di Parma Iris Nobile Eau de Parfum, Serge Lutens Rose de Nuit, Hermès Parfum des Merveilles, Lanvin Rumeur, and Hermèsence Poivre Samarcande. The allure of a beautifully crafted chypre lies in its unpredictability, in its ability to tease senses and to spark imagination with its abstract form.

The classical chypres mentioned above exemplify the diversity of the family, but rather like full-bodied red wines, they can be a shock to a palate unaccustomed to them. If you are a chypre novice, I would recommend starting with the sheer and delicate takes such as Hermèsence Poivre Samarcande, Chanel 31 rue Cambon and The Different Company Bois d'Iris. They illustrate the fascinating qualities of chypres I described above, while allowing you to be seduced gently, stealthily. One thing I can promise is that this journey will be rewarding and delightful.

Gorgeous chypre artwork by perfumer and photographer Michel Roudnitska from Art et Parfum is a perfect illustration for the beautiful complexity of this family, whose

Noir Epices for Frédéric Malle is a gorgeous modern chypre with a nod to the classical heritage.

Chypre de Coty

On the arid island of Cyprus, the sun bakes the cistus plants that cling stubbornly to the dry, scrubby hills, the honeyed scent of their resin hanging in the air on windless days. Enfolded within these hills is a glade at the far end of a valley, green and overhung with willow and other riparian arbor. From the shaded rock wall emerges a clear, artesian spring, it's cool water dribbling down gray stone onto a bed of moss and loam before forming a small creek leading out. Sometimes at twilight, after the sun has moved below the ringing hills, the goddess Venus herself naps here, dreaming upon the moss, in preparation for a night of romantic inspiration.

I recently acquired a pristine sealed, full bottle of Chypre de Coty parfum extrait from the 1920s/30s. It bears a red wax seal on the top, which upon inspection with a magnifying glass reveals the tiny imprint of the Coty family Crest. After gently removing the clear, brittle, cellophane "onion skin" [sealing the neck & stopper] with a pair of tweezers, I furiously set about getting the frosted glass

stopper to budge, which proved very difficult: my fingers couldn't do it. Wearing rubber dish-washing gloves couldn't do it. Prying it gently upward with my teeth(!) couldn't do it. Finally, I accomplished it with a pair of pliers, and thank God no damage was inflicted.

Immediately upon application, a burst of sour citrus tickles the nose Mediterranean bergamot plucked languorously with Venus' own long delicate fingers at peak juiciness – before it quickly dissipates to reveal a classically animalic floral heart of civet-y jasmine, rose, and powdery iris. The bouquet is so delightfully old-fashioned and dirty that I'm surprised that ylang ylang isn't in the notes, as it does remind me a lot of Chanel No. 5 (vintage No. 5 especially; more on that later). Like the tangy bergamot top, the floral heart is a fleeting pleasure, bowing out gracefully in deference to the basenotes: the distinctive, woodily-sweet accord of jasmine, oakmoss, sandalwood, vetiver, iris, and amber (labdanum). A bare hint of the rubbery, "leather" note Isobutyl Quinoline is found in

the base, playing quietly at the edge of the sandbox, and so are the spicy, clove/carnation-y tones of Eugenol, invoking nothing so much as a whisper of vintage Tabac Blond, an oriental kissing cousin to Coty Chypre appearing on the scene only two years later. As in its close descendant Chanel No. 5, the jasmine note here is not of the tropical, lush, narcotic variety, but of the heftier type: the scent of jasmine absolute after its sweet fruity top-notes have faded away, leaving behind a rich, full-bodied robustness within the composition, in addition to softening the rough edges of the other notes and melding them into a characteristic accord.

One often hears Coty Chypre spoken of in connection with Guerlain's Mitsouko, that Mitsouko is "Coty Chypre with the peach note added." Well, there may be some truth in this. The original Coty Chypre could certainly be the bones of the world's beloved Mitsy. Although there is a similar suggestion of dried, dusty roses in the far drydown of Chypre, it is

Mitsouko's upping the ante of rose in the formulation, and its famous overdose of the Peach C-14 Aldehyde, that ultimately made it, rather than Coty Chypre, the more memorable chypre for future generations.

What else can I say about the original version of the most celebrated chypre fragrance? Was it all I that I thought it would be? Not really. Was it a let down? Well...some-what. I did not find what I expected to find here. I was prepared for a fragrance that was redolent of a damp forest floor, but that is not what I smell. And where is the palpable honeyed, resinous labdanum in this somewhat non-descript vetiver-woody base? Where is the Mediterranean in here?? Coty Chypre has been mythologized for nearly a century as a perfect evocation of a Venusian grotto in a Cyprus glade, where cool waters cascade onto a shaded bed of fluffy green moss...Well, I hate that I don't get that. I've waited so long, and come so far in my perfume journey, with the original Coty Chypre always seen as its culmination. And only to feel underwhelmed. Sigh... I can now understand what perfume reviewer Denyse Beaulieu meant when she wrote of Chypre de Coty on Perfume Shrine: "When you bow your head through time to inhale her essences, it is her daughters you seek."

On a more historical and practical

note, one must remember that, in smelling fragrances from such an early time period, one is touching upon the very foundation stone of modern perfumery. Aromatic materials were far more limited and primitively produced at that early time than they were just a decade later. Francois Coty, in a time when most perfumers were wary of using the new proprietary bases and absolutes, fearlessly utilized these new materials and composed fragrances such as the seminal floriental, L'Origan, and the celebrated Chypre de Coty, both of which were widely copied and have spawned innumerable children, from Mitsouko to Bandit to Caleche to Yvresse [in the case of Coty Chypre].

In experiencing the original Chypre de Coty, there are two things in particular that stand out to me. The first is just how little resemblance Chypre de Coty bears to her classic chypre descendants of mid-century and onward. Aside from her conspicuous bergamot top note, there is nothing really about the scent that brings to mind the famous chypres of future decades. This is primarily due to the increasing complexity of fragrances as a greater diversity of materials became available, as well as ever increasing knowledge of how to construct an excellent, pyramidal perfume.

The second thing is just how similar, if not identical, the basenotes

are in fragrances that came on the heels of Chypre de Coty: Crepe de Chine by Millot, Chypre de Millot, Chanel No. 5...they all are built upon the same jasmine/oak moss/vetiver/woody base accord contained in Chypre de Coty. Whether or not this distinctive and widely disseminated basenote accord was first inaugurated by Chypre de Coty, or whether Coty, like others after him, merely used a basenote accord already common at the time, I simply don't know because I haven't smelled many fragrances earlier than Coty Chypre from this period. The limited diversity of raw materials in the first quarter of the 20th Century meant it was inevitable that these early masterpieces would bear some uncanny similarities to each other. And as I mentioned, there are moments that I catch the ghost of its equally famous cousin, vintage le Tabac Blond. This was, it seems, a highly incestuous time for perfumes.

Having been discontinued in the 1960s, Coty Chypre was re-released a couple decades later, along with the other early Coty fragrances Les Muses and La Rose Jacqueminot. According to Michael Edwards, these reissues were done in 1986. Its gold metal cap, earthy green label, and sparkling yellow-green juice makes a statement of quality. The gold suggests a highly prized, rare elixir of life, while the green hints at the verdant, vegetal, chypricity of the essence.

In reading reviews of Coty Chypre, one often finds dissimilar and even conflicting descriptions. This is due in large part to the fact that people are reviewing two different fragrances: either the original 1917 Chypre de Coty or the later '80s re-interpretation (and make no mistake, it is not merely a "reformulation" but rather a completely separate fragrance). This late reissue with gold cap bears no relation to the original Coty Chypre, save for a vague citrus top note. The reissue smells of jasminey florals that are sweeter & fresher rather than dirty, and there is a fairly loamy base that is decidedly more of what a lover of classic chypres would expect. Fascinatingly, hours after application, the most stunning, buttered labdanum note emerges, prompting me to nuzzle my wrist until I rein in my rapturous emotions, stopping myself just before I begin to actually lick my lower arm & strip down to my skivvies in preparation for a night of perfume passion.

This '80s reissue of Coty Chypre is a simple interpretation of everything that one would expect a fresh, classic chypre to be, with no jagged edges or discordant notes to be found. It is, in a word, gorgeous, if not a tad boring for those who want more bells and whistles (I am not one of the latter, I love the stuff). It must be stated that this later re-interpretation is not the scent that influenced Mitsouko that would be the early Chypre parfum, to which this late version bears no real

resemblance. This newer version reminds me of a cross between Rochas Mystere and Parure by Guerlain at other times of "Y" de YSL, and at other times still of Vivage by Avon. It is an encapsulation of what one expected of a classic chypre at the time of its release...just as the original Coty Chypre was an interpretation of chypre – of Cyprus – utilizing all the materials that were available at the close of the distant age known as the Belle Epoque.

Women's Fragrance's

The love for ladies perfumes is translated to their robust affect in the perfume industry. Thanks to the fragrance classification created by Michael Edwards, women can now easily relate and discover more scents. In defining every class of perfume based on the natural origins of the fragrances, selecting from among the many ever rising number of excellent designer fragrances have turn out to be easier.

Michael Edwards is without doubt one of the world's leading authorities in fragrances. Famously generally known as a "aromatic gypsy", he has been associated with quite a few elite fragrance homes, perfumers and suppliers, which enabled him to devise a system that practically served everybody's map in direction of finding the perfect among the Ladies Perfumes to suit personal preferences. His comprehensive references in the fragrance business is summarized in his fragrance classification scheme, which groups a complete of 2,300 gents's and women perfumes in 4 olfactive households; fresh, floral, oriental and woody.

Each olfactive group has their sub-categories. The recent fragrance family is grouped into citrus, inexperienced and water. Citrus scents (hesperide), the oldest fragrance family, are sourced from the pure essences of aromatic citruses equivalent to mandarins, lemon, bergamot, grapefruit and oranges. The inexperienced fragrance offers you the attention-grabbing sharp mix of fresh-minimize grass and violet leaves, providing you with a refreshing imagery of the outdoors. The water fragrances are harking back to the gentle sea breeze, the aroma of the moist air combined with livening floral, woody and oriental fragrances are classic decisions for this group.

The floral fragrances give you the most popular among the perfume family. Capturing the potently sensual essences of floral notes, this group gives you a symphony of heavenly scents. Perfumers benefit from the avalanche of thrilling new floral notes, which created extra options for this sinful treat. In efficiently cloning the scent of recent blooms, tender florals (fleuri alde-

hyde) established another group of fragrance that featured extra delicate floral scent selections.

For extra sensual selections, the oriental fragrance family gives you the floral oriental, gentle oriental and oriental scent selections. The floral oriental group gives you a feisty combination of scents that range from candy spices to spicy orange floral notes. Its fruit interpretations gave beginning to more recent designer women perfumes. Tender orientals give extra sensual overtones in comparison with different fragrances. For oriental selections, a mélange of exotic perfumery with heavy and sensual oriental scents like candy vanilla and musks.

Lastly, the woody selection provides you the scents of woody oriental, mossy woods and dry woods collections, which is in style amongst designer fragrances. Woody orientals give you a fine stability of deep wood notes utilizing the potent scents of floral orientals, spices with sandalwood and patchouli notes. Mossy woods offer

you mossy woody fragrances which principally are celebrated in the fragrances created by Francois Coty in 1917 (Chypre de Coty). The dry woods family, which is harking back to the after dry smoky scent of Russian leather, celebrates the deep and almost animalistic fragrance notes of florals, orientals and wood.

The duty of selecting the best women perfumes is meant to be a pleasure, not an ordeal. With the growing variety of fragrances and designer perfumes created each year, one can easily get overwhelmed in visualizing an olfactory universe. Because of Michael Edwards' rare passion for scents, a fragrance classification scheme has been created to allow every scent to communicate effectively with everyone's personal tastes.

Coty

Joseph Marie François SPO-
TURNO dit François Coty est un
industriel et homme politique corse
mais aussi artiste, industriel, tech-
nicien, économiste, financier, soci-
ologue selon sa carte de visite. Il est
né à Ajaccio le 3 mai 1874 et mort
à Louveciennes le 25 juillet 1934.

Francois Coty

Il est un créateur qui révolutionna
le monde des parfums et des cos-
métiques au XXème siècle. Mais
curieusement, après avoir fait for-
tune puis avoir tout perdu, ce génial
autodidacte ne laisse aujourd'hui
que des parfums introuvables qui
ont fait rêver nos grands-mères.

Descendant lointain de Bonaparte,
François Coty est né dans le même
quartier d'Ajaccio que l'empereur.

Orphelin très jeune, François Coty
est élevé modestement par ses
grands-mères.

A la conquête du continent il
franchira la mer et débarquera à
Marseille en quête d'embauche à
l'âge de 13 ans et devient étudiant

en médecine.

Il trouve un premier emploi chez un
marchand de tissus avec un salaire
de trente francs par mois. Mais il a
de l'ambition et sait qu'il lui faut
rapidement monter à Paris.

Il arrive dans la capitale pour visiter
l'exposition universelle et tenter sa
chance. Il continue de vendre des
rubans et autres fantaisies.
Parallèlement, il travaille aussi
comme secrétaire de l'écrivain et
homme politique Emmanuel
ARÈNE, un officier corse rencon-
tré durant son service militaire.

C'est ce même Paul Arène qui lui
conseillera de changer de nom et de
prendre le nom de sa mère, Coti,
mais avec un Y, ce qui, pour un
futur parfumeur, fera plus chic... et
moins corse !

François Coty et sa Femme

Attaché parlementaire, François
reste quatre ans auprès du député
mais passe surtout son temps à ven-
dre des épingles à chapeaux.

En 1900, il rencontre Yvonne

Alexandrine LE BARON, qui tra-
vaille également dans les rubans ;
elle est belle.

Le 12 juin de la même année à Paris
VIème, il épouse Yvonne et ils s'in-
stallent à Paris. Ils aurontt deux
enfants: Roland et Christiane.

Un génial industriel de la par-
fumerie

Il semble que sa famille paternelle
ait dès les années 1860 possédé des
intérêts dans la production d'or-
angers en Corse et que la distilla-
tion de la fleur d'oranger ait été un
thème abordé devant lui dans son
enfance.

Coty n'est pas seulement un «nez»
talentueux ; il est le premier à com-
prendre que le parfum, jusque là
réservé à une élite restreinte, peut et
va devenir un produit de masse. Il
fut appelé le père de la Parfumerie
moderne.

Il a ainsi l'idée d'associer les
essences naturelles et les produits
de synthèse que les progrès de la
chimie organique permettent désor-

mais de produire à bon marché, permettant ainsi à la parfumerie d'entrer dans l'ère industrielle.

Dès 1904, il crée sa propre usine sur les bords de la Seine à Suresnes.

Usine Coty à Puteaux

Elle sera suivie de nombreuses autres: dans l'île de Puteaux pour les conditionnements métalliques, à Neuilly pour les boîtes de cuir et de carton, à Pantin et aux Lilas pour les flacons.

Effleure de Coty

Il comprend l'importance du "marketing", du packaging (faisant appel au célèbre verrier René Lalique qui crée pour lui le flacon de L'Effleurt, puis celui d'Ambre antique, mais aussi à Baccarat et au décorateur Léon Bakst) et de la publicité.

Il résume sa philosophie commerciale ainsi: Donnez à une femme le meilleur produit que vous puissiez préparer, présentez-le dans un flacon parfait d'une belle simplicité, mais d'un goût impeccable, faites le payer un prix raisonnable, et ce sera la naissance d'un grand commerce tel que le monde n'en a jamais vu.

La Rose de Jacquemont Coty

Il remporte de grands succès commerciaux avec La Rose Jacqueminot (1904), premier flacon ci-contre à gauche, qui sont la base

de sa fortune.

L'Origan (1905), Ambre Antique (1908), Le Muguet (1910), Lilas Blanc (1910), Iris (1913, premier parfum soliflore) et surtout Chypre, lancé en 1917, le premier parfum grand public, dont le succès durera des décennies.

Allez voir: Chypre de Coty

Poudres Coty 1927

La poudre L'Origan, dans sa célèbre boîte orange et blanc, se vend à 16 millions d'exemplaires par an en France.

Alors que les parfumeurs ne commercialisaient leurs créations que dans leurs propres boutiques, Coty (qui dispose d'un magasin ouvert en 1905 rue La Boétie à Paris), décide de vendre ses parfums dans les grands magasins, se heurtant d'abord au scepticisme de ceux-ci.

Magasin du Louvre

Rose de Jacqueminot 1909 de Coty par René Lalique

La légende veut que Coty, sortant d'un rendez-vous avec le directeur des Magasins du Louvre qui lui avait refusé la possibilité de commercialiser dans ses rayons son nouveau parfum La Rose Jacqueminot (flacon ci-contre), en ait jeté une bouteille en plein milieu du magasin bondé, provoquant une quasi-émeute alors que des dizaines

de clientes se précipitaient pour demander où elles pouvaient en acheter.

Intérieur Magasin du Louvre

Les Magasins du Louvre acceptèrent le parfum dont plus de 500 flacons s'arrachèrent en quelques jours. Les autres grands magasins suivirent. Au bout de quatre mois, Coty avait gagné son premier million.

Coty Parfums New York 1939

À la veille de la guerre de 1914, les Parfums COTY étaient n° 1 dans le monde, avec des succursales à Moscou, New York, Londres et Buenos Aires, et Coty déjà très riche.

En 1918, pour relancer les ventes, Coty a l'idée géniale de conditionner ses parfums en petites bouteilles, ce qui en fait le cadeau idéal que les soldats américains revenus du front vont ramener à leurs femmes ou à leurs petites amies. Le succès est colossal.

Les premiers pas du parfumeur

François SPORTUNO n'avait jamais respiré un parfum ailleurs que sur les joues de sa femme: c'est donc le hasard qui va le conduire vers le succès.

Muse de COTY 1946

D'après sa fille, Christine Coty, il

avait un très bon ami, Raymond Goery, qui habitait avenue de la Motte Piquet.

Mon père jouait avec lui tous les soirs au piquet. Un jour cet ami, qui était pharmacien, ne put le rejoindre car il devait réaliser des ordonnances.

Mon père décida de lui tenir compagnie et de l'aider. Le pharmacien refusa de le laisser toucher aux médicaments. Par contre, il lui donna la recette de l'eau de Cologne, très banale, qu'il fabriquait et lui prêta le matériel nécessaire.

Et le miracle se produit: Coty s'amuse; il élabore d'autres eaux de Cologne avec les mêmes produits et son hôte est obligé de constater que d'emblée il fait mieux que lui!

Muse de Coty Surtout, Coty vient d'avoir une révélation, ce jeu lui a plu, son nez serait-il l'instrument de sa réussite?

Il n'y avait jamais songé, mais en faisant cette eau de Cologne, c'est toute la Corse odorante qui lui est revenu en mémoire, et c'est cette mémoire que chacun d'entre nous garde sous clef, qu'il va désormais libérer.

Pour l'heure, la révolution passe par Grasse, la capitale des parfums et des industries de matières premières. Dans la petite ville un peu endormie sur ses lauriers, on est

mûr pour qu'un autodidacte génial vienne brusquer les bonnes vieilles habitudes.

Les industries ont depuis longtemps isolé des molécules odorantes qui ont donné naissance à de nouveaux produits synthétiques comme la Coumarine ou la Vanilline (utilisés avec succès par HOUBIGANT dans Fougère Royale et GUERLAIN dans Jicky), mais personne n'a encore osé repenser la formulation traditionnelle: on fait avec des produits nouveaux, des jus anciens.

L'Aimant de Coty affiche 1947

Coty va prendre tout en vrac, va se passionner pour les matières naturelles nobles, pour celles aussi qu'on n'ose utiliser qu'en larmes, et pour les nouvelles et va tout associer sans préjugé. Coty est un bon vendeur et il sait se mettre en valeur.

Il va directement sonner à la porte de Chris, la plus grosse et pour l'époque la plus moderne des maisons grassoises et sait se faire accepter en stage, alors qu'il ne sait rien, ni ne vient recommandé par qui que ce soit!

Il n'oubliera pas cette hospitalité et fera de Chris son fabricant, puis son partenaire pour la conquête du marché russe, quelques années plus tard.

L'usine Chris à Grasse

Pendant près d'un an, Coty s'immerge littéralement dans l'univers de Grasse, il se lève à l'aube pour se mêler aux cueilleuses de la rose de Mai, il participe aux distillations et extractions et apprend à goûter la matière première, puis fait ses gammes et apprend le langage des odeurs et des essences.

A nous deux, Paris ! Mais Coty n'est pas du genre patient. Il veut remonter très vite à Paris et conquérir sa clientèle: les femmes!

En peu d'années il va créer des parfums qui vont d'emblée s'imposer.

Edmond Roudnitska, le grand parfumeur de l'après-guerre (Femmes de Rochas, L'Eau Sauvage de Dior etc.), commença à travailler dans les années 1920, il se souvient: tous les parfumeurs de l'époque concoctaient des répliques de l'Origan ou d'un nouveau Chypre. (Allez voir Edmond Roudnitska).

L'Origan Coty affiche années 50

Les femmes ne juraient que par ces parfums. Ce que créait François Coty s'imposait aussitôt.

En 1905, ce fut la suprématie de l'Origan qui venait de naître.

En 1912, L'Or dominait tous les endroits en vogue!

Le génie de François Coty, résulte de l'alliance rarissime d'un goût

parfait et d'une intuition infaillible. Comment Coty créait-il ? Nul ne le sait. Cet homme prolifique s'est peu confié sur ce sujet. Mais sa force vient d'autre chose: il est un esprit ouvert à tout.

Cette qualité sera aussi la cause de sa perte, car il touchera non seulement à tout l'univers de la cosmétique.

Créant notamment le moderne rouge à lèvres mais il se lancera aussi dans la presse, il rachètera le «Figaro» et dans la politique, investira en Bourse, s'intéressera à l'Art et à l'aventure aérienne dont il sera le principal mécène et fera construire un château et de nombreuses Villas.

Emeraude affiche 1950 Coty

Dans son métier de parfumeur, il est d'un éclectisme absolu (qui fait penser à Picasso arrivé à Paris la même année que lui) et se passionne aussi pour l'emballage, chose nouvelle pour l'époque.

Mais une chose est sûre: il sera le premier à accepter les matières premières produites par extraction (Chris a lancé cette technique en premier) en place de l'enfleurage traditionnel: ces absolus avaient été refusés par les grands parfumeurs comme olfactivement trop forts.

Coty, lui, saute sur ces nouveautés et sur certains synthétiques. Il ne

choisit que les produits qui lui plaisent d'emblée et assemble peu d'éléments. Il va spontanément au plus simple et vise la qualité du produit. Son premier coup est un coup de maître.

Il a rapporté de Grasse une petite quantité d'absolu de rose. Il l'habille sobrement, en fait un produit nouveau.

Magasin LouvreIl se présente aux magasins du Louvre, le plus célèbre des grands Magasins: au rayon de la parfumerie, le responsable, hume avec dédain son échantillon. Volontairement ou non, Coty laisse tomber le flacon qui se brise sur le sol en marbre et le parfum envahit le secteur.

Comme dans une légende, les femmes accourent, veulent le parfum... et le chef de rayon en commande 50 exemplaires pour le lendemain. Dans la nuit Coty et sa femme, dans leur cuisine, fabriqueront les 50 premiers flacons de la Rose Jacqueminot!

Coty s'installe dans une modeste boutique de la rue de la Boétie et se livre à une frénésie de création: Vertige, Idylle, Effluve, Ambre Antique et surtout Origan. C'est l'année du fauvisme et Coty, avec l'Origan lance le premier parfum violent du siècle pour reprendre l'expression d'Edmond Roudnitska .

Le succès est tel que la maison

Coty déménage déjà à Neuilly, puis en 1908 à Suresnes où François Coty crée la Cité des parfums, l'usine modèle. Il est riche et célèbre et il ne le doit qu'à son talent et à son audace.

Le parfum du Chèvrefeuille

L'ascension fut fulgurante, la chute aussi.

Mais durant trente ans Coty va dominer le monde du luxe : il fera de sa marque la plus vendue au monde, il sera "L'Homme le plus riche de France!"

Il continue de créer des parfums exceptionnels : L'Aimant, Chypre, Emeraude et Paris.

Paris by Coty 1922

C'est aussi Coty qui aura l'intuition de demander au verrier Lalique de faire pour lui des flacons de parfums: les plus belles créations de cet autre grand artiste sont donc signées Coty.

Au fait de sa gloire, des succès, des incartades politiques, tout va basculer. Le monde commence à s'effrayer de ce petit corse qui de l'empire des parfums commence à vouloir conquérir le pouvoir.

Ses frasques amoureuses lui valent un divorce désastreux car il est marié sous le régime de la communauté et sa femme exige la vente de ses usines.

Il est un homme à bout, usé prématurément. Dans l'un de ses derniers voyages en Corse «je reconnais mon île rien qu'à ses parfums disait Napoléon il fait arrêter sa voiture au milieu des collines et embrasse la terre et la garrigue.

Il meurt peu après en 1934, l'une de ses dernières création s'appelait:

Fougeraie au crépuscule.

Peu avant sa mort, à un ami qui lui faisait remarquer qu'il avait la chance exceptionnelle d'avoir réalisé tous ses rêves et que là était la vraie richesse, il répondit : Pas du tout, une seule chose m'a échappé, la seule vraiment qui me faisait rêver: l'odeur du chèvrefeuille.

Derniers mots d'un parfumeur dépassé par sa gloire. Une gloire dont il ne reste même pas les parfums, créations oubliées, à visiter uniquement à l'Osmothèque de Versailles où la plupart ont été reconstitués.

Le milliardaire

En 1920, la fortune de Coty se compte en centaines de millions de francs. Il est même considéré alors comme l'un des hommes les plus riches du monde.

La France à l'Amérique pour une poignée de dollars.

Flacon Complice de COTY Son apparence physique a été générale-

ment jugée énigmatique, voire dérangeante.

Coty a des cheveux roux, qu'il finira par teindre en blond, et l'œil droit immobile, comme s'il était en verre; il porte au doigt un énorme saphir, fuit la foule et les mondanités, et mène une vie recluse et mystérieuse.

Ainsi, il achète à Paris l'énorme hôtel particulier de George Kessler, situé 24 et 26, avenue Raphaël au Ranelagh (aujourd'hui détruit), considéré comme l'une des plus grandes réussites architecturales d'Ernest SANSON, mais ne l'utilise que comme adresse postale et y entreposer ses collections de meubles objets d'art et tableaux, préférant résider à l'hôtel Claridge avenue des Champs-Élysées (disparu).

Un collectionneur de demeures de prestige.

Le 30 juillet 1912, Coty acquiert pour 600 000 francs le château d'Artigny à Montbazou, près de Tours, il fera raser cet ensemble assez hétéroclite pour faire construire, entre 1912 et 1929, un magnifique château dans le style du XVIIIe siècle, inspiré du château de Champlâtreux.

Chateau

Coty et sa famille résident dans ce domaine de 1 300 hectares d'un seul tenant la moitié de l'année, "le

maître" travaillant au premier étage, ce qui explique le choix inhabituel de construire les cuisines sous les combles pour que l'odeur de la nourriture ne vienne pas perturber l'élaboration des parfums.

Le décor intérieur est somptueux, avec une chapelle inspirée de celle de Versailles.

Des serres à orchidées magnifiques sont construites dans les jardins « à La Française.

Visite du Château tout en bas de la page.

En 1923 il achète à Louveciennes, un domaine comprenant le pavillon édifié par Claude-Nicolas LEDOUX en 1771 pour la Comtesse du Barry. Comme à Artigny, des serres tropicales sont créées, reliées au pavillon par des passages souterrains.

C'est là que Coty mourra d'un accident vasculaire cérébral, quasi-ruiné par un train de vie princier, un divorce désastreux, les conséquences de la crise de 1929 et ses dispendieuses entreprises de presse; le château d'Artigny fut alors placé sous séquestre et fin 1936 ses collections d'art vendues en 124 lots aux enchères publiques à la requête d'un administrateur judiciaire près le Tribunal civil de la Seine.

Il sera inhumé à Ajaccio, sa ville

natale.

Le Chypre de Coty Dans les années 20, Coty posséda aussi le Château Saint-Hélène à Nice, acquis en 1922, qui abrite aujourd'hui le Musée international d'art naïf Anatole Jakovsky;

la Villa Nanouna à Beaulieu sur Mer;

le château de La Filolie à Thiviers (Dordogne);

une villa à Biarritz et deux propriétés en Corse dont Le Scudo à Ajaccio, acquis dans les années 60 par le chanteur Tino Rossi.

En 1926, il loua à la Ville de Paris le Château de Longchamp, dans le Bois de Boulogne, ancienne résidence du Baron Haussmann laissée à l'abandon, le fait démolir et remplacer par un édifice de style du XVIII^e siècle, qui restera inachevé.

Fastueux amateur de l'art du XVIII^e siècle comme en témoigne le catalogue de ses collections et mécène, Coty finança de nombreuses expositions, mais aussi la traversée de l'Atlantique Paris - New York.

Une orientation politique affirmée

Revue Coty 2 François Coty se lance dans la politique dans les années 20, viscéralement anti-communiste, il admire le fascisme italien qu'il va tenter d'introduire en

France.

En février 1922, il prend le contrôle du journal Le Figaro, qu'il rebaptise Figaro en lui enlevant son article défini, et qu'il installe rond-point des Champs-Élysées. Le journal adopte une ligne éditoriale résolument à droite et perd une grande partie de ses lecteurs: en 1932, la diffusion est tombée à 10 000 exemplaires.

Le duc Jean de Guise, prétendant au trône de France de 1926 à 1940, fit appel à lui pour servir de conseiller à son fils Henri d'Orléans, titré comte de Paris en 1929.

En 1928, Coty rachète Le Gaulois qu'il fusionne avec le Figaro.

Il fonde en 1928 le populaire L'Ami du Peuple, dont les bureaux sont installés rue de Bassano. Destiné aux classes populaires, le quotidien est vendu deux sous, ce qui lui vaut un procès retentissant intenté par les grands quotidiens à cinq sous comme Le Matin, Le Journal et Le Petit Parisien. Déboutés, ceux-ci seront condamnés à lui verser deux millions de dommages et intérêts.

Revue Coty En 1923, Coty est élu Sénateur de la Corse mais son élection est invalidée par la Haute Assemblée. En 1931, il est élu maire d'Ajaccio (le stade de la ville, inauguré en 1910, porte toujours son nom).

En 1927, il soutient la création des

Croix de Feu par le Comte Maurice d'Hartoy, qu'il installe d'ailleurs, au départ, dans les locaux du Figaro.

En 1933, il fonde son propre mouvement: la Solidarité Française, qui annonce près de 10 000 adhérents et participe aux émeutes du 6 février 1934.

Monarchiste, il offrit en cadeau de mariage (avril 1931) à Isabelle d'Orléans Bragance, future Comtesse de Paris, qu'il considère comme la future reine de France, un magnifique diadème de feuillages en diamants sertis de sept grosses émeraudes cabochon.

L'héritage de François Coty

Météor de Coty 1951 Les activités politiques de Coty l'ont laissé complètement ruiné.

À sa mort en 1934, la plupart de ses biens sont placés sous séquestre à la demande de ses nombreux créanciers. Son ex-femme Yvonne, ne rentrera ainsi en possession du château d'Artigny qu'en 1944, que sa fille Christine vendra en 1959 à René Traversac qui en fait le fleuron de son empire hôtelier (Relais et Châteaux).

Dès 1934 néanmoins elle devient la première actionnaire du Figaro et cédera la moitié de ses actions, le 15 mai 1950 à un groupe constitué autour de Jean Prouvost et en 1964, l'autre moitié au groupe Prouvost-

Béghin.

La société des Parfums Coty existe toujours aujourd'hui, elle détient des marques comme Calvin Klein, Chloé, Cerruti, Jennifer Lopez, Céline Dion, les parfums Adidas, Rimmel, et Lancaster (Site de Lancaster).

Ses grandes créations, comme Le Chypre qui donna son nom à la famille des parfums chyprés, Ambre Antique, L'Origan, Émeraude, L'Aimant, Le Jasmin de Corse ou son premier parfum La Rose Jacqueminot, peuvent toujours être sentis au Conservatoire International des Parfums de Versailles (L'Osmothèque).

Parfums de Coty

L'Association François Coty", qui perpétue sa mémoire, remet chaque année un prix à un parfumeur, pour l'ensemble de son œuvre.

De son vrai nom François Spoturno et originaire de Corse, Coty naquit à Ajaccio en 1874. Orphelin jeune, il connut une ascension sociale étonnante qui, avec sa passion du beau, son goût de luxe et son "nez" très sûr, fit de lui l'un des grands du parfum au début de ce siècle.

Initié aux senteurs par son ami pharmacien Raymond Goery, il se rendit à Grasse où il prit conscience de sa vocation.

Son premier magasin à Paris, rue de

la Boétie, était un modeste local à la fois boutique, atelier et laboratoire.

Mais bientôt, tout commence avec "La Rose Jacqueminot", superbe soliflore créé en 1904, qui bénéficie d'un lancement publicitaire original : un plein flacon de parfum opportunément brisé dans le grand magasin du Louvre, pour attirer la clientèle sur les lieux de l'incident et lui faire découvrir une fragrance unique.

L'Origan Coty affiche

La société Coty, fondée en 1905, allait donner naissance à l'une des plus belles réussites dans le monde du parfum.

Amateur d'art raffiné, François Coty comprit qu'il fallait "habiller" les senteurs et les entourer du luxe qu'elles méritaient : d'où sa collaboration étroite avec Lalique et Baccarat, pour une présentation révolutionnaire à l'époque, celle des extraits.

1905, c'est aussi la date de naissance de "L'Origan", premier chef de file des parfums modernes, qui connut un succès universel pendant vingt-cinq ans et suscita de très nombreuses imitations.

Autre création magistrale signée Coty : "Chypre" en 1917, si caractéristique qu'il donna naissance à la famille des parfums "chyprés", à base surtout de mousse de chêne, ciste, labdanum, patchouli, bergamote, avec des déclinaisons

fleuries, fruitées, cuirées ou vertes.

On doit surtout à Coty d'avoir compris que le conditionnement artistique parachevait l'ensemble créé par une nouvelle senteur et l'image qu'elle symbolisait.

Dès lors, l'industrie de la parfumerie obtient une supériorité incontestable.

Après "Émeraude" (1921) et "L'Aimant" (1927), un ambré doux et un ambré semi-fleuri, la maison Coty créa trois chypres :

"L'Imprévu" en 1966, ambré et fleuri (rose de Bulgarie sur fond de santal et de musc), "Complice" en 1974, très fleuri (rose, jasmin et réséda) et "Sophia" en 1980, un chypre vert hardi et contrasté.

Le Château d'Artigny de Coty -

Château d'Artigny

Le deuxième maillon des Grandes Etapes Françaises

En cette année 1959, René TRAVERSAC, le fondateur des Grandes Etapes Françaises, ne possède encore qu'un établissement : le Prieuré près de Saumur. Mais il a pris goût à l'hôtellerie et cherche à en acquérir un deuxième.

Château IntérieurLe Château d'Artigny, dominant la vallée de l'Indre, avait justement été mis en vente par Christiane Coty, la fille

du célèbre parfumeur, bâtisseur et ancien propriétaire de l'édifice.

Chateau Interieur 3 Il eut l'occasion de visiter la majestueuse demeure et d'en apprécier la beauté, mais l'importance du château, sa magnificence, sans compter les travaux d'aménagement en hôtel et la décoration modérèrent son enthousiasme.

Chateau Intérieur 2 Il s'octroya quelques semaines de réflexion à l'issue desquelles il prit finalement le risque d'acheter. Une formidable aventure commençait qui devait le mener, quelques années plus tard, à présider la chaîne naissante des "Châteaux-Hôtels de France" :

"Adapter quelques-uns de nos vieux castels au goût moderne du confort, tout en respectant leur caractère historique et la beauté du site, telle est la mission que s'est donnée l'Association des Châteaux-Hôtels de France".

Chateau Intérieur 1 En 1975, René Traversac participera activement à la fusion de cette chaîne avec celle des "Relais de Campagne" pour que les "Relais et Châteaux" voient le jour.

Le Château d'Artigny reconverti en hôtel de luxe (grâce, entre autres, au talent du décorateur Pierre SCAPULA), ouvrit ses portes le 27 mars 1961.

Le Château d'Artigny à travers les

siècles

C'est pendant la guerre de cent ans, qu'un premier château fut édifié sur la hauteur (le Puy) pour être intégré au système de défense établi le long de l'Indre autour du donjon de Montbazou.

Au fil des siècles et des restaurations successives, il se transforma en édifice hybride : tours néo-gothiques et ailes pseudo-renaissance autour du vieux manoir, qui ne trouva pas grâce aux yeux de son nouveau propriétaire, François Coty, inventeur de la parfumerie moderne.

Chateau d'Artigny Coty

Celui-ci le fit raser en 1912 pour faire édifier à la place un somptueux château dans le plus pur style du XVIIIème siècle, copie presque conforme du château de Champlâtreux dans le Val d'Oise.

Coty, de son vrai nom spoturno, a des exigences incroyables, il veut faire aussi bien que les constructeurs du grand siècle : l'empereur du parfum va concurrencer les rois de France.

La chapelle située à l'entrée du château devra être une copie exacte de celle de Versailles réduite au quart. Les installations sont grandioses: les lavabos sont en marbre et les planges en cuivre, les sols de marbres polychromes, les boiseries sont sculptées dans la

masse et les chapiteaux de colonnes décorés de feuilles de lierre, d'acanthé, de laurier.

Chateau Salle avant après

La cuisine est de marbre blanc, la pâtisserie de marbre rose et vert et la lingerie, sur deux étages, comporte 140 placards en bois de citronnier ou en ébène de Macassar incrustés de nacre.

Les travaux commencèrent en 1912 pour s'achever en 1929. Mais François Coty y résida peu puisqu'il s'éteignit en 1934.

A sa mort, le château fut placé sous séquestre de ses nombreux créanciers.

Pendant la deuxième guerre mondiale il fut successivement occupé par l'Etat Major du Ministère de la Marine, par les troupes allemandes jusqu'en 1942, et par une annexe de l'hôpital de Tours jusqu'en 1946.

Christiane Coty, la fille du parfumeur en hérita en

François Coty

François Coty (born Joseph Marie François Spoturno; 3 May 1874, Ajaccio, - 25 July 1934, Louve-ciennes) was a French perfume manufacturer, newspaper publisher, and founder of the fascist league Solidarité Française. The company he founded in 1904 is now Coty, Inc., based in New York City.

Early life and family

Joseph Marie François Spoturno was born on 3 May 1874 in Ajaccio, Corsica. He was a descendant of Isabelle Bonaparte, an aunt of Napoleon Bonaparte. His parents were Jean-Baptiste Spoturno and Marie-Adolphine-Françoise Coti, both descendants of Genoese settlers who founded Ajaccio in the 15th century. His parents died when he was a child and the young François was raised by his great-grandmother, Marie Josephe Spoturno, and after her death, by his grandmother, Anna Maria Belone Spoturno, who lived in Marseille.

After spending some years in military service, François met a fel-

low Corsican named Emmanuel Arène. A politician, writer, and future senator, Arène became François's mentor, offering him a job in Paris as his secretary. In Paris, François married Yvonne Alexandrine Le Baron and took the more French-looking name Coty, a variation on his mother's maiden name. He also met Raymond Goery, a pharmacist who made and sold perfume at his Paris shop. Coty began to learn about perfumery from Goery and created his first fragrance, Cologne Coty.

Perfumer

Through Arène, Coty met Antoine Chiris, a senator and member of the Chiris family, longtime manufacturers and distributors of perfume. At the Chiris factories in Grasse, Coty studied perfumery and began work on a fragrance, La Rose Jacqueminot. On his return to Paris in 1904, Coty set off to sell his scents to department stores, boutiques, and barbershops, but initially met with little success. His luck changed when he dropped a bottle of La Rose Jacqueminot on a

countertop at the Grands Magasins du Louvre, the Parisian department store. Attracted by the scent, customers swarmed the area, demanding to buy the perfume. Coty's entire stock was gone in a few minutes and the store offered him a place on the selling floor for his products. The success of La Rose made Coty a millionaire and established him as a major player in the perfume world.

Coty was both a talented perfumer and a brilliant marketer. He was the first to recognize that an attractive bottle was essential to a perfume's success. Though La Rose came in a Baccarat bottle, Coty's most famous collaboration was with the great ceramist and jeweler René Lalique. Lalique designed the bottles for Coty's early scents, such as Ambre Antique and L'Origan, which became bestsellers. He also designed the labels for Coty perfume, which were printed on a gold background with raised lettering. Lalique's designs for Coty were in the Art Nouveau style that was prevalent in the period, and incorporated classic Art Nouveau

themes such as nature, flowers, and female figures.

Besides pioneering the concept of bottle design, Coty was responsible for making perfume available to a mass market. Before Coty, perfume was considered a luxury item, affordable only to the very rich. Coty was the first to offer perfumes at many price points. His expensive perfumes, in their Lalique and Baccarat bottles, were aimed at the luxury market, but he also sold perfume in smaller, plainer bottles affordable to middle and working-class women. Coty perfume bottles, though mass produced, were carefully designed to convey an image of luxury and prestige. Coty also invented the idea of a fragrance set, a gift box containing identically scented items, such as a perfume and matching powder, soap, cream, and cosmetics.

Coty summed up his approach to business when he said:

Give a woman the best product to be made, market it in the perfect flask, beautiful in its simplicity yet impeccable in its taste, ask a reasonable price for it, and you will witness the birth of a business the size of which the world has never seen.

In 1908, Coty relocated his manufacturing headquarters to Suresnes, just outside Paris. He acquired property in the area and began to build what would become

"La cité des Parfums", a large complex of laboratories and factories that manufactured his products. "La cité" had 9,000 employees and was able to manufacture up to 100,000 bottles a day. This allowed Coty to meet the burgeoning demand for his products in France and abroad.

After World War I, demand for French perfume grew at a rapid pace. Many American soldiers had been stationed in France during the war and they brought back Coty perfumes to their wives and relatives. Coty realized the importance of the lucrative American market and began to distribute his products in the United States.

In 1921, with the help of executive Jean Despres, Coty created an American subsidiary in New York to handle the assembly and distribution of its products in the American market. The American offices assembled their own Coty products from raw materials sent by the Parisian factories, thus avoiding the high tariffs on luxury products in the United States. This allowed Coty to offer more competitive prices on its products. Later, additional subsidiaries were established in the United Kingdom and Romania.

Coty soon expanded his product line to include cosmetics and skin care, and expanded his distribution network to Europe, Asia, and Latin America. By 1925, 36 million women worldwide used

Coty face powders. His most popular product was his Air-spun face powder, launched in 1934. Coty collaborated with famous costume designer Léon Bakst to create the look of the Air-spun powder box. It became so popular that soon afterwards Coty launched the Air-spun powder scented with his most popular perfumes, such as L'origan and Emeraude.

Involvement in politics

He was one of the wealthiest men in France; in 1929, his fortune was estimated at US\$34 million. From the beginning, Coty was determined to use his wealth to gain a foothold in politics and to influence public opinion. In 1923, after a close race, he was elected senator of Corsica, but his victory proved short-lived. The French Senate annulled his election in 1924 after accusations of bribery surfaced. The loss of his senate seat galled Coty and turned him against the Third Republic.

In 1922, Coty bought *Le Figaro*, a prestigious conservative newspaper with an upper-class readership. Against the will of its staff, Coty changed the newspaper's name to *Figaro* and moved its headquarters to the Rond-Point des Champs-Élysées. Under Coty's ownership, the journal, once moderately conservative, adopted an extreme right-wing stance on politics and the economy. *Figaro* printed many fierce anti-Communist

articles, and was notorious for its strong opposition to the government. Coty's extreme opinions soon alienated his readers and Figaro's circulation went into free fall.

In 1926, Coty worked with Prime Minister Raymond Poincaré to create a fund to stabilize the French currency. He lent 100 million francs to the French government, but never collected on the debt. Despite his largesse, Coty was left out of the group appointed to oversee the fund, possibly because of his controversial political views. Disappointed once again by the French government, Coty pursued its downfall.

In 1928, Coty launched *L'Ami du peuple*, a newspaper aimed at the working class. Priced much lower than other competing newspapers, it soon gained a huge readership. In *L'Ami du peuple*, Coty, an admirer of Benito Mussolini, argued for the overthrow of the French Republic and the establishment of a Bonapartist or fascist government in its place.

Coty was also a fierce anti-Semite. In a long series of articles in *L'Ami du peuple*, he accused Jewish bankers and financiers of enacting "bloody, rapacious, inhuman, tyrannical policies" that had ruined the world. He blamed Jews for establishing communism, for robbing France of its pre-war wealth and glory, and for creating a worldwide economic depression.

According to Coty, Jews had allied themselves with Germany and were responsible for its increasing militarization. His incendiary writings did not go unnoticed; on 1 July 1933, he was found guilty in court for libel against Jewish war veterans' groups in France.

Coty gave financial support to numerous far-right organizations, such as the *Faisceau*, the French fascist party, and *Croix-de-Feu*, a World War I veterans organization; however, he ended his support after a few years. In 1933, he founded *Solidarité Française*, a fascist, paramilitary organization headed by himself and his friend Maurice d'Hartoy. The group peaked during the 6 February 1934 rally in front of the Palais Bourbon, when it attempted, in alliance with other far right leagues, to topple the Third Republic. The group was outlawed in 1936, through a decision taken by the Popular Front government.

Personal life

Coty and Yvonne had two children, Roland and Christiane. Despite his marriage, Coty was well-known for his numerous mistresses and illegitimate children. He was known to house his lovers in Paris' Hotel Astoria, and to lavish money and gifts on them. His premier mistress was Henriette Daude, a former Coty shopgirl who bore him five children. Coty's love life was widely publicized in the French liberal newspapers, to the

detriment of his public image.

Coty had a penchant for acquiring and remodeling property. His first major purchase was the Château de Longchamp in 1906, near the Bois de Boulogne, once the property of the famous French civic planner, Georges Haussmann. Coty used it as a laboratory in which to design his fragrances, bottles, packaging, and advertisements. The renovated Longchamp included a glass dome by Lalique and a stone tower designed by Gustave Eiffel.

In 1912, he bought the Château d'Artigny near Tours and set out to rebuild it. Over a period of 20 years, Coty rebuilt d'Artigny in a grandiose fashion, installing custom-built kitchens, ballrooms, and a large fresco depicting himself, his family, friends, and even his mistresses. During the 1920s, he resided with his family in a mansion at Avenue Raphael in the Bois de Boulogne, which Coty had rebuilt with etched-glass panels, a stair rail, and a glass ceiling designed by Lalique.

Coty's most famous acquisition was the hunting pavilion of Louveciennes near Saint-Germain-en-Laye, designed by Claude Nicholas Ledoux for Madame du Barry, mistress of Louis XV. Coty had Louveciennes rebuilt to match Ledoux's original plan, but enlarged it to include a perfume laboratory and a third story. He

also bought the Château Saint-Hélène in Nice, the Villa Namouna in Beaulieu-sur-Mer, and Le Scudo in Ajaccio, Corsica. Though he owned multiple large residences, Coty often lived in a hotel on the Champs-Élysées. He was something of a recluse, disliking crowds of any kind, and hiding behind his public image.

After 1929, Coty's fortunes began to diminish considerably. Both Figaro and L'Ami du peuple had been losing money for years and his perfume business had been affected by the 1929 Wall Street crash. But it was his divorce that most contributed to his financial ruin.

In 1929, Yvonne divorced Coty and married Leon Cotnareanu. Their divorce settlement stipulated that Coty would pay his ex-wife several millions of francs in three installments, but in 1931 Coty defaulted on the last payment, citing financial hardship. Over the next few years, divorce courts ruled in favor of Yvonne, and granted her ownership of most of Coty's fortune and his newspapers.

He died in 1934 at his home in Louveciennes, of pneumonia and complications after an aneurysm.

In 1963, Yvonne sold Coty Inc. to pharmaceutical giant Pfizer, with the stipulation that no member of the Coty family would be involved in the company. Under Pfizer, the

company began to distribute its perfumes almost exclusively through drugstores, instead of in department stores as it had previously done. In 1992, Pfizer sold Coty to the German company Joh. A. Benckiser GmbH, which owns it today.

List of creations

François Coty was a pioneer in the field of perfumery, creating many notable masterpieces, including:

La Rose Jacqueminot 1904: a floral perfume based on the Jacqueminot Rose

L'Origan 1905: (The Golden One) a floral oriental fragrance

Ambre Antique 1905: a soft amber fragrance

Ambréine 1906

Jasmin de Corsé 1906

La Violette Pourpre 1906

L'Effleur 1907

Cologne Cordon Rouge 1909

Cologne Cordon Vert 1909

Muguet 1910: (Lily of the Valley)

Lilas Blanc 1910

Styx 1911

Au Coeur des Calices 1912

L'Or 1912

Cyclamen 1913

L'Entraînement 1913

Iris 1913

Héliotrope 1913

Jacinthe 1914

Lilas Pourpre 1914

La Violette Ambrée 1914

L'Oeillet France 1914

Chypre 1917: named after the island of Cyprus, Chypre is based on a combination of bergamot, oak-moss, and labdanum. Chypre was one of Coty's greatest successes and gave its name to an entire fragrance family. Its novel structure spawned many variations, such as Guerlain Mitsouko, Robert Piguet Bandit, and Chanel Pour Monsieur

La Feuillaison 1920

Émeraude 1921: (Emerald) an oriental fragrance, Émeraude is similar in composition to Guerlain Shalimar, which was released in 1925

Idylle 1922

Paris 1922: a floral fragrance

Le Nouveau Cyclamen 1922

L'Aimant 1927 (The Magnet) a floral aldehyde perfume, said to be Coty's reply to Chanel No. 5

Republic of Cyprus

Cyprus officially the Republic of Cyprus , is a Eurasian island country in the Eastern Mediterranean, east of Greece, south of Turkey, west of Syria and north of Egypt. It is the third largest island on the Mediterranean Sea and one of its most popular tourist destinations. An advanced,high-income economy with a very high Human Development Index, the Republic of Cyprus was a founding member of the Non-Aligned Movement until it joined the European Union on 1 May 2004.

The earliest known human activity on the island dates back to around the 10th millennium BC. Archaeological remains from this period include the well-preserved Neolithic village of Khirokitia, which has been declared a World Heritage Site by UNESCO, along with the Tombs of the Kings. Cyprus is home to some of the oldest water wells in the world, and is the site of the earliest known example of feline domestication. At a strategic location in the Middle East, Cyprus has been occupied by several major powers, including the

empires of the Hittites, Assyrians, Egyptians, Persians, Rashiduns, Umayyads, Lusignans, Venetians and Ottomans. Settled by Mycenaean Greeks in the 2nd millennium BC, the island also experienced long periods of Greek rule under the Ptolemies and the Byzantines. In 333 B.C., Alexander of Macedon conquered the island from the Persians. The Ottoman Empire conquered the island in 1571 and it remained under Ottoman control for over three centuries. It was placed under British administration in 1878 until it was granted independence in 1960,[22] becoming a member of the Commonwealth the following year.

In 1974, following 11 years of intercommunal violence and an attempted coup d'état by Greek Cypriot nationalists,[24][25] Turkey invaded and occupied the northern portion of the island. The intercommunal violence and subsequent Turkish invasion led to the displacement of hundreds of thousands of Cypriots and the establishment of a separate Turkish Cypriot political entity in the north. These

events and the resulting political situation are matters of ongoing dispute.

The Republic of Cyprus has de jure sovereignty over the entire island of Cyprus and its surrounding waters except small portions, Akrotiri and Dhekelia, that are allocated by treaty to the United Kingdom as sovereign military bases. The Republic of Cyprus is de facto partitioned into two main parts; the area under the effective control of the Republic of Cyprus, comprising about 59% of the island's area, and the Turkish-controlled area in the north,[26] calling itself the Turkish Republic of Northern Cyprus, covering about 36% of the island's area and recognized only by Turkey.

Ancient Times

The earliest confirmed site of human activity on Cyprus is Aetokremnos, situated on the south coast, indicating that hunter-gatherers were active on the island from around 10,000 BC, with settled village communities dating from 8200

BC. The arrival of the first humans correlates with the extinction of the dwarf hippos and dwarf elephants. Water wells discovered by archaeologists in western Cyprus are believed to be among the oldest in the world, dated at 9,000 to 10,500 years old.

Remains of an 8-month-old cat were discovered buried with its human owner at a separate Neolithic site in Cyprus. The grave is estimated to be 9,500 years old, predating ancient Egyptian civilization and pushing back the earliest known feline-human association significantly. The remarkably well-preserved Neolithic village of Khirokitia is a UNESCO World Heritage Site dating to approximately 6800 BC.

The island was part of the Hittite empire during the late Bronze Age until the arrival of two waves of Greek settlement. The first wave consisted of Mycenaean Greek traders who started visiting Cyprus around 1400 BC. A major wave of Greek settlement is believed to have taken place following the Bronze Age collapse of Mycenaean Greece in the period 1100–1050 BC, with the island's predominantly Greek character dating from this period. Cyprus occupies an important role in Greek mythology being the birthplace of Aphrodite and Adonis, and home to King Cinyras, Teucer and Pygmalion. Beginning in the 8th century BC Phoenician colonies

were founded on the south coast of Cyprus, near present day Larnaca and Salamis.

Cyprus was ruled by Assyria for a century starting in 708 BC, before a brief spell under Egyptian rule and eventually Persian rule in 545 BC. The Cypriots, led by Onesilus, king of Salamis, joined their fellow Greeks in the Ionian cities during the unsuccessful Ionian Revolt in 499 BC against the Achaemenid Empire. The revolt was suppressed, but Cyprus managed to maintain a high degree of autonomy and remained oriented towards the Greek world.

The island was brought under permanent Greek rule by Alexander the Great and the Ptolemies of Egypt following his death. Full Hellenization took place during the Ptolemaic period, which ended when Cyprus was annexed by the Roman Republic in 58 BC.

Middle Ages

When the Roman Empire was divided into Eastern and Western parts in 395, Cyprus became part of the East Roman, or Byzantine Empire, and would remain part of it until the crusades some 800 years later. Under Byzantine rule, the Greek orientation that had been prominent since antiquity developed the strong Hellenistic-Christian character that continues to be a hallmark of the Greek Cypriot community. Beginning in

649, Cyprus suffered from devastating raids launched from the Levant, which continued for the next 300 years. Many were quick piratical raids, but others were large-scale attacks in which many Cypriots were slaughtered and great wealth carried off or destroyed.

No Byzantine churches survive from this period, thousands of people were killed, and many cities such as Salamis - were destroyed and never rebuilt. Byzantine rule was restored in 965, when Emperor Nikephoros II Phokas scored decisive victories on land and sea. In 1191, during the Third Crusade, Richard I of England captured the island from Isaac Komnenos of Cyprus. He used it as a major supply base that was relatively safe from the Saracens. A year later Richard sold the island to the Knights Templar, who, following a bloody revolt, in turn sold it to Guy of Lusignan. His brother and successor Amalric was recognized as King of Cyprus by Henry VI, Holy Roman Emperor.

Following the death in 1473 of James II, the last Lusignan king, the Republic of Venice assumed control of the island, while the late king's Venetian widow, Queen Catherine Cornaro, reigned as figurehead. Venice formally annexed Cyprus in 1489, following the abdication of Caterina. The Venetians fortified Nicosia by building the famous Venetian Walls, and used it

as an important commercial hub. Throughout Venetian rule, the Ottoman Empire frequently raided Cyprus. In 1539 the Ottomans destroyed Limassol and so fearing the worst, the Venetians also fortified Famagusta and Kyrenia.

During the almost four centuries of Latin rule, there existed two societies on Cyprus. The first consisted of Frankish nobles and their retinue, as well as Italian merchants and their families. The second, the majority of the population, consisted of Greek Cypriots, serfs and laborers. Although a determined effort was made to supplant native traditions and culture, the effort failed.

Ottoman Empire

In 1570, a full scale Ottoman assault with 60,000 troops brought the island under Ottoman control, despite stiff resistance by the inhabitants of Nicosia and Famagusta. 20,000 Nicosians were put to death, and every church, public building, and palace was looted. The previous Latin elite was destroyed and the first significant demographic change since antiquity took place when Ottoman Janissaries were settled on the island.

The Ottomans abolished the feudal system previously in place and applied the millet system to Cyprus, under which non-Muslim peoples were governed by their own religious authorities. In a

reversal from the days of Latin rule, the head of the Church of Cyprus was invested as leader of the Greek Cypriot population and acted as mediator between Christian Greek Cypriots and the Ottoman authorities.[37] Ottoman rule of Cyprus was at times indifferent, at times oppressive, depending on the temperaments of the sultans and local officials, and during this period the island fell into economic decline.

Reaction to Ottoman misrule led to uprisings by both Greek and Turkish Cypriots, although none were successful. By 1872, the population of the island had risen to 144,000 comprising 44,000 Muslims and 100,000 Christians. Centuries of neglect by the Turks, the unrelenting poverty of most of the people, and the ever-present tax collectors fuelled Greek nationalism, and by 19th century the idea of enosis, or union, with newly independent Greece was firmly rooted among Greek Cypriots.

British Empire

In the aftermath of the Russo-Turkish War (1877–1878) and the Congress of Berlin, Cyprus was leased to the British Empire which de facto took over its administration in 1878 (though, in terms of sovereignty, it remained a de jure Ottoman territory until 1914, together with Egypt and Sudan) in exchange for guarantees that Britain would use the island as a base to protect the Ottoman Empire

against possible Russian aggression.[33] The island would serve Britain as a key military base in its colonial routes. By 1906, when the Famagusta harbour was completed, Cyprus was a strategic naval outpost overlooking the Suez Canal, the crucial main route to India which was then Britain's most important colony. Following the outbreak of World War I and the entry of the Ottoman Empire on the side of the Central Powers, Great Britain formally annexed the island on 5 November 1914.

In 1915, Britain offered Cyprus to Constantine I of Greece on condition that Greece join the war on the side of the British, which he declined. In 1923, under the Treaty of Lausanne, the nascent Turkish republic relinquished any claim to Cyprus and in 1925 it was declared a British crown colony. Many Greek Cypriots fought in the British Army during both World Wars, in the hope that Cyprus would eventually be united with Greece. During World War II many enlisted in the Cyprus Regiment.

In January 1959, the Church of Cyprus organized a referendum, which was boycotted by the Turkish Cypriot community, where over 90%[clarification needed] voted in favor of "enosis", meaning union with Greece. Restricted autonomy under a constitution was proposed by the British administration but eventually rejected. In 1955 the EOKA organisation was

founded, seeking independence and union with Greece through armed struggle. At the same time the Turkish Resistance Organisation (TMT), calling for Taksim, or partition, was established by the Turkish Cypriots as a counterweight. Turmoil on the island was met with force by the British.

Independence

On 16 August 1960, Cyprus attained independence after the Zürich and London Agreement between the United Kingdom, Greece and Turkey. The UK retained the two Sovereign Base Areas of Akrotiri and Dhekelia while government posts and public offices were allocated by ethnic quotas giving the minority Turkish Cypriots a permanent veto, 30% in parliament and administration, and granting the three mother-states guarantor rights.

In 1963 inter-communal violence broke out, partially sponsored by both "motherlands" with Turkish Cypriots being forced into enclaves and Cypriot President Archbishop Makarios III calling for unilateral constitutional changes as a means to ease tensions over the whole island. The United Nations was involved and the United Nations forces in Cyprus (UNFICYP) deployed at flash points.

In 1964, Turkey attempted to intervene in Cyprus in response to the ongoing Cypriot intercommu-

nal violence, but was stopped by a strongly worded telegram from the U.S. President Lyndon B. Johnson on 5 June 1964; who warned that the United States would not stand beside Turkey in case of a consequential Soviet invasion of Turkish territory.[45]

Contemporary Era

Ledra street in Nicosia ended up in the United Nations Buffer Zone (known as the Green line).

Following a coup d'état engineered by the Greek Junta, Turkey launched a full-scale military invasion of the island in 1974. The Turkish air force began bombing Greek positions on Cyprus, hundreds of paratroops were dropped in the area between Nicosia and Kyrenia, where well-armed Turkish Cypriot enclaves had been long-established, while off the Kyrenia coast 30 Turkish troop ships protected by destroyers landed 6,000 men as well as tanks, trucks, and armored vehicles.

Three days later, when a ceasefire had been agreed, Turkey had landed 30,000 troops on the island and captured Kyrenia, the corridor linking Kyrenia to Nicosia, and Turkish Cypriot quarter of Nicosia itself. The junta in Athens, and then the Sampson regime in Cyprus fell from power. In Nicosia Glafkos Clerides assumed the presidency and constitutional order was restored; ostensibly removing the

pretext the Turks gave for the invasion. The Turks used a period of negotiations to reinforce their Kyrenia bridgehead and prepare for the second phase of the invasion, which began on 14 August and resulted in the seizure of Morphou, Karpasia, Ammochostos and the Mesaoria. The Greek forces were unable to resist the Turkish advance.

International pressure led to a ceasefire at which point 37% of the island had been taken over by the Turks and 180,000 Greek Cypriots were evicted from their homes in the north. At the same time, around 50,000 Turkish Cypriots moved to the areas under the control of the Turkish Forces and settled in the properties of the displaced Greek Cypriots. In mid-1975, the United States Congress amongst a variety of sanctions against Turkey, imposed an arms embargo on Turkey for using American-supplied equipment during the Turkish invasion of Cyprus in 1974.

In 1983 Turkish Cypriots proclaimed the Turkish Republic of Northern Cyprus, which is recognised only by Turkey. As of today, there are 1,534 Greek Cypriots and 502 Turkish Cypriots missing as a result of the fighting. The events of the summer of 1974 dominate the politics on the island, as well as Greco-Turkish relations. Around 150,000 settlers from Turkey are believed to be living in the north in violation of the Geneva Convention

and various UN resolutions. Following the invasion and the capture of its northern territory by Turkish troops, the Republic of Cyprus announced that all of its ports of entry in the north were closed, as they were effectively not under its control.

The last major effort to settle the Cyprus dispute was the Annan Plan in 2004. It gained the support of the Turkish Cypriots but was rejected by the Greek Cypriots, who perceived the Annan Plan to be both unbalanced and excessively pro-Turkish.

On May 1, 2004 Cyprus joined the European Union together with nine other countries. In July 2006, the island served as a safe haven for people fleeing Lebanon because of the conflict between Israel and Hezbollah.

In March 2008, a wall that for decades had stood at the boundary between the Republic of Cyprus and the UN buffer zone was demolished.[55] The wall had cut across Ledra Street in the heart of Nicosia and was seen as a strong symbol of the island's 32-year division. On 3 April 2008, Ledra Street was reopened in the presence of Greek and Turkish Cypriot officials.

Geography

Cyprus is the third largest island in the Mediterranean Sea, after the Italian islands of Sicily

and Sardinia (both in terms of area and population). It is also the world's 81st largest by area and world's 49st largest by population. It measures 240 kilometres (149 mi) long from end to end and 100 kilometres (62 mi) wide at its widest point, with Turkey 75 kilometres (47 mi) to the north. It lies between latitudes 34° and 36° N, and longitudes 32° and 35° E.

Other neighbouring territories include Syria and Lebanon to the east (105 kilometres (65 mi) and 108 kilometres (67 mi), respectively), Israel 200 kilometres (124 mi) to the southeast, Egypt 380 kilometres (236 mi) to the south, and Greece to the northwest: 280 kilometres (174 mi) to the small Dodecanesian island of Kastelorizo (Megisti), 400 kilometres (249 mi) to Rhodes, and 800 kilometres (497 mi) to the Greek mainland.

Paralimni

The physical relief of the island is dominated by two mountain ranges, the Troodos Mountains and the smaller Kyrenia Range, and the central plain they encompass, the Mesaoria. The Troodos Mountains cover most of the southern and western portions of the island and account for roughly half its area. The highest point on Cyprus is Mount Olympus at 1,952 m (6,404 ft), located in the centre of the Troodos range. The narrow Kyrenia Range, extending along the northern coastline, occupies substantial-

ly less area, and elevations are lower, reaching a maximum of 1,024 m (3,360 ft).

Geopolitically, the island is subdivided into four main segments. The Republic of Cyprus, the internationally recognized government, occupies the southern two-thirds of the island (59.74 %). The Turkish Republic of Northern Cyprus occupies the northern third (34.85 %) of the island and is recognized only by Turkey, as it consists of the Turkish-occupied areas. The United Nations-controlled Green Line is a buffer zone that separates the two and covers 2.67 % of the island. Lastly, two bases under British sovereignty are located on the island: Akrotiri and Dhekelia, covering the remaining 2.74 %.

Biodiversity

One of the unique features of Cyprus' habitats is the wild and sharp differences in elevations and habitats in different parts of the island as well as different climate conditions, all of which supply a diverse habitat for a unique array of fauna and flora. The number of plant species and sub-species of wild plant in Cyprus is possibly in the thousands, many of them being endemic. Wildlife can be seen in Troodos Mountains, Larnaca salt lake, Akrotiri salt lake and undoubtedly Akamas national park. Cyprus is home to Cyprus mouflon which is a national symbol of the country. The mouflon is protected

and can be seen in Paphos forests towards the Troodos Mountains.

Climate

Cyprus has a subtropical climate - Mediterranean and Semi-arid type (in the north-eastern part of island) according to Köppen climate classification signes Csa and Bsh, with very mild winters (on the coast) and warm to hot summers. Snow is possible only in the Troodos Mountains in the central part of island. Rain occurs mainly in winter, with summer being generally dry.

Cyprus has the warmest climate (and warmest winters) in the Mediterranean part of the European Union. The average annual temperature on the coast is around 24 °C (75 °F) during the day and 14 °C (57 °F) at night. Generally – summer's/holiday season lasts about 8 months, begins in April with average temperatures of 21–23 °C (70–73 °F) during the day and 11–13 °C (52–55 °F) at night, ends in November with average temperatures of 22–23 °C (72–73 °F) during the day and 12–14 °C (54–57 °F) at night, although also in remaining 4 months temperatures sometimes exceeds 20 °C (68 °F). Among all cities in the Mediterranean part of the European Union, Limassol has the warmest winters, in the period January–February average temperature is 17–18 °C (63–64 °F) during the day and 8–9 °C (46–48 °F)

at night, in other coastal locations in Cyprus is generally 16–17 °C (61–63 °F) during the day and 7–9 °C (45–48 °F) at night. In March and December in Limassol average temperatures is 19–20 °C (66–68 °F) during the day and 10–11 °C (50–52 °F) at night, in other coastal locations in Cyprus is generally 17–19 °C (63–66 °F) during the day and 8–11 °C (46–52 °F) at night. Middle of summer is hot - in July and August on the coast the average temperature is usually around 33 °C (91 °F) during the day and around 23 °C (73 °F) at night (inside the island, in the highlands average temperature exceeds 35 °C (95 °F)) while in the June and September on the coast the average temperature is usually around 30 °C (86 °F) during the day and around 20 °C (68 °F) at night. Large fluctuations in temperature are rare. Temperatures inside the island are more stringent, with colder winters and more hot summers compared with the coast of the island.

Average annual temperature of sea is 21–22 °C (70–72 °F), from 17 °C (63 °F) in February to 27–28 °C (81–82 °F) in August (depending on the location). In total 7 months - from May to November - the average sea temperature exceeds 20 °C (68 °F).

Sunshine hours on the coast is around 3,400 per year, from average 5–6 hours of sunshine / day in December to average 12–13 hours

in July.[60] This is about double that of cities in the northern half of Europe, for comparison: London - 1,461,[61] however in winter up to some times more sunshine, for comparison: London has 37 hours[61] while coastal locations in Cyprus has around 180 hours of sunshine in December (that is, as much as in May in London).

Water Supply

Kouris Dam is the largest of a network of 107 dams in Cyprus

Cyprus is suffering from an ongoing shortage of water. The country relies heavily on rain to provide household water and for many years now, the average annual rainfall seemed to be falling. Between 2001 and 2004, exceptionally heavy annual rainfall pushed water reserves up, with supply exceeding demand, allowing total storage in the island's reservoirs to rise to an all time high by the start of 2005. However, since then demand has increased annually - a result of local population growth, foreigners relocating to Cyprus and the number of visiting tourists - while supply has fallen. Cyprus has a total of 107 dams (plus one currently under construction) and reservoirs, with a total water storage capacity of about 330,000,000 m³ (1.2×10¹⁰ cu ft).[62] Dams remain the principal source of water both for domestic and agricultural use. Water desalination plants are gradually being

constructed in order to deal with recent years of prolonged drought. The Government has invested heavily in the creation of water desalination plants which have supplied almost 50 percent of domestic water since 2001. Efforts have also been made to raise public awareness of the situation and to encourage domestic water users to take more responsibility for the conservation of this increasingly scarce commodity.

Politics

Cyprus is a Presidential republic. The head of state and of the government is elected by a process of Universal suffrage for a five-year term. Executive power is exercised by the government with legislative power vested in the House of Representatives whilst the Judiciary is independent of both the executive and the legislature.

The 1960 Constitution provided for a presidential system of government with independent executive, legislative and judicial branches as well as a complex system of checks and balances including a weighted power-sharing ratio designed to protect the interests of the Turkish Cypriots. The executive was led by a Greek Cypriot president and a Turkish Cypriot vice president elected by their respective communities for five-year terms and each possessing a right of veto over certain types of legislation and executive decisions. Legislative power

rested on the House of Representatives who were also elected on the basis of separate voters' rolls.

Following clashes between the two communities the Turkish Cypriot seats in the House remain vacant since 1965. Turkish Cypriots refused to establish the state of affairs before the invasion of Cyprus as is evident in the Secretary-General of the United Nations who said "The Turkish Cypriot leaders have adhered to a rigid stand against any measures which might involve having members of the two communities live and work together, or which might place Turkish Cypriots in situations where they would have to acknowledge the authority of Government agents. Indeed, since the Turkish Cypriot leadership is committed to physical and geographical separation of the communities as a political goal, it is not likely to encourage activities by Turkish Cypriots which may be interpreted as demonstrating the merits of an alternative policy. The result has been a seemingly deliberate policy of self-segregation by the Turkish Cypriots." By 1974 the two communities had returned to a more tolerant state of living.

In 1974 Cyprus was divided de facto when the Turkish army occupied the northern third of the island. The Turkish Cypriots subsequently declared independence in 1983 as the Turkish Republic of Northern

Cyprus but were recognized only by Turkey. In 1985 the TRNC adopted a constitution and held its first elections. The United Nations recognises the sovereignty of the Republic of Cyprus over the entire island of Cyprus.

The House of Representatives currently has 59 members elected for a five year term, 56 members by proportional representation and 3 observer members representing the Armenian, Latin and Maronite minorities. 24 seats are allocated to the Turkish community but remain vacant since 1964. The political environment is dominated by the communist AKEL, the liberal conservative Democratic Rally, the centrist Democratic Party, the social-democratic EDEK and the centrist EURO.KO. On 17 February 2008 Dimitris Christofias of the AKEL was elected President of Cyprus, on AKEL's first electoral victory without being part of a wider coalition. Christofias took over government from Tassos Papadopoulos of the Democratic Party who had been in office since February 2003.

Administrative divisions

The Republic of Cyprus is divided into six districts: Nicosia, Famagusta, Kyrenia, Larnaca, Limassol and Paphos. These are not the same as those of Northern Cyprus.

The Chypre's

Chypre is the name of a family (or concept) of perfumes that are characterised by an accord composed of citrus top-notes, a floral middle, and a mossy-animalic base-note derived from oak moss and musks. Chypre perfumes may be modified by other notes such as patchouli (most often), vetiver, labdanum, ambergris and sandalwood oil.

History

The term chypre is French for Cyprus, and goes back to François Coty who created in 1917 a perfume of the same name from fragrance materials that came predominantly from Mediterranean countries. Coty's 'Chypre' became the most typical representative of a whole family of related fragrances, albeit perfumes of similar style had already been created throughout the 19th century. The chypre concept is characterised by the contrast between the fresh citrus accord and the woody-oakmoss fond; often patchouli is considered an indispensable element as well.[3] Other main fragrance families besides chypres are fougères, orientals, gourmands, and florals. The chypre accord is used in both male and female perfumery.

Style

Modern chypre perfumes have various connotations such as floral, fruity, green, woody-aromatic, leathery, and animalic notes, but can easily be recognized by their "warm" and "mossy-woody" fond which contrasts the fresh citrus top, and a certain bitterness in the dry-down. The accord consists of:

Citrus: singular or blends of Bergamot, Orange, Lemon or Neroli

Oak moss: mossy and woody

Patchouli: camphoraceous and woody

Musk: sweet, powdery, and animalic. Usually synthetic in modern times.

The composition is usually enhanced with a floral component through rose and jasmine oil.

Animalic notes such as civet can be added to this accord to provide it richness, but are less popular in modern perfumery. The most common modifiers to this basic accord include patchouli, bergamot, vetiver, ambergris,

sandalwood and labdanum resin.

Sub-families of chypre

Animalic chypres, such as ‘Cabochard’ by Grés, 1959.

Floral chypres, such as ‘Knowing’ by Estée Lauder, 1988.

Fruity chypres, such as ‘Femme’ by Rochas, 1944, ‘Mitsouko’ by Guerlain, 1917, and ‘Y’ by Yves Saint Laurent, 1964.

Green chypres, such as ‘Aliage’ by Estée Lauder, 1972 and ‘Cuvée Spéciale’ by Charvet.[5]

Woody-aromatic chypres, such as ‘Aromatics Elixir’ by Clinique, 1972.

Leathery-animalic chypre, such as ‘Cuir de Russie’ by Chanel, 1924.

Fresh-citric chypres, such as ‘CK One’ by Calvin Klein, 1994.

H & R CLASSIFICATION BOOK:

The Chypre fragrance concept and its interpretations -

The term “Chypre” goes back to Francois Coty, who created this perfume of the same name and fragrance materials that came predominantly from Mediterranean countries. Which promoted him to name his creation after the island of Cyprus = Chypre.

The Chypre concept is characterized by the contrast between a fresh citrus accord and oakmoss. Right from the very beginning, bergamot oil was the preferred citrus component; in addition to oakmoss, though, patchouli can also be termed an indispensable element in this basic accord.

Chypre Traditional

The original Chypre fragrance.

Chypre Aldehydic

Groundbreaking in its day for combining chypre & aldehydes is Cabochard by Gres.

Chypre Floral

Initially, the floral Chypre interpretations were characterized by what was, at the time, an innovative gardenia accord, which produced an interesting transformation of the dry-fresh Chypre complex.

2) Floral Chypre ~ More floral notes are added & often patchouli is added to the base along with the oakmoss. Miss Dior is a wonderful floral Chypre.

Since the 1970s, new floral Chypre perfumes have been created in which pronounced rosy elements play the dominating role. In addition, patchouli oil also serves to characterize the foundation of these younger, floral Chypre interpretations, lending them strength and character.

Chypre Fruity

This heavy interpretation of Chypre is characterized by a typical fruitiness, which has a peach-like fragrance and contributes to its high substantivity. This fruitiness is thus the exact opposite of the floral fruitiness discussed in Field B which can be described as being light and ethereal

Heavy with a peach-like fruitiness. Fruity Chypres use dark & heavily sweet & fleshy fruits such as plum, peach & apricot – which highly complement the dark earthy base notes and the sparkling citrus top notes. Guerlain's Mitsouko was the ground breaking fragrance of this category. the first to combine chypre with the Peach accord.

Chypre Floral - Animalic

This group includes a wide variety of Chypre interpretations which have spawned new variations time and time again over the course of the years, among both feminine perfumes and masculine notes. Here, the Chypre accord has been perfected to offer the utmost in refinement, yet always with an impact and fragrance effect that never goes unnoticed.

The animalic components in these perfumes serve totally, on the one hand, to enhance their feminine radiance, although they can also contribute to produce dry-leathery effects that can be increased all the way to a masculine note.

Chypre Fresh

This is where the thoroughbred Chypre interpretations are positioned. Trend setter Chypre/Coty disappeared from the market again only a few short years after its introduction, because it was created on the basis of a formula that was incapable of satisfying strong demand.

However its direct contemporary descendents continued the theme so well that the name Chypre has since become a generic term.

Chypre Green

The lightest variations of the concept can be found among the green-accentuated Chypre interpretations. As already indicated, it is but a short step from here to the Floral Green fragrances.

While it tends to be leafy-green nuances that typify the fragrance character of the green interpretations of the “Floral” concept, the green Chypre variations are also characterized by herbaceous coniferous accents.

7) Green Chypre - Also a modern Chypre sub category. The lightest of the chypres – usually with leafy-green notes or, at times herbaceous and coniferous notes. Chanel No. 19 was one of the first green chypres created.

Chypre Rose

Adding more rose to the heart. The most well known & probably the best Rose Chypre ever made is Lancome Magie Noire.

Chypre Sweet

A Chypre Sweet fragrance is based on the same materials, but has a sweet direction which can be based on Benzyl Salicylate and Hexyl Cinnamic Aldehyde. There are a wide range of other possibilities depending in part on the selection of materials.

Chypre Citrus

A Chypre Citrus fragrance employs basically the components utilized in the above, but incorporate a citrus top note. Overall this family is fresh and light based on bergamot, lemon, lime, mandarin, orange petitgrain etc.

Citrus is added to the heart as well as top notes The most innovative Citrus Chypre is Dior Eau Sauvage Created by top perfumer Edmond Roudnitska, Eau Sauvage (1966) is a citrus chypre fragrance that broke the mould in its use of scientific innovation. Top perfumer Roja Dove says, "It is one of the most important creations of the second half of last century." Eau Sauvage is groundbreaking in its simplicity, From today's perspective, the scent is classic and refined.

Masculine Chypres

Chypre Leather

Characterized by the addition of Dry, smoky, leathery notes often considered dark and masculine. Tobacco, castoreum, cade and birch tar are the notes that lend a smoky, leathery feel to a perfume. Chanel's Cuir de Russie was one of the first to combine leather & Chypre notes.

Aromatic Chypre

Also a modern take on chypres with a fresh feel. Guerlain's sous le Vent would fit this category perfectly.

A Beginner's Guide to Chypre's

The word Chypre is French for Cyprus. It was first used in perfumery by François Coty, who created an

influential perfume of that name in 1917. Consisting of a bergamot top note, classic floral heart, and a rich mossy base note. However, perfumes of a similar style have been created throughout the 19th century & have had variations on this theme & Modern chypre perfumes have various citrus top notes, herbaceous, floral and animalic notes, but all tend to have a "warm" and "woody" theme, and contain oak moss and usually amber. Further common notes include patchouli, bergamot, rose and rock rose (*Cistus ladaniferus*)

The Chypre category has split off into sub categories see descriptions of these categories below:

Traditional Chypre - Coty chypre edt

Floral Chypre - Dior Miss Dior EDT

Fruity Chypre - Guerlain Mitsouko EDP

Leather Chypre - Chanel Cuir de Rusie EDT

Aldehydic Chypre - Gres Cabochard EDT

Green Chypre - Chanel No. 19 EDT

Citrus Chypre - Dior Eau Sauvage

Rose Chypre - Lancome Magie Noire Vinatge EDT

Moss Fragrance Chemicals

Moss AB311	Powerful, decolorized moss.
Moss AB311D	Contains more colour stable mosses.
Moss Oliffac	Very tenacious oak moss odor as found growing on your forest tree. Free from coloring problems.
Mousse B Resin Abs.	Oakmoss.
Mousse B Solide Resinoid	Oakmoss.
Mousse C Savon Resinoid	Oakmoss.
Mousse De Arbe Abs.	Woody dry forest like, or seaweed like, herbaceous green.
Mousse De Arbe Resinoid	Treemoss.
Mousse De Cevennes	Oakmoss.
Mousse De Chene	Oakmoss.
Mousse De Chene Abs.	Powerful clean oakmoss odor.
Mousse De Chene Abs.	Oakmoss.
Mousse De Chene Abs. Moroc	Oakmoss.
Mousse De Chene Abs. Yugo	Oakmoss.
Mousse De Chene Morocco	Very tenacious oakmoss odor.
Mousse De Mer FM1062	Effervescent, fresh, sea moss, interesting whiskey and ginger note.
Mousse De Metra	Powder form of oakmoss.

Mousse Essence Abs.	Typical treemoss odor.	
Mousse 27/30	Oakmoss.	
Moussyl 1055	A mossy balsamic type odor almost wood like very dry.	
Tree Moss Abs.	A strong and at the same time persistent moss odor.	
Tree Moss Abs. C ' Less M.D.	A powerful mossy type odor which lasts days on the blotter.	
Tree Moss C ' Less L.C.	A diffusive tree moss woody odor.

Patchouli Fragrance Chemicals

Patchomint	Woody, patchouli odor with minty aspects.
Patchone	Extremely dry woody camphoraceous patchouli like aroma.
Patchouli	A class by itself, this mellow strong but clear fragrance will please even the most discriminating patchouli lover.
Patchouli Augaflor 22	This specialty has a persistent odour of the natural product, that the strong, tenacious woody odour marking way to floral under tones.
Patchouli Bleached Oil	Powerful woody and balsamic.
Patchouli Dark	Extremely rich sweet herbaceous aromatic spicy woody.
Patchouli Light MD	A diffusive rich sweet balsamic slightly woody herbaceous odor.
Patchouli MD	Very sweet rich spicy aromatic herbaceous balsamic odor.
Patchouli MD	Strong sweet herbaceous odor.
Patchouli MD C15105	Here molecular distillation of patchouli oil removes all the iron contamination and excessive colour to give a fine product with a good odour profile.
Patchouli Oil Acid Washed	Iron free to dispel discoloration problems.
Patchouli Oil Indonesia	Possesses an extremely rich, sweet herbaceous, aromatic spicy and woody balsamic odor. An almost wine like, ethereal floral sweetness in the initial notes is characteristic of good oils.
Patchouli 664	Intense, camphoraceous, earthy and resinous.

Patchouli Rectified Essence Intense persistent, fragrant.

Patchouli Rectified Oil Powerful woody and balsamic.

Patchouli Resinoid A tenacious sweet herbaceous woody balsamic material.

Patchouli Sub AB4927GMY Reminiscent of natural patchouli.

Patchouly Abs. Rich sweet herbaceous aromatic spicy woody balsamic odor.

Cyprus

Is it possible to reflect a country with a single scent? One local woman thinks so and has spent the last nine years recreating Eau de Chypre.

A perfume is just supposed to be about a nice smell, right? Wrong. According to Marilena Ioannides, a single smell can evoke much more than a sensual aroma but rather the whole history and culture of a place. In fact, just one scent can easily represent an entire country.

I find this a little hard to believe, but I find it even harder to grasp that our island was so famous for its perfumes back in the 12th Century AD that women from as far as France would do anything they could to spritz themselves with a little 'scent of Cyprus'.

"Oh yes it's true. They loved the Mediterranean scents in contrast to the heavier scents of north Europe," proclaims the bubbly Marilena. The whole story begins way back when Cypriot scents were introduced in France via the crusaders. French nobles named these perfumes "Eau

de Chypre" as they had a particular scent which reminded them of the island of Cyprus. A winning combination of Styrax, ladanum and calamus, it was a sensual, intoxicating blend most befitting a perfume originating from the island of the goddess of love.

For the past nine years, Marilena has been busying herself with both research and hands-on activity in France in an attempt to recreate this luscious scent. She hands me an endearing pink and black box as she proudly declares that the perfume is now sold in local shops while also currently promoting the perfume abroad.

Perhaps most interesting about Marilena's endeavor is that she's actually an agent for home textiles by profession, a far cry from her passion for the culture of Cyprus, its gastronomy, and scents. "I wanted to look into this perfume for a very long time," she proclaims. "It's part of our culture. I love getting hold of age old traditions and making them part of everyday life. And if you have a perfume it can

always be carried with you."

And here's the next interesting fact: Cyprus was famous for its perfume production as far back as 2000 BC with the oldest perfume lab on the island discovered near Pyrgos in Limassol. Perfumed oils were manufactured in rituals worshipping Aphrodite, using olive oil as a base and a mixture of essential oils including coriander.

The more one digs up the past, the more interesting facts unravel about its aromatic history with archeological evidence pointing towards the trade of perfumes between Cyprus, Egypt and Greece in the ancient world.

As the years went by, Cyprus perfumes became more popular and by the 12th century they were soon exported from Cyprus to France, and soon enough, French perfumeries were intent on creating their own 'Eau de Chypre' scents. Written sources indicate that it was hailed as a most wonderful perfume well reputed all over Europe as an aphrodisiac.

Not just limited to bottles of Eau de Chypre, various powders for the hair and room fragrances were also made using the same aromatic base but adding smells like iris, jasmine and orange blossom to the concoction. As the perfume story progressed, so the Eau de Chypre story evolved.

In the 18th century Ferdinand Dejean added oak moss as a new ingredient to the perfume, something that boosted its aphrodisiac properties. It goes without saying that the smell went down a treat.

Further developments then took place in the 19th century with the creation of Chypre of Guerlain in 1850, topped off by the renowned perfume Chypre by Francois Coty in 1917. "It became such a famous smell, it was a huge success," says Marilena. "Some of our own grandmothers and great grandmothers would have worn it."

To recreate all this and make a contemporary version of the scent, Marilena recently travelled to France and joined forces with a number of professionals and leading perfume makers in the country. "It was all such a great experience and they were very professional with me although I come from a completely different background dealing with textiles," she says. "The biggest difficulty was the amount of time that it took to complete the whole process and all the travelling back and forth from

France." But Marilena doesn't regret a minute of it, passing her enthusiasm onto her co-workers and now describing it "like a dream come true."

She then hooked up with the Cypriot-Canadian Roland Chrysomilidi who designed the logo of the perfume; a black outline of a feminine silhouette with no detail, maintaining a veil of mystery while expressing elegance and femininity.

"Mirabelle is a modern version of Eau de Chypre and its purpose is to revive the wealth of history and culture behind the perfume," explains Marilena. "It's very sensual and very feminine, invoking memories of other worlds, a mysteriously powerful and alluring scent." With a base of sensual aromas of cedar wood and musk, it also contains rose, patchouli and violet with top note of spicy saffron creating a sensual elegance.

And how did she come up with the name for the perfume I wonder? Turns out, that it takes us back to how the whole story began. "Mirabelle was a young lady in 12th century France. Her beloved Knight returns to her with a perfume from Cyprus and Mirabelle is captivated and calls it Eau de Chypre," says Marilena. Although many different versions of the sensual scent have been created since, local shop shelves are now lined with Marilena's contemporary

interpretation of this mythical sensation.

Chypre - Aldehydic

Aldehydic Chypre - Gres Cabochard EDT

Groundbreaking in its day for combining chypre & aldehydes is Cabochard by Gres.

Chypre Aldehydic # 1a

Chypre - Floral

Initially, the floral Chypre interpretations were characterized by what was, at the time, an innovative gardenia accord, which produced an interesting transformation of the dry-fresh Chypre complex.

Since the 1970s, new floral Chypre perfumes have been created in which pronounced rosy elements play the dominating role. In addition, patchouli oil also serves to characterize the foundation of these younger, floral Chypre interpretations, lending them strength and character.

Chypre Floral

The name pretty much says it all; floral Chypre perfumes are perfumes that use Chypre as a base, then add on the more delicate scent of various flowers--rose is a popular fragrance, as are violet and jasmine. Examples of floral Chypre include the Miss Diore line of perfume products, as well as the "Agent Provocateur" line.

Chypre's - Fruity

Chypre Fruity

This heavy interpretation of Chypre is characterized by a typical fruitiness, which has a peach-like fragrance and contributes to its high substantivity. This fruitiness is thus the exact opposite of the floral fruitiness discussed in Field B which can be described as being light and ethereal

Heavy with a peach-like fruitiness. Often combine notes of peach, plum and apricot – which highly complement the dark earthy notes and the sparkling citrus notes of Chypre. Fragrances of the chypre group go perfectly with fruity notes such as peach, apricot, forest strawberry or exotic fruit. They have a warm and opulent scent.

For example:

Mitsouko, Femme, Diorella and Le Parfum de Therese (the perfume created by Edmond Roudniska for his wife). For an all-natural fruity-chypre try Autumn and Megumi.

Guerlain Mitsouko was created by Jacques Guerlain in 1919 and was revolutionary in adding a fresh and luscious peach note to the dry chypre oakmoss. However, the peach note is thoroughly abstract and bears no resemblance to the syrupy peach soda fragrances swamping the perfume market. The Mitsouko peach develops from the blossoms that blends with a rich rose heart to the soft peach skin to the woody peach kernel. Guerlain Mitsouko is a femme fatale that embodies the jazzy Roaring Twenties. Mitsouko is a very complex scent that needs time and sophistication to appreciate.

Again, the name pretty much says it; Chypre is once again used as a base in fruity Chypre perfumes and on top of that base are added heavier fruit scents such as peaches or plums or even apricots, in some cases. It was Guerlain's Mitsouko scent that first pioneered this particular line of scents by successfully combining the Chypre scent with a peach accord. Since then, many more perfumers have jumped onto the bandwagon so to speak and have come out with their own line of fruity Chypre fragrances.

Fruity Chypre

Chypre is traditionally perceived as a formal, don't-mess-with-me, corseted, cerebral genre, associated to the architectural structures of classic couture. Green, leather or aromatic notes lend it an androgynous allure. Though the fruity chypre family (from Mitsouko on to Femme and Diorama) is somewhat more buxom, its curves are still contained in Marcel Rochas' "merry widow".

But by the early 1970s, Mitsouko's descendants had loosened up a bit, echoing the era's hedonistic and feminist mores. Led on by the pared-down Diorella (1972), chypres shed their girdle and lightened up on the padding.

Like Cristalle (1974) or Azzaro (1975), L de Lubin, launched in 1974, is a post-Diorella, fourth-generation chypre. But unlike their common template Diorella brings to mind summering in Normandy or Provence L heads straight for the sun decks of Saint-Tropez, wriggles out of her Yves Saint Laurent safari jacket and wraps on a Pucci sarong. Touted by the press release as

"favoured by pop idols on the disco dance floor", Lubin's latest re-edition is loose-limbed, caramel-skinned, quite possibly braless and a little bottom-heavy in her post-hippie, patchouli-vanilla-sandalwood base but who cares? She's having such a good time, and her bergamot-splashed, spicy floral jasmine-gardenia-iris-rose heart is so good-natured, you can just let go in her company. The Summer of Love isn't a far memory yet.

The 1970s ads for L alluded to its erotic allure by showing a silk teddy lying on a David-Hamiltonian pastel velvet day bed. "Everyone doesn't have to know you're not quite the same anymore", they read the hint was clear: L was a fragrance for freshly-deflowered virgins... The current artwork reproduces motifs from the perennial teenage-girl poster favourite Gustav Klimt, as a background for a pale-skinned, red-headed nymph.

L de Lubin's reformulation was worked on by the man who composed the original, Lucien Ferrero:

I haven't smelled the vintage, but according to Lubin's owner Gilles Thévenin, there isn't much difference and as he did tell me about modifications to the formulas of Nuit de Longchamp and Gin Fizz, I'm inclined to trust him on this. As a lover of fruity chypres, I am thoroughly enjoying this one: it may not have Diorella's class or Mitsouko's mystery (what does?) but its sensuous, easygoing, bordering on the gourmand nature makes its easy to wear and easy to love.

I have been looking forward to trying Ineke Ruhland's seventh fragrance, Ineke Gilded Lily, since she told me about it last April. When we met she described it as "Shakespeare meets manga". It was a description that intrigued me as the idea of the brightly colored Japanese comics and illustrations paired with something more classical set my imagination off on its own flight of fancy. Thankfully, Ms. Ruhland chose to keep her flight more grounded as her choice was to create a fruity chypre with a heart consisting of the Japanese Goldband Lily (*lilium auratum*). One of the things that I am impressed with time and again is the dedication of the best artisanal perfumers and Ms. Ruhland is one of those. To truly understand the Goldband Lily Ms. Ruhland planted some in her Bay Area garden and took the time to experience the Goldband Lily as a living thing before converting it to an accord. This leads to the creation of an olfactive lily that is very modern feeling and feels different from other lily focused fragrances out there. In many ways Gilded Lily

doesn't try to "gild the lily" as much as to frame it. By using a group of fruit notes at the top and the Shakespearean classic chypre components in the base Ms. Ruhland is able to fully explore all of the facets of her central accord.

The first two corners of the frame consist of pineapple and rhubarb. These are two excellent choices as the pineapple adds a tempered sweetness while the rhubarb adds tart to the proceedings. This is a bright sharply defined opening and it allows for the lily to make its appearance slowly as first a sharply green aspect grows out of the rhubarb which then allows Gilded Lily to fully flower as the slightly acerbic floral facet contrasts the pineapple. Many times a fruity floral beginning goes so sweet it can unbalance a fragrance, Ms. Ruhland keeps a firm hand on her components so the balance is maintained throughout the early stages. The fruity floral character persists for quite a while but then the other two parts of the frame around the lily click into place as first oakmoss and then patchouli create the very

familiar chypre base. Ms. Ruhland also adds a pinch of labdanum which imparts even more depth. The chypre base takes the lily accord and leaves behind the floral character and now accentuates the more fully green aspects of the Goldband Lily. Those familiar with lily of the valley will recognize the almost metallic character that arises within the embrace of the oakmoss and patchouli. It never gets quite as intense as lily of the valley does but it clearly shares a kinship.

Gilded Lily never rises entirely to the level of explosive color I was expecting from the "manga" tease. It really is more "Shakespeare" in that it fully explores a central note by surrounding it with the familiar and allowing that familiarity to introduce us to something new. By that assessment Ms. Ruhland succeeds on all counts as she takes the Goldband Lily and displays it to full effect in a fruit and chypre frame.

Gilded Lily has excellent longevity and above average sillage.

Fruity Fragrance Chemicals

Acetate Eugenol	Sweet spicy carnation.
Acetate C - 8	Fruity, slightly fatty waxy floral odor.
Acetate C - 9	Powerful fruity green leafy.
Acetate Iso Eugenol	Balsamic, warm faintly spicy.
Acetophenone	Pungent sweet odor, dilution - resembles hawthorne.
Adoxal	Sweet floral waxy rosy referred to as ozone like.
Alcohol C - 8	Powerful fresh, orange rose like waxy and sweet odor.
Alcohol C - 9	Powerful oily floral fresh petal like, dilution - rosy.
Alcohol C - 10	Sweet slightly fatty oily waxy floral odor.
Alcohol C - 11 Lenic	Fresh rather fatty odor citrusy waxy rosy, petal like note.
Aldehyde C - 8	Soft woody green mildly floral odor.
Aldehyde C - 9	Diffusive fatty floral waxy odor.
Aldehyde C - 11 Cyclic	Pleasant waxy floral refreshing odor.
Aldehyde C - 11 Lenic	Powerful waxy rosy citrusy odor.
Aldehyde C - 11 Undecyclic	Fatty odor green floral.
Aldehyde C - 12 Lauric	Fresh sweet waxy herbaceous clean floral odor.
Aldron	Floral.

Allyl Ionone	Oily sweet slight flowery, but also fruity woody bark like green.
Alpha Damascone	Intense fruity reminiscent of plums and roses.
Alpha Ionone	Soft warm, orris violet like, sweet and extremely diffusive.
Alpha Ionone 60	Mild floral violet odor.
Alpha Ionone White Coeur	Floral violet like.
Alpha Terpineol Extra	Delicately floral and sweet of lilac type.
Ambrette	A fragrance with a floral musk like scent.
Ambrette XNM	Sweet, but heavy floral musk odor.
Ambrettolide	Floral musky sweet odor.
Ambrose Abs.	A very strong green floral type fragrance.
Amyl Cinnamic Alcohol	Mild oily waxy floral and sweet.
Amyl Cinnamic Aldehyde	Mild herbaceous reminiscent of many types of flowers.
A C A Di Methyl Acetal	Peculiar animal green odor reminiscent of parts of jasmin.
Amyl Salicylate	Sweet herbaceous green slightly floral.
Anatoly	A floral material originating in Western Turkey.
Andrane	A very faint nondescript odor of floral type not sweet or green.
Anisic Aldehyde	Intensely sweet floral yet somewhat hay like hawthorne.
Anisyl Acetate	Mildly fruity floral slightly balsamic vanilla like in plums, lilac.
Anisyl Alcohol	Mildly floral sweet odor reminiscent of vanilla.
Argumen Aldehyde	Floral aldehydic hyacinth type.
Aurantesin	Sweet floral odor reminiscent of orange blossom.
Aurantiol	Very sweet heavy floral orange blossom to linden flowers.

Balinol	A green floral compound.
Benzophenone	Powdery geranium rose like.
Benzyl Acetate	Pw thin sweet fresh fruity floral of jasmin gardenia muguet lily.
Benzyl Butyl Ether	Sweet fresh floral and somewhat chemical.
Benzyl Butyrate	Heavy fruity floral, plum like.
Benzyl Iso Amyl Ether	Floral fruity odor somewhat greener and herby then benzyl acetate.
Benzyl Iso Eugenol	Faint rosy balsamic carnation.
Benzyl Phenyl Acetate	Mild sweet honey floral.
Benzyl Salicylate	Very faint sweet floral.
Beta Ionone	Warm woody dry floral odor with a fruity undertone.
Bois Amberene Forte	Green floral odor.
Bois De Rose Oil	Floral odor reminiscent of rose orange mignoette.
Boisinal	A very weak and sweet fruity floral odor.
Bonorax	An extremely green floral, not excessively sweet or cloying.
Bourgenal	A powerful muguet floral note.
Bromystrol Alpha	Pungent sweet grassy floral odor, reminiscent of hyacinth.
Bromystrol Omega	Powerful pungent floral somewhat grassy odor Rem of hyacinth.
Brouts Abs. Eau D ' Oranger	Strong and tenacious odor, musty dry faintly floral.
Camomile German	Typically sweet, and herbaceous.
Camomile Moroccan	Similar to above and below except for a rose, honey character.
Camomile Roman	Characteristic odor of the flowers, fresh, sweet, herbaceous.
Cananga Oil Java	Sweet and floral, ylang ylang oil, jasmin.

Cassie Abs.	Powerful strong spicy floral odor.
Cassie Bengale	A spicy floral odor whose source is located in s.e. asia
Cassione	Intensely sweet floral, very slightly woody powdery.
Cassis Base 345B	A green fruity floral character.
Cassis A 50339/779602	Fruity green sweet and very delicate, but at same time tenacious.
Cassis D 500608 - 735395	A strong green floral slightly sweet material.
Cassis Fragrance	Strong green fruity floral fragrance.
Cassis Givco	Very diffusive strong green fruity floral odor.
Cetone Alpha	Tenacious floral violet compound.
Chamomile Flowers AF - 26	A herbaceous reproduction of the true flower oil
Cinnamalva	Powerful warm spicy oily slight floral.
Cinnamyl Acetate	Sweet mild balsamic slightly floral fruity odor.
Cinnamyl Iso Valerate	Fresh, but delicately floral rosy odor.
CIS Jasmone	Diffusive, warm spicy fruity, dilution - floral.
Citronella Oil Java	Fresh and sweet revealing high content of citronellol rose odor.
Citronellol Oil Coeur	Fresh, rosy, floral rosy.
Citronellol Oil Extra	Purer grade, fresher rosy.
Citronellol 750	Clean fresh rose odor, fraction of citronellol 73 %.
Citronellol 80 Intermediate	Clean fresh rose odor, fraction of citronellol 83.5 %.
Citronellol 850	Clean fresh rose odor, fraction of citronellol 86 %.
Citronellol Last Fraction	Rosy, not as sweet as a typical fresh floral rose.
Citronellyl Acetate	Fresh, rosy, fruity odor reminiscent of geranium oil.

Citronellyl N Butyrate	Intensely fruity, sweet and somewhat rosy leafy, petal like.
Citronellyl Iso Butyrate	Fresh almost citrusy rosy, intensely fruity and sweet odor.
Citronellyl Formate	Pw leafy green fruity rosy fresh and light Rem of geranium rose.
Citronellyl Nitrile	A green rose like scent almost reminiscent of citralva.
Citronellyl Phenyl Acetate	Sweet herbaceous rosy, heavy and reminiscent of rose petals.
Citronellyl Propionate	Fresh fruity, sweet rosy odor more berry fruity odor.
Cyclal C	Powerful green leafy floral.
Cyclamen Aldehyde	Diffusive powerful floral green stem like odor.
Damascenia	Rich sweet deep floral rose.
Damascenia Rosa Abs.	Rich warm spicy floral and very deep rose odor, honey tones.
Damascenia Rosa Concrete	Extremely rich deep & sweet floral truly reminiscent of pink rose.
Damascenia 185 SA	Floral fruity rose odor at same time very sweet.
Damascenone	A powerful floral fruity note, very natural rose plum like.
Delphone	Diffusive fruity floral odor of jasmin.
Delta Damascone	A hybrid floral rose compound.
Dianthanol	A spicy carnation floral rose compound.
Di Benzyl Ether	Faint sweet odor of aubepine.
Di Hydro Floralate	A light green floral lily like odor not sweet.
Di Hydro Iso Eugenol	Warm spicy sweet slight floral balsamic odor.
Di Hydro Iso Jasmonate	Fruity odor of floral jasmin.
Di Hydro Linalool	Fresh floral citrusy.
Di Methyl Anthranilate	Heavy orange blossom mandarin peel odor.

Di Methyl Benzyl Carbinyl	Warm herbaceous floral reminiscent lilac, eldiflowers.
D M B C - Acetate	Fresh powerful fruity floral odor of jasmin, lily.
D M B C - Propionate	Sweet floral fruity of freesia, sweet pea, peony, magnolia.
Di Methyl Octanol	Waxy dry rosy odor.
Di Methyl Octanyl Acetate	Sweet floral fruity somewhat waxy odor.
D M Phenyl Ethyl Carbinol	Soft floral green.
D I O L A	Reminiscent of sweet lavender oil, herbaceous.
Di Phenyl Menthane	Harsh geranium leaf, orange blossom type odor on dilution.
Di Phenyl Oxide	Harsh floral green, metallic geranium rose type.
Dorina S A	Floral rose specialty base extremely fresh and floral.
Dupical	Floral, muguet.
Efetaal	A floral type odor.
Ethyl Caproate	Strong fruity winey odor of apple blossom, pineapple.
Ethyl Laurate	Fatty flower petal like odor.
Ethyl Linalool	Floral oily slight woody green soft odor.
Farenal	Powerful intense aldehydic waxy like slightly floral.
Farnesol Oil	Mildly floral delicately sweet oily fresh green odor.
Feuilles E ' Oranger Abs. Eau	Floral odor of feuilles d ' oranger.
Fleuroxene	A strong green floral woody non descript odor.
Fleur D ' Oranger Abs. Eau	Dry floral herbaceous reminiscent of mandarin leaf oil.
Fleur D ' Oranger 175 SA	Floral herbaceous odor not sweet or fruity.
Floraline Tuberose Concrete	Heavy floral almost nauseating sweet heavy slightly spicy odor.

Floraline Tuberose Pommade	Heavy sweet floral honey like.
Floral N	A soft slightly green floral odor.
Florapal	Herbal fresh floral green.
Florex	A deep not sweet floral rose fragrance.
Floromat	A floral green type odor.
Florosa	A light sweet green floral.
Florosia	A light sweet green floral.
Framboise 2222	A sweet fruity floral odor.
Geraniol	Mild, and sweet floral rose.
Geraniol 60	Sweet floral rose.
Geraniol 90	Mild and sweet floral rose.
Geraniol X Palmarosa Oil	Sweet and floral rose like.
Geraniol Extra	Sweet floral rose coeur grade.
Geranium Algerian	Lighter more rosy leafy.
Geranium Moroccan	Sweet and powerful, rosy leafy slightly herbaceous odor.
Geranyl Acetate	Sweet fruity floral rosy.
Geranyl Acetate Extra	The finest sweet fruity floral rosy material available at low cost.
Geranyl Acetone	Fresh floral light, but rather penetrating sweet rosy light green.
Geranyl Anthranilate	Heavy sweet floral rose.
Geranyl Benzoate	Faint rosy, very tenacious mildly floral.
Geranyl N Butyrate	Sweet rather heavy fruity rosy odor.
Geranyl Caproate	Fruity geranium rose like.

Geranyl Formate	Fresh somewhat dry green leafy rosy odor.
Geranyl Iso Butyrate	Sweeter than n butyrate.
Geranyl Phenyl Acetate	Soft floral honey rose like.
Geranyl Propionate	Sweet fruity rose warm.
Hedione	Warm, and sweet floral jasmin.
Helioforte	Schiff base, sweet fruity orange, methyl anthranilate.
Heliomet	Schiff base, sweet fruity orange, methyl anthranilate.
Heliotropex B - 2226	Liquid form of heliotropin, very sweet and floral.
Heliotropex N M Replacement	Warm powdery floral like.
Heliotropine	Sweet floral warm slightly spicy, in dilution - cherry pie.
Heliotropine N	Liquid form of heliotropine very sweet floral slightly spicy.
Heliotropyl Acetate	Very sweet light floral with distinct fruity cherry top note.
Hexalon	Oily sweet slight flowery.
Hexyl Cinnamic Aldehyde	Mild and sweet oily slightly floral.
Hexyl Cyclo Pentanone # 405	Powerful and diffusive dry floral green herbaceous odor.
Hexyl Salicylate	Faint sweet herbaceous floral odor.
Hyacinth Body	Powerful leafy green with hyacinth note.
Hydratropic Alcohol Coeur	Sweet floral, but rather heavy odor of lilac, hyacinth.
Hydrofix L	Sweet floral lily with a fresh green dry out.
Hydrofix R	Floral lily.
Hydroxycitronellal	Sweet floral mild odor of muguet.
Hydroxycitronellal X Citronellol	Muguet sweet floral green, citrusy fresh.

Hysimal	Floral, lily of the valley.
Indolarome	Diffusive, and powerful floral in extreme dilution.
Indole	Powerful choking odor, in extreme dilution - floral.
Interleven Aldehyde	Waxy rose floral.
Ionone Alpha Extra	Floral violet.
Ionone Alpha Regular	A very diffusive orris violet.
Ionone Alpha Methyl C	Floral violet.
Ionone Alpha Methyl Naphyl	A very faint slightly sweet floral violet type odor.
Ionone Alpha Refined	Floral violet.
Ionone Alpha White Coeur	Floral violet.
Italia	A very pure orris or violet note of powdery woody character.
Iris Aldehyde	Extremely powerful, and diffusive orisy odor.
Iris Concrete	Woody oily violet like odor.
Iris Concrete 199 KSA	Woody fatty oily but distinctly violet floral.
Irival	Orris.
Irone Alpha Refined	Soft warm orris violet like sweet and diffusive.
Iso Butyl Benzoate	Weak fresh orisy odor.
Iso Butyl Salicylate	Sweet harsh herbaceous floral.
Iso Cyclo Citral	Powerful and diffusive floral green.
Iso Damascone	A nice sweet slightly fruity green rose complex.
Iso Eugenol	Mild and sweet deep floral carnation like.
Iso Eugenol # 6504	A sweet spicy warm floral odor of carnation very nice.

Iso Eugenol Ethyl Acetal	Spicy floral carnation like, softer.
Iso Jasmone	Isomeric floral jasmin mixture.
Iso Phytol	Virtually odorless pure, carries dry leaf tea like odor.
Iso Plugeol	Minty herbaceous reminiscent of first smell of tuberose.
Jacinthe 127 SA	A reconstruction of the natural oil.
Jacintheme 135 SA	Reminiscent of the green floral heart of hyacinth.
Jasmal	Powerful oily herbaceous warm jasmin odor.
Jasmaprunate	Fruity like apple jasmin dry slight green like wild grapes.
Jasmin # 187	A sweet floral fruity jasmin floral complex.
Jasmin Abs.	Floral jasmin not overly sweet like cananga oil.
Jasmin Abs. Concrete Syn.	A pleasant fruity sweet floral jasmin odor.
Jasmin Abs. Italian Max.	The purest heart of the floral jasmin.
Jasmin Egyptian	An extremely fine floral jasmin fragrance.
Jasmin Petals Abs. Egypt	A sweet strong jasmin green floral petal like odor.
Jasmolactone	Sweet fruity floral jasmin.
Jasmo Lactone CNC	Oily fruity floral petal like odor.
Jasmonyl	Intensely sweet floral jasmin.
Jessemal	Herbaceous floral jasmin.
Kir Base # 9741	Woody floral complex with amber violet note.
Koavone	Woody floral complex with amber violet note.
Lactone CIS Jasmone # 114	Soft floral odor of jasmin.
Lactone CIS Jasmone # 411	Floral waxy jasmin absolute character.

Laevo Citronellol	Fresh and light rosy leafy.
Lavandin Abrialis	Sweet floral herbaceous lavandin.
Lavandin Abs.	Strong herbaceous with a camphoraceous character.
Lavandin Abs. In Color	Powerful camphoraceous herbaceous floral type odor.
Lavandin Concrete	Captures the heart of the sweet lavandin flower.
Lavandin Grosso	Sweet balsamic herbaceous.
Lavandin Grosso C - 8713	Sweet herbaceous slightly camphoraceous lavandin.
Lavender Abs. Barren Green	Powerful balsamic camphoraceous, herbaceous floral odor.
Lavender 40/42	Sweet floral herbaceous.
Lavender Oil Spiked	Typically sweet, balsamic and herbaceous.
Lavender Oil Spike Sub. 2707	Fresh herbaceous lavender like.
Liffarome	Violet green.
Lilial	Sweet yet refreshing floral green.
Lile Strallis 22	Fresh light green floral, reminiscent of lilial.
Linalool	Floral.
Linalool Intermediate	Light and refreshing floral woody odor.
Linalool Oxide	Powerful sweet woody floral.
Linalool Terpenes	Floral woody iris, quite harsh odor not pleasant.
Linalyl Acetate	Sweet floral fruity odor, bergamot pear.
Linalyl Benzoate	Balsamic floral bergamot fruity odor.
Linalyl Butyrate	Heavy fruity sweet bergamot like.
Linalyl Formate	Fresh citrusy green bergamot like.

Linalyl Iso Butyrate	More floral less fruity than n butyrate.
Linalyl Propionate	Fruity floral fresh very sweet bergamot.
Lychee	Green floral, very pleasant in extreme dilution.
Lylal	Delicately sweet, light and floral.
Mallow	A slightly green sweet floral fragrance.
Merion	A diffusive floral oriental woody complex.
Methoxy Ortho Cinnamic Ald.	Sweet and warm spicy floral.
Methyl Acetophenone	Pungent harsh warm sweet odor.
Methyl Acetyl Anthranilate	Floral linden blossom not nice.
Methyl Anisate	Sweet herbaceous delicately floral odor.
Methyl Anthranilate	Musty, fruity & dry floral odor reminiscent of concord grapes.
Methyl Benzaldehyde	Warm mildly floral sweet spicy odor of benzaldehyde.
Methyl Benzoate	Heavy sweet deep floral odor reminiscent of tropical flowers.
Methyl Hexyl Ketone	Pleasant floral bitter green, slightly musty.
Methyl Ionone Alpha Extra	Orris violet floral.
Methyl Ionone Extra	Mild floral odor of violets.
Methyl Ionone Gamma A	A floral violet woody isomeric mixture.
Methyl Ionone Gamma X	Mild floral odor of violets.
Methyl Ionone Regular	Mild floral odor of violets.
Methyl I G Replacer	Familiar woody floral complex, tobacco like undertone.
Methyl Iso Residue	Harsh floral violet slight woody.
Methyl I G Supreme	Floral violet woody fruity complex.

Methyl Ionone Tails	A harsh woody floral violet odor, reminiscent of ionone beta.
Methyl Iso Eugenol	Sweet and warm mild floral tea like slightly spicy.
Methyl Jasmonate	Powerful herbaceous floral.
Methyl Lavandin Ketone	Floral sweet lavandin like.
Methyl Lavender Ketone	Sweet floral lavender.
Methyl Nonyl Ketone	Fruity rosy orange like.
Methyl Octine Carbonate	Green violet leaf like.
Methyl Para Cresol	Sharp and sweet, dilution - ylang, hyacinth & wallflower.
Methyl Phenyl Carbinol	Earth green reminiscent of gardenia and hyacinth.
Methyl Tuberate	Floral most likely tuberose, rose like material not sweet.
Mimosa Abs. Essence	A green floral delicately mimosa like.
Mimosa Abs. Morocco	Powerful floral green.
Mimosa Odor Essence	Green floral capturing the heart of the mimosa flower.
Mirabelle 2000	A fruity floral creation.
Muguet Aldehyde 50	Diffusive green muguet lily type odor.
Mugone 207M	A faintly sweet muguet floral odor extremely viscous.
Neo Jasmin # 937	Sweet floral jasmin.
Neral Crude 88 %	Sweet floral citral lemony floral.
Nerol	Sweet rosy refreshing wet seashore like.
Nerol A	Sweet rosy refreshing.
Nerol Petals	Sweet rosy leafy refreshing.
Nerol Special	A fresh sea shore like floral rose.

Neroli Bigarrade Moroccan	Sweet spicy orange blossom obtained from sour orange.
Nerolidol	Mild and delicately floral slight green reminiscent of apple lily.
Nerolin Bromelia Crystals	Soft floral.
Neryl Acetate	Very sweet fruity, floral odor of raspberry rose.
2,6, Nonadienal # 332	Intense powerful vegetable green, reminiscent of violet leaves.
2,6,Nona 1 al Diethyl Acetal	Smooth floral violet, melon odor.
Octanol 2	A floral rosy fresh odor.
Octanol Nitrile 10 B - 2216	A rosy floral odor.
Octyl Formate	Powerful, and relatively diffusive fruity green orris.
Oranger Crystals	Sweet and very tenacious orange blossom.
Oranger Liquid	Sweet floral rather harsh orange blossom.
Orris Concrete	A floral green violet like odor.
Orris Oil	Floral violet.
Orris Resin Abs.	Floral violet.
Orris Resinoid	A very herbaceous slightly green floral like odor.
Osmantha	Floral.
Osmanthus CC Abs.	A sweet floral jasmin odor slightly green.
Osmanthus NT 5232	A sweet floral jasmin odor.
Oxyertaline Formate	A faint green slightly sweet floral door.
Palmarosa Oil	Sweet floral rosy odor.
Para Cresyl Acetate	Lily like odor.
Para Cresyl Iso Butyrate	Pronounced lily narcissus like odor.

Para Cresyl Methyl	Floral odor of wallflower, and ylang ylang.
Para Cresyl Phenyl Acetate	Floral odor of lily, hyacinth, jonquil.
Para Cresyl Redistilled	Floral odor.
Para Methyl Quinoline	Powerful and penetrating, dilution - sweet floral and tobacco like.
Para Methoxy Acetophenone	Sweet, but somewhat harsh hay like odor.
Parmavert	Powerful floral green, sweet and violet leaf like.
Petilyn	A very delicate and faint light green floral.
Petitgrain Bigarade Oil	Pleasant fresh floral sweet odor.
Petitgrain Citronner Oil	Distinct and pleasant, a fresh lemony floral woody odor.
Petitgrain Oil Moroccan	A fresh lemony floral woody odor extremely tenacious.
Petitgrain Oil S A	A fresh lemony floral woody odor.
Petitgrain Oil Terpeneless	Diffusive less better sweet floral woody odor.
Petitgrainol	Intensely woody neroli note.
Phenoxanal	Fresh floral rose.
Phenoxy Ethanol	Mild rosy, but also metallic.
Phenoxy Ethyl Alcohol	Mild honey rose odor.
Phenoxy Ethyl Iso Butyrate	Sweet fruity rosy floral.
Phenyl Di Methyl Acetal	Powerful green earthy flower stem like odor.
Phenyl Ethyl Acetal	Warm, green leafy also rosy balsamic odor.
Phenyl Ethyl Acetate	Very sweet, rosy fruity honey like odor.
Phenyl Ethyl Alcohol	Mild and warm rose honey like odor.
Phenyl Ethyl Benzoate	Very faint floral balsamic odor reminiscent of dry rose petals.

Phenyl Ethyl Cinnimate	Very faint and sweet pleasant balsamic rosy odor.
Phenyl Ethyl Formate	Powerful green herbaceous rosy odor.
Phenyl Ethyl Iso Butyrate	Fresh fruity tea rose type.
Phenyl Ethyl Methyl Ether	Powerful diffusive, dilution - jasmin tobacco like.
Phenyl Ethyl Phenyl Acetate	Heavy and very sweet floral balsamic odor, musky honey like.
Phenyl Ethyl Pivalate	Floral possibly faintly rosy practically no odor.
Phenyl Ethyl Propionate	Very warm herbaceous rosy deep fruity.
Phenyl Ethyl Salicylate	Faint, but sweet and delicate balsamic floral.
Phenyl Propyl Acetate	Fresh floral powerful fruity green.
Phenyl Propyl Alcohol	Warm and mild balsamic floral, sweet odor.
Phenyl Propyl Aldehyde	Floral hyacinth, lilac, balsamic green.
Phixia	Sweet, floral at first delicate refreshing mild.
Phytia Abs.	Powerful floral herbaceous balsamic, not sweet.
Phytol	Delicate floral balsamic notes reminiscent of nerolidol, farnesol.
Pivarose	Floral tea rose.
Piviane 2	A sweet rosy floral fragrance.
Polarose	Powerful fatty oily waxy rosy odor.
Pseudo M I Terpenes	A harsh floral violet like odor.
Racinia	A dry floral rose complex.
Reseda Body	Delicate, but powerful hyacinth, narcissus, reseda note.
Rhodinol X Citronella	Naturally sweet rosy floral.
Rhodinol Coeur	Geranium rose.

Rhodinyl Acetate	Sweet, light refreshing rose muguet, green leafy notes.
Rhodinyl N Butyrate	Intensely sweet mellow fruity deep rosy.
Rhodinyl Formate	Fresh leafy green delicate rosy.
Rhodinyl Phenyl Acetate	Sweet, very deep soft honey like rose.
Rhodinyl Propionate	Rich and sweet fruity floral rose geranium type.
Rhodinyl Salicylate	Very weak sweet rosy powdery balsamic odor.
Rhodinyl Valerate	Heavy fruity, slightly earthy green, but also sweet odor.
Rosacene	A nice light delicate floral rose compound not overly sweet.
Rosalva	Powerful fatty oily, waxy rose odor.
Rose Abs. Moroccan	Extremely fresh and sweet floral rose odor.
Rose Abs. Turkey	A tenacious diffusive sweet floral, truly captures fresh flower.
Rose Crystals	Mild, at first very weak green rosy balsamic odor.
Rose Essence 193	A very strong, but yet sweet floral rosy fresh odor.
Rose Essence Bulgare	A very diffusive vivacious rose odor, slightly sweet floral nice.
Rosemary Oil	Woody herbaceous, reminiscent of spike lavender oil.
Rose Nitrile	Rich rose geranium woody iris.
Rose Oil Moroccan	Deep sweet, rich and tenacious floral rose.
Rose Oil Moroccan Select	The finest moroccan rose fragrance at an attractive cost.
Rose Oil Templar	A typical sweet rose odor whose source is rooted in English lore.
Rose Oil Turkey	Diffusive strong vibrant floral rose scent reminiscent of the rose.
Rose Oil Turkey Commercial	An extremely floral typical rose odor, not intense over powering.
Rose Oil Turkish	Sweet floral rose.

Rose Orient	Intensely rose like, mysterious, diffusive, rounded and nice.
Rose Oxide R	Reminiscent of rose geranium.
Scennal	A fresh green floral lily type odor.
Scentennal	Powerful green refreshing watery floral.
Schiff Base	Methyl Anthranilate/Amyl Cinnamic Aldehyde.
Schiff Base	Methyl Anthranilate/Hydroxycitronellal.
Schiff Base	Methyl Anthranilate/Lilial.
Schiff Base	Methyl Anthranilate/Triplal.
Sclarene	A very faint, but yet sweet floral odor.
Sino Citral	Fresh citral lemony with a floral background.
Styrallyl Acetate	Powerful and penetrating green floral in dilution.
Styallyl Alcohol	Dry floral earthy green, lilac, jasmin, mimosa, type odor.
Styrallyl Propionate	Balsmaic green floral type odor.
Styrax Essence CD	Has a pleasant balsamic odor recalling hyacinth and hawthorne.
Styrax Clarified	Sweet balsamic odor with a hyacinth like floral background.
Styrax Provence Essence	Sweet balsamic odor, floral in extreme dilution.
Styrax Purified	Sweet balsamic odor with a hyacinth tuberose background.
Sweet Pea	Resembles orange blossom, hyacinth and a touch of rose.
Sweet Pea Double	Not sweet strong or heavy floral odor.
Syringa	Floral odor of muguet and neroli oil.
Syringa 1523	Soft and very tenacious floral odor.
Terpineol Extra	Delicate floral sweet lilac type perfume grade.

Terpineol Prime	Delicate floral sweet lilac.
Terpineol 350	Delicately floral reminscent of lilac.
Tepyl Acetate	Oily herbaceous floral and sweet earthy odor.
Tetra Hydra Linalool	Sweet oily and delicately floral.
Tetra Hydra Mugol	Fresh sweet floral odor.
Tetralide	Musky powdery floral.
The 71795	Tea/Floral.
Tolu Balsam Oil	Warm balsamic and hyacinth like.
Tolu Balsam Alva Essence	A tenacious diffusive balsamic hyacinth in dilution like.
Tolu Balsam Resinoid	Warm and balsamic hyacinth like.
Tolyl Acetate	Sweet floral fruity and mildly green.
Trans De Cadro Beta Naphyl	Floral rosy.
Trans 4 Decenal # 382	Has a fruity rose aldehydic character.
Tri Cyclo Decenyl Propionate	Fruity floral.
Tuberanthia S A	Tuberose
Tuberose Abs.	A heavy sweet almost nauseating floral odor of tuberose.
Tuberose Pommade	A heavy sweet almost overpowering tuberose odor.
Undecavertol	Strong, however not over powering slightly green floral odor.
Vanoris	Woody fruity, soft refreshing odor of mild orris type.
Vartol # 915	Floral rose type odor very dry.
Velutone	Faint, but sweet floral fruity odor.
Violet Abs. French	Strong herbaceous floral violet.

Violet Abs. Rue	Herbaceous floral violet, not as sweet as the french oil.
Violet Abs. Selection	Strong floral violet odor.
Violet Colorless 54.5219	Herbaceous floral odor of the violet.
Violet Leaf Abs. N.Y. 11149	Green floral violet, very subtle slight sweet.
Violet F ' Builles Abs.	Slightly violet, not strong or sweet.
Wild Pimento Oil	Resembles spike lavender oil.
X.I. Aldehyde	Powerful hay melon ozone note, floral aspect.
Yara Yara Crystals	Intensely sweet orange blossom, acacia like.
Ylang Ylang Abs.	Intensely sweet floral, and very diffusive odor.
Ylang Ylang Complete	Powerful, and intensely sweet, but also soft balsamic floral odor.
Ylang Ylang Concrete	Rich sweet, and intensely floral.
Ylang Ylang Oil	Sweet floral, and intensely floral.
Ylang Ylang Oil Extra	Very powerful floral intensely sweet of cresylic benzoate type.
Ylang Ylang " First "	In between quality generally a mixture of different fractions.
Ylang Ylang " Second "	In between quality generally a mixture of different fractions.

Musk, Animalic Fragrance Chemicals

Abalide	Sweet musk similar to tonalid.
Ambargris	A healing panacea made from large chunks of ambergris only when they are found by fisherman floating on the Atlantic Ocean. A scent so beautiful and popular in Morocco that it inspired John Singer Sargent to paint his famous La Furnee d'Ambergris.
Ambergris T Oliffac	A substitute for the traditional 3 % tincture of ambergris.
Ambrain	Labdanum musk.
Ambrette Ess. Beurre Lave	A delicate sweet musk fragrance.
Ambrette C	Sweet musk.
Ambrette XNM	Sweet, but heavy floral musky odor.
Ambrettex	Musk.
Ambrettolide	Floral musky sweet odor.
Ambrinol	Extremely powerful amber with natural somewhat musky.
A C A Di Methyl Acetal	Peculiar animal green odor.
Amyl Phenyl Acetate	Sweet musk animal odor.
Angelic Root Oil	Pleasantly aromatic a mixture of musk.
Animalic 9143	Animal.
Animalone	Musk.

Benzyl Phenyl Acetate	Mild sweet honey floral.
Castaulon	Warm, intense fatty hairy animal odor.
Castorium Hyper Abs.	Very powerful warm animal like scent.
Cashmeran	Diffusive musk.
Celestolid	Mild, and sweet musky odor.
Civet Abs. 394 BF	An extremely powerful obnoxious animal like fecal odor.
Civet AAB394	Fine substitute of the original absolute.
Civet AB422A	Excellent reconstitution long lasting.
Civet Abs. 394 BF	An extremely powerful obnoxious animal like fecal odor.
Civet Artificial I.A.	Lacks the characteristic softness which is found with powder.
Civet Artificial XBS	Obnoxiously strong fecal odor.
Civet Augaflor 6	Strong, long lasting civet-like specialty, unmistakably animal with a woody background. A good economical reproduction of the original and possesses good fixative properties. May be used to advantage in toiletries where the price of the natural material precludes use.
Civet Base # 1	A very sweet slightly cloying fecal odor of the abyssinian cat.
Civet Concentrate 50	Strong acidic animal, fecal tone invaluable in fine fragrances.
Civet Concrete	Musky odor extremely diffusive and tenacious.
Civet Ethiopia	A glandular secretion collected from primarily male cats. In small traces adds a velvety touch to many different fine bouquets.
Civet # 3 S - 788	A strong animal odor of the civet cat close to the natural oil.
Civet 170 BSA	Typical animal sweet musky odor reminiscent of the civet cat.
Civet Powder	Unquestionably animal fecal odor of the civet cat.

Civet Resin Abs.	Diffusive animal fecal like odor of the civet cat.
Civet Tincture	An odor reminiscent of the civet cat, fecal like.
Civet 241 Oliffac	Strong animal, fecal notes similar to natural civet, sensual.
Civettal	A liquid form which lacks the softness found with natural powder.
Civette Abs.	Animal sweet, free from fecal and urine notes.
Civette Artificial Abs.	Animal sweet.
Civette Givco 169	This Givco is a close reconstitution of civet absolute, which it can replace in equal amounts. It does not contain any animal extract. It adds diffusive warmth to fragrances and provides the distinctive effect produced by natural civet in floral-jasmin, amber, oriental, chypre, and tobacco accords.
Civette 170 BSA	Typical animal sweet odor of the civet cat.
Civettone	A ketone, active element in Abyssinian civet synthesized.
Copaiba Oil	Musk, milder sweeter almost creamy balsamic.
Cyclo Penta De Canolide	Musky somewhat animal.
Di Hydro Ambrettolide	Musky sweet odor of good tenacity.
Ethyl Phenyl Acetate	Powerful sweet honey like.
Ethylene Brassylate	Sweet musk warm and powdery.
Exaltolide	Delicately animal.
Exaltex	Musk.
Fixolid	Sweet wody musky.
Galaxolide 50	Powerful sweet and musky.
Geranyl Phenyl Acetate	Soft floral honey rose like.
Grisalva	Ambergris.

Horsey Dis	An animal amber complex.
Indoflor Crystals	Distinct civet like slightly obnoxious animal odor.
Iso Butyl Phenyl Acetate	Powerful leafy rosy musky fragrance.
Labdanum Abs.	A sweet herbaceous recalling ambergris, slightly animal.
Methyl Phenyl Acetate	Powerful and diffusive honey musk odor.
Monofax	Musk.
Moskene	Musky sweet odor.
Muscambre 66.130	A musky animal odor.
Muscenone	Musk.
Muscomer Extra 810P	An animal musk slightly sweet odor.
Muscone	Musk.
Musk Booster 8-2-3 # DB10253	Musk.
Musk C - 14	Musk, sweet.
Musk C - 14 Supra	Musk, sweet.
Musk 144	Sweet musk.
Musk Abs. C ' Less	An animal musky odor powerful and intense.
Musk Alpha	A weak animal note, not very sweet.
Musk Ambrette	Sweet, but yet heavy floral musky odor.
Musk Emeressence	Sweet musk.
Musk Ketone	Sweet and very tenacious musky odor.
Musk KN	Musk.
Musk T	Musk, sweet.

Musk T Supra	Musky, fatty.
Musk Tibetine	Delicately sweet musky, mildly animal like.
Musk TM II	Sweet tenacious musk like.
Muskylein	Sweet musk.
Musk Xylol	Sweet musk tenacious odor rather harsh.
Nepalva	Sweet musky odor.
Oxahexalid	Sweet tenacious musk with an ambrette note.
Oxalide T	Sweet, soft extremely animal musky odor.
Oxalide T Supra	An isomeric sweet musk mixture.
Phantolid	Sweet, musky somewhat animal odor.
Phenyl Acetic Acid	Sweet honey animalic type odor.
Phenylal	A very sweet honey animal odor.
Phenyl Ethyl Acetate	Very sweet, rosy fruity honey like odor.
Phenyl Ethyl Alcohol	Mild and warm rose honey like odor.
Polafix	Sweet, woody musky odor.
Polaride	Sweet and musky odor.
Skatole	Powerful sweet warm animal.
Tetralide	Musky powdery floral.
Tonalid	Sweet woody musky.
Tonalix 50	Strong radiant musk.
Tonquitone	Musk.
Traseolide 100	Sweet musk.

Triflaige - A

Tropical, fruity, floral, musk-like.

Chypre's - Floral Animalic

This group includes a wide variety of Chypre interpretations which have spawned new variations time and time again over the course of the years, among both feminine perfumes and masculine notes. Here, the Chypre accord has been perfected to offer the utmost in refinement, yet always with an impact and fragrance effect that never goes unnoticed.

The animalic components in these perfumes serve totally, on the one hand, to enhance their feminine radiance, although they can also contribute to produce dry-leathery effects that can be increased all the way to a masculine note.

The most innovative and feminine of all the Chypre family, Chypre Animalic Florals sometime have a leathery, dry effect that suggests masculinity.

For instance – Madame Rochas, Paloma Picasso and Schizm.

The most innovative and of all the Chypre family, Chypre Animalic Florals sometime have a leathery, dry effect that may suggest masculinity. Dzing! (l'Artisan Parfumeur) is one extreme example, also bordering on the leather; Agent Provocateur reeks with indole, musk and aldehydic florals; and there is also the classic Miss Dior, originally underlined with sizzling-hot civet base (review of different versions and concentrations of Miss Dior will be posted here very soon), and similar to it is also Ma Griffe.

My personal addition to this sub-category is one of my most avant-garde creations – Schizm, which pairs intense tuberose, orange blossom, jasmine and pepper over a base of oakmoss, cedar and wild mushrooms (which lend the animalic quality).

Chypre Floral Animalic # 1a

Chypre's - Fresh

Chypre Fresh

This is where the thoroughbred Chypre interpretations are positioned. Trendsetter Chypre/Coty disappeared from the market again only a few short years after its introduction, because it was created on the basis of a formula that was incapable of satisfying strong demand.

However its direct contemporary descendents continued the theme so well that the name Chypre has since become a generic term.

Though extremely long lasting, these Chypre feel fresh and radiant.

Chypre Fragrance Lifestyle:

Very elegant, classical, for women who tend to prefer slightly out of the norm fragrances. Chypre fragrances smell slightly dry, not very sweet.

Fragrances:

Eau Sauvage and Diorella (Dior) are two classical examples for this family, and ArbitRary is an example for a natural Chypre Fresh fragrance.

Chypre - Green

Chypre Green

The lightest variations of the concept can be found among the green-accentuated Chypre interpretations. As already indicated, it is but a short step from here to the Floral Green fragrances.

While it tends to be leafy-green nuances that typify the fragrance character of the green interpretations of the “Floral” concept, the green Chypre variations are also characterized by herbaceous coniferous accents.

These are the lightest chypre – usually with a leafy-green, at times herbaceous and coniferous notes.

For instance – Ayalitta and Rainforest.

Green Chypre:

Chanel No. 19 was created by Henri Robert in 1971, a year before Coco Chanel passed away. The number 19 was chosen for the fragrance to commemorate Coco Chanel's birthday on the 19th of August. Chanel No. 19 is a balsamic green scent which opens with sharp bergamot and galbanum followed by hyacinth. The scent develops into a luscious velvety floral blend of rose, ylang-ylang, and iris, then finally settling into a dry chypre base of leather and sandalwood. No. 19 is an expression of Chanel's crisp elegance, her sense of balance between sharp and soft. Chanel No. 19 is strong and passionate yet decorously restrained and elegant.

Green Fragrance Chemicals

Acetate C - 9	Powerful fruity green leafy.
Aldehyde C - 6	Powerful fatty green grassy odor.
Aldehyde C - 8	Soft woody green mildly floral odor.
Alfania Base 38228	If a compound based on alfalfa most likely green or herbal.
Ambrose Abs.	A very strong green floral type fragrance.
A C A Di Methyl Acetal	Peculiar animal green odor.
Amyl Salicylate	Sweet herbaceous green slightly floral.
Anisyl Formate	Sweet herbaceous green somewhat dry odor.
Armoise Oil	Herbaceous green.
Balinol	A green floral compound.
Benzyl Formate	Powerful fruity green herbaceous.
Bois Amberene Forte	Green floral odor.
Bourgeon De Cassis	Green.
Cassis Base 345 B	A green fruity floral character.
Cassis Fragrance	Strong green fruity floral fragrance.
CIS 3 Hexenyl Acetate	Intensely green sharp fruity, very diffusive, dilution - banana.
CIS 3 Hexenyl Benzoate	Mild, but tenacious green herbaceous woody odor.

CIS 3 Hexyl Alcohol	Powerful, and intensely green grassy odor.
CIS 3 Hexyl Salicylate.	Sweet, slightly green balsamic odor.
Citralva	Powerful oily green lemony fresh odor.
Citronellal	Powerful fresh green citrusy, slight woody odor.
Citronellyl Formate	Pw leafy green fruity rosy fresh and light Rem of geranium rose.
Cortex Aldehyde	Powerful green woody sap like, but fresh aldehydic sweet.
Cumin Aldehyde	Extremely powerful diffusive green spicy, slightly fatty odor.
Cuminic Aldehyde	Pungent green herbaceous odor.
Cyclal - C	Powerful green leafy floral odor.
Cyclamen Aldehyde	Diffusive powerful floral green stem like odor.
Cyclo Galbonate	Strong herbaceous green.
Decatone	A strong green odor.
Di Ethyl Malonate	Sweet pleasant fruity green reminiscent of apples.
Di M Phenyl Ethyl Carbinol	Soft floral green.
Di Phenyl Oxide	Harsh floral green.
Ethyl Levulinate	Ethereal fruity, somewhat green and sweet odor.
Ethyl 2 Methyl Butyrate	Powerful diffusive green fruity pungent odor Rem of apple peels.
Farnesol	Mildly floral delicately sweet oily fresh green odor.
Feuillage Vert Base 47.062	Green floral base possessing a cool natural freshness.
Fleuroxene	A strong green floral woody nondescript odor.
Floral N	A soft slightly green floral odor.
Floromat	A floral green type odor.

Floropal	Herbal fresh floral green.
Florosa	A light sweet delicately floral green fragrance.
Florosia	A light sweet green floral.
Galbanum Oil	Spring green leafy like.
Galbex 183	Woody green herbaceous odor.
Geranium Bourbon	Green leafy rosy strong.
Geranyl Acetone	Fresh floral light, but rather penetrating sweet rosy light green.
Geranyl Formate	Fresh somewhat dry green leafy rosy odor.
Grapefruit Body Fleurom	Extremely powerful green grapefruit odor.
Gyrane	A diffusive herbal green type odor.
Heptavert	A green woody odor.
Herbaflorat	Green sweet fruity.
Hexadrenyl Iso Butyrate	Oily sweet fruity green apple, and galbanum like odor.
Hexyl Benzoate	Woody green piney balsamic odor.
Homo Cumminic Aldehyde 50	Pw, diffusive green twiggy effect with cut grass hedge like odor.
Hyacinth Body	Powerful leafy green with hyacinth note.
Hydratropic Aldehyde	Very powerful penetrating green earth foilage.
Hydratropic A D M Acetal	Powerful, earthy warm spicy green deep fruity odor.
Hydrofix L	Sweet floral lily with a fresh green dry out.
Hydroxycitronellal X Citronellol	Muguet sweet floral green, citrusy fresh.
Iso Cyclo Citral	Powerful and diffusive floral green.
Jacintheme 135 SA	Reminiscent of the green floral heart of hyacinth.

Leaf Acetal Extra	Powerful oily green odor with a sweet vegetable undertone.
Leaf Acetate	Intensely green diffusive odor.
Leaf Alcohol	Powerful fruity green slightly fruity.
Leaf Salicylate	Sweet, slightly green balsamic odor.
Liffarome	Violet green.
Ligustral	Fresh green.
Lilial	Sweet yet refreshing floral green.
Lile Strallis 22	Fresh light green floral, reminiscent of lilial.
Linalyl Formate	Fresh citrusy green bergamot like.
Lylal	Delicately sweet, light and floral.
Mallow	A slightly green sweet floral fragrance.
Mayol	A sweet green floral material.
Melon Enhancer	A diffusive green melon type odor.
Melonyl 86471 VMF	A very nice light sweet green melon odor very diffusive.
Methyl Heptenone Extra	Fruity green slightly waxy.
Methyl Hexyl Ketone	Pleasant floral bitter green, slightly musty.
Methyl Octine Carbonate	Green violet leaf like.
Methyl Phenyl Carbinol	Earth green reminiscent of gardenia and hyacinth.
Mimosa Abs. Essence	A green floral delicately mimosa like.
Muguet Aldehyde 50	Diffusive green muguet lily type odor.
Nerolidol	Mild and delicately floral slight green reminiscent of apple lily.

Nerolidyl Acetate	Sweet woody and mildly refreshing green.
Olibanum Oil	Strongly diffusive fresh terpeney green.
Orris Resinoid	A very herbaceous slightly green floral like odor.
Phenyl Acetaldehyde	Powerful green wood sap like.
Phenyl A Glycerine Acetal	Peculiar oily green earthy ranty, but mild and sweet.
Phenyl Di Methyl Acetal	Powerful green earthy flower stem like odor.
Phenyl Ethyl Acetal	Warm, green leafy also rosy balsamic odor.
Phenyl Ethyl Formate	Powerful green herbaceous rosy odor.
Phenyl Propyl Acetate	Fresh floral powerful fruity green.
Phenyl Propyl Aldehyde	Floral hyacinth, lilac, balsamic green.
Rhodinyl Formate	Fresh leafy green delicate rosy.
Rhodinyl Valerate	Heavy fruity, slight earthy green, but also sweet odor.
Rose Crystals	Mild, at first very weak green rosy balsamic odor.
Scentenal	Powerful green refreshing watery floral.
Stemone	Green slightly herbaceous odor.
Strallyl Acetate	Powerful and penetrating green floral in dilution.
Strallyl Propionate	Balsamic green floral type odor.
Syringa Aldehyde	Powerful and refreshing green fruity forest like sweet odor.
Taget Abs.	Intensely herbaceous green with a sweet fruity undertone.
Tolyl Acetate	Sweet floral fruity and mildly green.
Trans 2 Hexenyl Acetate	Powerful and fresh green sweet fruity very natural odor.
Tri Cyclo Decenyl Acetate	Powerful herbaceous green and fresh woody odor.

Undecavertol	Strong, however not over powering slightly green floral odor.
Vern Aldehyde	Fresh green.
Vetchouli	Green herbaceous odor.

Chypre - Rose

Rose Chypre - Lancome Magie Noire Vinatge

Adding more rose to the heart. The most well known & probably the best Rose Chypre ever made is Lancome Magie Noire. Of all the aromatic materials I would have to say that the Rose is my favorite material. I fondly remember my late beloved father's rose garden in the front of the house. At one time raising rose's was his passion. Sometime in the mid sixties we had an invasion of Japanese Beetles. After a few years he gave up. One by one he slowly got rid of the plants, and eventually replaced his garden with a Pin Oak Tree.

The first guide was based on my first fragrance book titled A Reference Book on Fragrance Ingredients. At thirteen pages in length it offered a unique collection of rose materials. While assembling my rose composition book I realized my second material book titled The Art of Fragrance Ingredients offered an even more detailed list of aromatic rose based materials. Whether any of these fine fragrance materials can be incorporated into a particular composition is part of the uniqueness of each finished fragrance blend.

Keep in mind that the Perfumer Francois Coty created the Chypre fragrance back in 1918. This single fragrance gave rise to a complete fragrance family. Overall I would have to say that this is my next favorite group of fragrances after the rose. Unfortunately the folks at the International Fragrance Association including Givaudan have wiped this family out. One can not incorporate patchouli, coumarin, oakmoss, treemoss, many citrus products into this group of fragrances. Instead synthetic materials are utilized. None of these synthetically created naturals possess the richness or depth of an essential oil. Natural materials are often listed in the advertisement of many new fine fragrances, however, I doubt whether they are in a composition outside a trace amount.

Enjoy my unique work sheets and compositions. Whether any formula would work is what experimentation is all about. Again, I have shown my creative abilities. On the entire www one will rarely find a compositional book of any sort. As yourself a single question why? Each fragrance houses possesses hundreds of thousands of formula's. Givaudan until several years ago would show demo formulas. Most of these had serious problems. A decision was made to withdraw them. Why I don't know. Perhaps the fragrance industry does not wish to teach the fine art of fragrance making. Part of the secrecy of the art and business.

Rose Fragrance Chemicals

Adoxal	Sweet floral waxy rosy referred to as ozone like.
Alcohol C - 8	Powerful fresh, orange rose like waxy and sweet odor.
Alcohol C - 9	Powerful oily floral fresh petal like, dilution - rosy.
Alcohol C - 11 Lenic	Fresh rather fatty odor, citrusy waxy rosy petal like note.
Aldehyde C - 11 Lenic	Powerful waxy rosy citrusy odor.
Alpha Damascone	Intensely fruity reminiscent of plums and roses.
Benzophenone	Powdery geranium rose like.
Beta Damascone	Fruity apple rose like odor.
Bois De Rose Essence	Slightly rose like with a sweet undertone.
Bois De Rose Oil	Floral odor reminiscent of rose orange mignoette.
Bois De Rose Syn AB2034	Excellent substitute for bois de rose oil.
Bois De Rose Terpeneless Oil	Floral and reminiscent of rose orange and mignonette.
Citronellol BRI	Fresh, clean floral rosy odor.
Citronellol Oil Coeur	Fresh, rosy, floral rosy.
Citronellol Oil Extra	Purer grade, fresher rosy.
Citronellol 700	Clean fresh rose, citronellol 70%, Geraniol 7%, Nerol 18%, D M Octanol 5%.
Citronellol 700 98TA	Clean, fresh, rose.

Citronellol 750	Clean fresh rose odor, fraction of citronellol 73%.
Citronellol 80 Intermediate	Clean fresh rose odor, fraction of citronellol 83.5%.
Citronellol 850	Clean fresh rose odor, fraction of citronellol 86%.
Citronellol 850	Clean fresh rose, citronellol 86%, geraniol & nerol 12%.
Citronellol 950	Clean rose like, citronellol 95%, geraniol and nerol 4 %.
Citronellol Last Fraction	Rosy, not as sweet as a typical fresh floral rose.
Citronellyl Acetate	Fresh, rosy, fruity odor reminiscent of geranium oil.
Citronellyl Acetate A	Sweet fruity geranium rose citronellyl acetate 85%, neryl acetate 5%.
Citronellyl Acetate BRI	Fresh, rosy, fruity odor
Citronellyl Acetate Pure	Sweet, fruity rose like, citronellyl acetate 95%, neryl acetate 5%.
Citronellyl Anthranilate	Rosy, fruity odor, extremely long lasting.
Citronellyl Iso Butyrate	Fresh almost citrusy rosy, intensely fruity and sweet odor.
Citronellyl N Butyrate	Intensely fruity, sweet and somewhat rosy leafy, petal like.
Citronellyl Formate	Pw leafy green fruity rosy fresh and light reminiscent of geranium rose.
Citronellyl Formate Natural	Sweet citrus floral honey.
Citronellyl Lactone D	Tenacious, spicy, rose absolute character.
Citronellyl Methyl Acetal	A little known citrus note very effective natural note to lemon.
Citronellyl Nitrile	A green rose like scent almost reminiscent of citralva.
Citronellyl Phenyl Acetate	Sweet herbaceous rosy, heavy and reminiscent of rose petals.
Citronellyl Propionate	Fresh fruity, sweet rosy odor more berry fruity odor.
Citronellyl Tiglate	Leafy, rosy geranium note useful in geranium, rose petal bases.
Citronellyl Valerate	Rosy, herbaceous honey like aroma.

Damas Rose FM1248	Is very damascone rose directed.
Damascenia	Rich sweet deep floral rose.
Damascenia Rosa Abs.	Rich warm spicy floral and very deep rose odor, honey tones.
Damascenia Rosa Concrete	Extremely rich deep and sweet floral truly reminiscent pink rose.
Damascenia 185 SA	Very powerful warm fresh top note of rose otto.
Damascenone	A powerful floral fruity note, very natural rose plum like.
Damascone Beta	Powerful, fruity floral note reminiscent of blackcurrant, plum, rose, dil.
Delta Damascone	A hybrid floral rose compound.
Di Butyl Sulfide	Green, violet leaf, rose geranium character.
Di Hydro Carvyl Acetate	Floral with rose, and cuminsed background, useful in floral accords.
Di Methyl Octanol	Waxy dry rosy odor.
Di Phenyl Oxide	Harsh floral green, metallic geranium rose type.
Dorina S A	Floral rose specialty base extremely fresh and floral.
Ethyl Ortho Methoxy Benzoate	Ylang tuberose, floral complex with raspberry and phenolic nuance.
Farnesyl Acetate	Faint, green floral rosy odor use in rose apple and herbal accords.
Florane	Powerful, green crushed petals rose like.
Florex	A deep not sweet floral rose fragrance.
Geraniofix AB751	Sweet green geranium rose, best used in 10% dilution.
Geraniol	Mild, and sweet floral rose.
Geraniol Coeur	Floral, rose oily and green.
Geraniol Extra	Sweet floral rose coeur grade.
Geraniol For Soap AB2015	Economical sweet rose base in lieu of geraniol last several days.

Geraniol 5020	Blend of geraniol 52%, nerol 25%, citronellol 20%.
Geraniol 60	Sweet floral rose.
Geraniol 600	Fresh rose petal, geraniol 60%, nerol 25%.
Geraniol 7030	Sweet fresh rose, geraniol 71%, nerol 19%.
Geraniol 8020	Sweet fresh rose with a citrus note, geraniol 81%, nerol 18%.
Geraniol 90	Mild and sweet floral rose.
Geraniol 980	Dry, rose petal, geraniol 97%.
Geraniol NC	Floral, spicy note reminiscent of rose & palmarosa with carnation tone.
Geraniol N Supra	Typical rosy mild, reminiscent of palmarosa oil
Geraniol RG	Rose alcohols mix with citrus, verbana notes of nerol, dewy.
Geraniol WT	Floral rose note with fresh verbena nuances.
Geraniol X Palmarosa Oil	Sweet and floral rose like.
Geranium Absolute	Intense and powerful somewhat leafy earthy but soft pleasant.
Geranium Algerian	Lighter more rosy leafy.
Geranium Augaflor 9	A powerful rose like odour of Bourbon with a high degree of tenacity.
Geranium Bourbon	Green leafy rosy strong.
Geranium Bourbon Oliffac	An economical simulation of the natural oil for fine fragrances.
Geranium Bourbon Super	A low priced approach to geranium oil.
Geranium Chinese	Natural source is China with a fine herbaceous rose like fragrance.
Geranium Concrete	A delightful earthy herbaceous somewhat rosy foilage green like odor.
Geranium Egyptian	Floral geranium rose blended from different batches.
Geranium Moroccan	Sweet and powerful, rosy leafy slightly herbaceous odor.

Geranium Oil	Has a full leaf like rose odor.
Geranium Oil Syn ABQ 5629	Excellent substitute, interesting fruity and rosy nuances.
Geranium 222	Powerful green, leafy rosy with a fruity minty undertone, rich.
Geranodyle	Is a complex mixture with a fresh geranium odour.
Geranyl Acetate	Sweet fruity floral rosy.
Geranyl Acetate Extra	The finest sweet fruity floral rosy material available at low cost.
Geranyl Acetate Pure	Sweet, fruity and rose, geranyl acetate 98%.
Geranyl Acetone	Fresh floral light, but rather penetrating sweet rosy light green.
Geranyl Anthranilate	Heavy sweet floral rose.
Geranyl Benzoate	Faint rosy, very tenacious mildly floral.
Geranyl N Butyrate	Sweet rather heavy fruity rosy odor.
Geranyl Caproate	Fruity geranium rose like.
Geranyl Formate	Fresh somewhat dry green leafy rosy odor.
Geranyl Iso Butyrate	Sweeter than n butyrate.
Geranyl Phenyl Acetate	Soft floral honey rose like.
Geranyl Propionate	Sweet fruity rose warm.
Geranyl Tiglate	Quite pleasant sweet herbaceous geranium like fragrance.
Iso Amyl Geranate	Rosy, lemon honey character.
Iso Butyl Phenyl Acetate	Powerful leafy rosy musky fragrance.
Iso Damascone	A nice sweet slightly fruity green rose complex.
Iso Rose	An isomeric rose floral compound.
Lorena	Has a fresh odor of rose that recalls tang of the sea.

Meranol	Dry rose petal.
Methyl Nonyl Ketone	Fruity rosy orange like.
Methyl Tuberate	Floral most likely tuberose, rose like material not sweet.
Neo Rose Otto	A very high quality rose otto replacement at a lower cost.
Nerol	Sweet rosy refreshing wet seashore like.
Nerol A	Sweet rosy refreshing.
Nerol BG	A good general purpose rose verbena quality with a warm spicy.
Nerol Coeur	Moderately priced lemon verbena note dominating the rosy.
Nerol 800	Sweet fresh citrusy rose.
Nerol 850	Sweet citrusy, rose and fresh.
Nerol G	A powerful refreshing, clean lemon rose odor.
Nerol 900	Sweet floral rose fresh citrus like.
Nerol O M	Earthy, musty, palmarosa notes covering the verbena character.
Nerol Petals	Sweet rosy leafy refreshing.
Nerol Regular	A green note blends with the rose verbena tones in this grade.
Nerol Special	A fresh sea shore like floral rose.
Neryl Acetate	Very sweet fruity, floral odor of raspberry rose.
Neryl Butyrate	Green waxy oily and fatty.
Neryl Formate	Rosy, herbaceous green character.
Neryl Geranyl Acetate	Citrus sweet floral.
Neryl Iso Butyrate	Rosy, berry character.
Neryl Iso Valerate	Rich, clary sage of bergamot odor in oriental, oakmoss.

Neryl Propionate	Fruity, jam like odor used in citrus and floral fragrances.
Octanol 2	A floral rosy fresh odor.
Octanol Nitrile 10 B - 2216	A rosy floral odor.
Palmarosa Oil	Sweet floral rosy odor.
Palmarosa Oil Brazil	Palmarosa has a sweet, floral, rosy scent.
Palmarosa Oil Guatemala	A pale yellow or olive colored liquid with a sweet floral rosy odor.
Palmarosa India	Palmarosa oil has a sweet floral with a hint of rose.
Patinol AB286	Is more geranium rosy in character then geranofix.
Peomosa	Floral, rose mimosa like with a special light dry out.
Peonile	With its geranium-rosy character provides interesting floral effects.
Phenirat	Sweet, fruity, floral like rose somewhat honey.
Phenoxanal	Fresh floral rose.
Phenoxy Ethanol	Mild rosy, but also metallic.
Phenoxy Ethyl Alcohol	Mild honey rose odor.
Phenoxy Ethyl Iso Butyrate	Sweet fruity rosy floral.
Phenyl Ethyl Acetal	Warm, green leafy also rosy balsamic odor.
Phenyl Ethyl Acetate	Very sweet, rosy fruity honey like odor.
Phenyl Ethyl Alcohol	Mild and warm rose honey like odor.
Phenyl Ethyl Alcohol Extra	Fine, smooth, more powerful quality lasts a few days.
Phenyl Ethyl Benzoate	Very faint floral balsamic odor reminiscent of dry rose petals.
Phenyl Ethyl Cinnimate	Very faint and sweet pleasant balsamic odor.
Phenyl Ethyl Formate	Powerful green herbaceous rosy odor.

Phenyl Ethyl Iso Butyrate	Fresh fruity tea rose type.
Phenyl Ethyl Phenyl Acetate	Heavy and very sweet floral balsamic odor, musky honey like.
Phenyl Ethyl Pivalate	Floral possibly faintly rosy practically no odor.
Phenyl Ethyl Propionate	Very warm herbaceous rosy deep fruity.
Pivane 22	A sweet rosy floral fragrance.
Pivarose	Pleasant, tea rose.
Polarose	Powerful fatty oily waxy rosy odor.
Racina	A dry floral rose complex.
Rhodinol Coeur	Geranium rose.
Rhodinol X Citronella	Naturally sweet rosy floral.
Rhodinol X Geranium Oil	Floral, rose sweet waxy and powdery.
Rhodinyl Acetate	Sweet, light refreshing rose muguet, green leafy notes.
Rhodinyl N Butyrate	Intensely sweet mellow fruity deep rosy.
Rhodinyl Formate	Fresh leafy green delicate rosy.
Rhodinyl Phenyl Acetate	Sweet, very deep soft honey like rose.
Rhodinyl Propionate	Rich and sweet fruity floral rose geranium type.
Rhodinyl Salicylate	Very weak sweet rosy powdery balsamic odor.
Rhodinyl Valerate	Heavy fruity, slight earthy green, but also sweet odor.
Rosacene	A nice light delicate floral rose compound not overly sweet.
Rosalva	Powerful fatty oily, waxy rose odor.

Chypre - Sweet

Chypre Sweet

A Chypre Sweet fragrance is based on the same materials, but has a sweet direction which can be based on Benzyl Salicylate and Hexyl Cinnamic Aldehyde. There are a wide range of other possibilities depending in part on the selection of materials. In the end, however, any fragrance classified as sweet can be fresh, floral, light, aldehydic, animalic, etc. Sweet can be in reality any thing.

Chypre Sweet # 1a

Fragrance Ingredient		Fragrance Ingredient	
10	Coumarin Substitute 5091 P	11	Ylang Ylang Synthetic

Chypre - Citrus

Each perfume in this family is primarily composed of citrus scents such as bergamot, lemon, orange, tangerine and grapefruit, to which other orange-tree elements (orange blossoms, petit grain or neroli oil) have been added. Floral or even chypre accords are sometimes present as well. These perfumes are characterized by their freshness and lightness including the first “Eaux de Cologne”.

Classic Chypre formulas are based on four single notes: Bergamot (other citrus oils may be substituted, but Bergamot is the Classic;) Labdanum, Oakmoss, and (usually!) Patchouli. These form the basic structure... with infinite possibilities and variations.

Fresh and juicy fruit such as lime, orange and bergamot create a very refreshing citrus family. It gives you an incredible boost of energy and stimulate you to action. These fragrances used to be created for men only, but currently they are recognised as a universal group. Depending on the composition the citrus family is divided into subgroups of lemon, mandarin, orange and bergamot.

This is another popular category of men's colognes and contains lots of fresh citrus notes. A famous example is Tommy by Tommy Hilfiger. Subcategories are spicy citrus, aromatic citrus, floral chypre citrus, woody citrus and floral woody citrus.

Citrus Most eau de Colognes fall into this fresh category, with their zesty, energetic notes of lemons, bergamot, oranges, grapefruit and mandarin. (These are also known as ‘hesperidic’ notes), But by adding spices, woods and floral notes, these light, uplifting scents take citrus to the next level, becoming more sophisticated and long-lasting on the skin. Some examples? Clarins Eau Dynamisante, Acqua di Parma Colonia, or Annick Goutal's Eau d'Hadrien.

Citrus Fragrance Chemicals

Abbarome 011	Citrus, herbal, fresh.
Acerola	Any of various species of the genus Malpighia. The fruit has a citrusy like fragrance sweet and fresh.
Acetate C - 10	Sweet fatty fruity odor of pineapple orange.
Alcohol C - 8	Powerful fresh, orange rose like waxy & sweet odor.
Alcohol C - 11 Lenic	Fresh rather fatty odor, citrusy waxy rosy, petal like note.
Alcohol C - 11 Saturated	Oily fruity floral citrusy odor slight fatty overall fresh.
Aldehyde C - 10	Powerful sweet waxy orange peel like odor.
Aldehyde C - 11 Lenic	Powerful waxy rosy citrusy odor.
Aldehyde C - 12 MOA	An aldehyde with a citrus tangerine note.
Aldehyde Mandarin 10 %	A mandarin orange fresh and citrusy.
Aldenal C - 9	Blend of saturated unsaturated aldehydes powerful fresh and waxy citrus.
Aldenal C - 10	Blend of powerful, fresh citrus odor.
Alpha Terpinene	Refreshing lemony citrusy odor.
Auralva	Neroli orange, muguet, grape odored schiff's base.
Bergamal	Refreshing, aldehydic lemon, petitgrain note.
Bergamot Augaflor 4	Characteristically bergamot, this compounded specialty has a fruity, woody, slightly sweet fragrance. Can be used up to 5 %

in many medias.

Bergamot Eco Essence	A sweet fruity odor typical of the bergamot orange.
Bergamot FCC	Rich sweet fruity.
Bergamot Givco 104	This reconstitution is bergapten-free and has no phototoxic potential. This is a bergamot that replaces the essential oil with superior stability and performance in functional products.
Bergamot LCNP	Alternative to bergamot, low cost non phototoxic.
Bergamot NPT	Closely resembles odor of bergamot oil, non phototoxic.
Bergamot Oil Italian	A fresh odor of the delightful bergamot natural source is Italy.
Bergamot Oil Ivory Coast	Sweet fruity bergamot odor that smells right off the west coast of Africa.
Bergamot Oil Non Sensitizing	Characteristic of the natural oil with natural sensitizing components removed in our special distillation process.
Bergamot Oil Rectified	A natural bergamot oil fragrance rectified to enhance its effect in many different fragrance formulations.
Bergamot Oil Reconst.	Juicy, natural reconstitution.
Bergamot Super Oliffac	Low cost simulation of the bergamot note for general purposes.
Bergamot Terpeneless Extra	Extremely smooth dry and clean of sweet bergamot.
Bergamote 17.530 SA	Rich, sweet fruity initial odor with balsamic body and dry out.
Bergamyl Acetate	A sweet bergamot orange fragrance.
Beta Pinene Coeur	Pine, citrus, lime.
Bitter Orange NPT	Odor similar to the West Indies bitter orange oil free of phototoxicity.
Bitter Orange Oil Cold Pressed	A citrusy orange type odor.
Bitter Orange Oil 5 Fold	Slightly bitter but yet fruity citrusy orange odor.

Bitter Orange Oliffac 301	Economical replacement for West Indies bitter orange oil dry citrus.
Cedrat Peel Oil	A citrus fruit that resembles the lemon in appearance.
Cedrat Petitgrain Oil	Oil obtained from the leaves and twigs of the sour orange.
Citracetal	Citrus like odor, close to citral in it's strength.
Citral	Powerful lemony fragrance.
Citral Di Ethyl Acetal	Fine, fresh, citrusy stable in alkalis, fresher then nitrile.
Citral Di Methyl Acetal	Has a milder but much more natural lemon odor than citral.
Citral Di Methyl Acetal Pure	Very pleasant, floral lemon note.
Citral Extra	Finest quality of citral.
Citral 700	Strong lemon odor suitable for chemical intermediate use.
Citral 750	Grade suitable for chemical intermediate use.
Citral 850	Clean, fresh citrus lemon odor.
Citral 900	Intermediate grade, citrus lemon odor.
Citral Residues	A verbana grassy sweet type odor very diffusive.
Citral Terpenes	Harsh citral lemon odor.
Citral X Lemon	Fresh, juicy lemon peel, with a sweet tangy nuance.
Citral X Litsea	Powerful, fresh top note, lemon.
Citrallex	Fresh lemon, clean citrus odor resembling citral.
Citralva	Powerful oily green lemony fresh odor.
Citralva Plus	Intense lemon character, non discoloring.
Citrathal	Distinctive fresh lemon lime lasts one day.
Citrathanil ABQ7023	Is more green floral and tenacious lemon then agrudor.

Citric Acid Amhydrus	A crystalline acid with a pleasant acid taste.
Citrilys Givco 169	A pleasant citrus accord which evokes freshly squeezed tangerine peel blended with floral marine notes, giving it an unusual sparkling zest. The fruity back ground enhances the composition's natural aspect. Extremely diffusive and long-lasting, it performs well in most functional product bases. Designed for use as a top and middle note, it gives freshness and volume to all citrus, floral and green accords.
Citrofurane AB5531	Is a more lavandaceous citrus complex containing rhubafuran.
Citronal	Fruity.
Citron Leaf Rectified Oil	Tree native to asia having lemon like fruit with aromatic rind.
Citronalva	Citrus, lemon, aldehydic, metallic.
Citronama	Intense orange, ginger, palmarosa with ozone muguet aspects.
Citronellal	Powerful fresh green citrusy, slight woody odor.
Citropal	Moderate citrus type odor.
Citroton B	Clean fresh fruit odor generally citrus, for all citrus types.
Citrus Base	Strong odor to lemon peels similar to melissa oil.
Citrus Terpenes	Based on d-Limonene this fresh citrusy fragrance is a perfumers delight helping to create fresh fruit blends and bases.
Citryl Acetate	Includes features of bergamot oil with delicate lemon top note.
Citryl Nitrile	A very strong lemon form of citral not pleasant lemon odor.
Citryl Nitrile B - 1313	Dry hay like, fresh lemon, citral note.
Clonal	Dry orange peel note for citrus, bergamot cologne types.
Decanol Natural	A diffusive natural orange, but not of great tenacity.
Decanal - 4 - Trans	Is an exceptionally strong and diffusive chemical. Used mainly as a top note ingredient, it produces a fresh, natural, citrus-like effect, imparting tremendous lift.

Di Hydro Linalool	Fresh floral citrusy.
Di Hydro Myrcenol	Powerful fresh lime like.
Di Hydro Myrcenyl Acetate	Sparkling, fresh lime, lavender lasts one hour.
Di Hydro Terpineol	Floral, citrus, lime pine.
Di Hydro Terpinyl Acetate	Fresh piney citrusy.
D ' Limonene	Citrus orange.
Di Methyl Anthranilate	Heavy orange blossom mandarin peel odor.
Di Methyl Octenone	Can be used to great advantage in citrus accords where it underlines the natural bitterness of the fruit. Its combination with fresh notes is much appreciated for the diffusion that it brings to compositions. Its utilization with certain modern accords can give original and natural grapefruit character.
Dimetol	Powerful lime cologne like odor similar to di hydro myrcenol.
Di Myrcetol	Fresh citrus lime like odor.
Dipentene 122	Fresh and sweet citrusy lemon.
Elemi Essence	Fresh lemon like.
Elemi Oil	Fresh spicy lemon.
Elemi Resinoid	Fresh terpeney peppery lemon.
Ethyl Linalyl Acetate	Is softer, more floral, more bergamot and less lavender than Linalyl Acetate. It has an elegant, refreshing effect in floral bouquets.
Feuilles D ' Oranger Abs.	Reconstituted feuilles d ' oranger.
Feuilles E ' Oranger Abs. Eau	Floral odor of feuilles d ' oranger.
Gamma Terpenes	Citrus odor.
Geraldehyde	Intense aldehydic note with marine, floral and citrus moieties.
Geranonitrile	Fruity green, lemon.

Gloria ABQ7022	Is a more citrusy fantasy base with a musky dry down.
Grapefruit Oil 5 Fold	Citrusy grapefruit slightly sweeter then grapefruit oil of Florida.
Grapefruit Oil of Florida	Tangy, citrusy grapefruit nice and fresh.
Grapefruit Oil Nardenised	A tingling, fresh deterpenised oil lasts several weeks.
Grapefruit Oil Terpenes	Fresh citrusy rather sweet odor.
Grapefruit Base # 15794 B	A typical odor of a very ripe grapefruit.
Grapefruit Body Fleurom	Extremely powerful green grapefruit odor.
Grapefruitone	Is a sweet fruity specialty with a grapefruit rind character.
Helioforte	Schiff base, sweet fruity orange, methyl anthranilate.
Helimet	Schiff base, sweet fruity orange, methyl anthranilate.
2, 4 Hexadien 1 AL	Fresh, spicy green, floral citrusy odor used as top note.
Hexadienal 2 Trans 4 Trans	Green fruity aldehydic citrus use in melon, kiwi, tropical fruit.
Hypo-Lem	Citrus, aldehydic lemon.
Iso Bornyl Cyclo Citral	A citrus lemon fruit type odor.
Jonquille Jacinthe Abs.	A moderate orange that is yellower and stronger then honey dew.
Khadija	Musk, ambre, citrus oriental bouquet.
Leila	Lilacs in full bloom spiced with a hint of bergamot. A romantic spring bouquet conjuring visions of victorian elegance and the Belle Epoque.
Lemarome N	Extensively used for its lemon effect in cologne blends. Is also extremely useful in certain floral compositions where it imparts a unique natural freshness.
Lemon Basil Oil	The citral content of 41% gives this oil a verbena like quality while the basil side is not very evident.

Lemon Essence HC Free	A natural oil which has had terpene, and sequiterpenes removed.
Lemon Givco 112	This base is an imitation of natural lemon odour that in addition has excellent stability and substantivity in all kinds of finished products. This Givco was especially developed for difficult bases like H.D.L.D. and H.D.P.D. Has strong diffusion & good impact on wet laundry.
Lemongrass Oil Chinese	Strong grassy lemon type.
Lemongrass Oil Cochin	Otherwise known as East Indian lemongrass oil. The finest essential oils odor varies depending on content of citral and other components.
Lemongrass Oil Guatemala	A very strong grassy lemon type.
Lemongrass Oil Indian	Citral content lower then above, but at same time similar.
Lemongrass Oil Nardenised	Lemon fresh, deterpenised oil lasts a few days.
Lemongrass Oil Rectified	Appears more lemony and sweet less verbena.
Lemongrass Oil Terpeneless	A verbena green grassy odor free from harsh terpenes.
Lemonile	Is used in lemon, verbena and lime compositions where it imparts freshness and diffusion. This nitrile is an extremely powerful chemical and has excellent stability in alkaline media.
Lemon Isolate	Is a natural distilled product with a fresh juicy tart lemon.
Lemon Juicy	Fresh juicy lemon with a sweet citral terpeney nuance.
Lemon Oil	Typical lemon and refreshing.
Lemon Oil 5 Fold	Purer sweeter lemon.
Lemon Oil Italian	A lemon which is sweet and juicy from Italy.
Lemon Oil of California	Sweet juicy lemon.
Lemon Oil Reconstructed	A reconstituted fragrance closely resembling the essential oil.
Lemon Oil Spanish	Sweet, fruity odor of lemon, source Spain.
Lemon Oil Synthetic	Low cost reconstitution lasts one day.

Lemon Oil Washed	A slightly lighter and sweeter juicy lemon.
Lemon Petitgrain Oil	Strong fresh odor with a woody dry out.
Lemonrone Lemonrone	Powerful lemon fragrance very chemical like.
Lemon Terpenes	Mildly lemon.
Lemorale	Brisk fresh top note useful for lemon limes bergamot herbal.
Lemon 360	A slightly sweet fruity lemon odor.
Lemsyn	Synthetic citral.
Lime AB402	Sweet yet sharp lasts a few weeks.
Lime Blossom	The oil made from the flowers has a fresh green muguet lily like fragrance. Can be used as a floralizer to create interesting effects in many blends.
Lime Exp. H C Free	A natural oil which has terpene and sequesterpene removed.
Lime Expressed NPT	Similar odor to the natural expressed oil free of phototoxic.
Lime Oil Distilled	A tart sour ball candy like lime odor, very sweet.
Lime Oil Distilled 4 Fold W.I.	A tart lime odor vacuum distilled for terpene removal.
Lime Oil # 410	Oily sweet fruity lime.
Lime Oil 4 Fold	Sweeter juicer resulting from vacuum distillation process.
Lime Oil Expressed	A lime fragrance fresh from the peel very reminiscent.
Lime Oil Expressed 4 Fold W.I.	A fresh slightly tart peel like in sweetness lime odor.
Lime Oil Nardenised	Sweet, pure deterpinseed oil with petitgran character on dry out.
Lime Oil Reconstructed	A reconstituted oil closely resembling the odor of a lime.
Lime Oil Roses Type	Sweet, juicy, candy lime like with a fresh peel character.
Lime Terpenes	Lime.

Lime Oil Terpeneless	Lime oil with the terpenes removed.
Lime Oil Sequiterpeneless	Lime oil terpene free.
Lime Oxide	Adds freshness and intensity to perfumes designed for functional products It is also a powerful citrus booster with excellent stability in many applications applications, including bleach.
Limetol	Is used where a lemon-woody note is desired. It also offers pine needle and lime nuances.
Limettal ABQ5701	Tingling, fresh floral aldehydic, long lasting.
Limettene	Very strong pleasant fresh citrus note.
Limonene - D	Fresh and light sweet citrussy odor resembles orange peel.
Limonene 130	Fresh hydrocarbon type lemon odor.
Limonene Tech.	Fresh clean citrus odor of the orange.
Linaloe Wood Essence	Floral rose citrus, soft and sweet.
Linalyl Acetate	Sweet floral fruity odor, bergamot, pear.
Linalyl Acetate Synthetic	Widely used for its typical bergamot freshness and lavender characteristic.
Linalyl Benzoate	Balsamic floral bergamot fruity odor.
Linalyl Butyrate	Heavy fruity sweet bergamot like.
Linalyl Cinnimate	Mild and balsamic sweet.
Linalyl Formate	Fresh citrusy green bergamot like.
Linalyl Iso Butyrate	More floral less fruity than n butyrate.
Linalyl Propionate	Fruity floral fresh very sweet bergamot.
Litsea Cubeba Rectified Oil	Intense citrus fruity lemon like.
Litsea Cubeba Terpenes	Now as sweet as regular litsea cubeba.

Lolitol	Fresh floral muguet with citrus nuances.
Mandarin AB646	The juicy zest base is built around citrathal.
Mandarin Oliffac	Sweet characteristic citrus mandarin note.
Mandarinal	A powerful fresh citrus aldehydic mandarin orange.
Mandarinal 32.048 SA	Powerful, fresh citrus aldehydic note of mandarin.
Mandarin Ald. 10 Citrate	An aldehydic mandarin orange.
Mandarin Italian Select	Intensely sweet not very fresh orange odor.
Melissa Oil	Has a sweet fresh lemon like scent.
Melissa Resinoid	A herb obtained by distilling lemon oil over the herb.
Methanyl Acetate	Piney citrusy type odor.
Methyl Octyl Ketone	Powerful citrusy orange.
Mugol Extra	Soft woody, citrus lime note with floral aspects.
Myrcene	Refreshing almost citrussy.
Myrcenol 50	An excellent cologne note with a citrus lime quality.
Myrcenol Super	Fresh, citrus.
Myrcenyl Acetate	Sweet citrus.
Nardozeste ABQ5031	Powerful, dry lemon peel note.
Neoproxen	Herbal, leafy, green citrus.
Neral Crude 88 %	Sweet floral citral lemony type fragrance.
Nerger Formate	Tangy, sweet citrusy, lime, lemon, bergamot odor.
Nerol Coeur	Moderately priced lemon verbena note dominating the rosy.
Nerol G	A powerful refreshing, clean lemon rose odor.

Neryl Geranyl Acetate	Citrus sweet floral.
Nonanal Di Methyl Acetal	Refreshing, citrus, floral green odor.
Nootkatone Purified	Citrus grapefruit odor.
Octacetal	Fresh, clean citrus character reminiscent of orange.
Orafleur	Powerful neroli, orange flower note, fresh and diffusive.
Orange Aldehyde	Powerful, dilution - sweet orange like, fatty odor.
Orange Carbinyl	Fruity orange.
Orange Carbonyls	Natural orange juice odor.
Orange Des Indes 68A817	A nice clean fresh orange odor with a discreet spicy note.
Orange Essence Oil	A natural oil free from terpene and sequesterpenes.
Orange Flavor Zing.	Green, fresh juicy sweet orange for juicy top notes in citrus blends.
Orange Flower Absolute	Has a very intensely floral, heavy and rich, warm, but also delicate and fresh, long lasting odor, closely resembling the odor of fresh bitter orange blossoms. Although this absolute certainly has notes in common with jasmin absolute, it has a much more versatile application as a floral fond when used at a comparatively low concentration. It shows a pleasant, but peculiar and characteristic, sweet herbaceous backnote, not unlike the one found in jasmin.
Orange Flower Bitter	Very intensely floral, heavy and rich, warm, but also delicate and fresh, long lasting odor, closely resembling the odor of fresh bitter orange blossoms.
Orange Flower Concrete	A dark, brownish or orange brown paste or soft mass. Its odor is extremely strong, floral, deep sweet, with a peculiar woody breadcrust like backnote and great tenacity in floral notes. In high dilution, it is strikingly reminiscent of the odor of fresh orange blossoms.
Orange Flower Ether	Citrus grapefruit note also reminiscent of bergamot orange.
Orange Guinea Oil	Sweet fruity, reminiscent of the orange peel.
Orange Isolate	Has odor of natural peel, juicy with a rich aldehydic tone.

O.J. CarbinyI STD	Very juicy with an orange top note.
O.J. CarbinyI VCV	Orange, source is most likely valencia oranges.
Orange Juice Extract Natural 4/10	Very characteristic of freshly squeezed oranges without the pulp or slight bitter taste that naturally occurs in the fresh fruit. Overall a delightful fragrance suitable for many different creative blends.
Orange Oil Bitter	Bright bitter odor of oranges.
Orange Oil California	Sweet orange peel like odor.
Orange Oil Distilled	Orange peel like slightly less sweet and juicy.
Orange Oil 5 Fold	A very weak orange peel like odor.
Orange Oil Fla. Mid Season	Fruity orange.
Orange Oil Guinea C.P.	Orange, source Guinea, a country located on the west coast of Africa.
Orange Oil Nardenised	A beautiful sweet, deterpenised oil.
Orange Residue	Orange peel type odor, however not sweet like california oranges.
Orange Oil Sweet	Sweet fruity odor of oranges.
Orange Terpenes	Sweet fruity orange.
Orange Terpeneless	A nice light rich very smooth orange odor.
Orange Terpeneless	Sweet fruity orange peel like, very nice.
Orange Oil Terpeneless Special A	A sweet fruity very smooth orange soda like odor.
Orange Oil Terpeneless Extra	A delicately sweet orange peel odor reminiscent of orange preserves.
Orange Terpeneless X 5 Fold	A very weak pure orange odor.
Orange Oil Valencia	Orange, source valencia type florida oranges.
Orange Wax	A real orange peel like odor, neither sweet or juicy.
Oranger Crystals	Sweet and very tenacious orange blossom.

Oranger Guiena Essence	Sweet fruity and characteristic of orange peel.
Oranger Liquid	Sweet floral rather harsh orange blossom.
Ozonil	Very strong fruity reminiscent of nuances in orange and mandarin oil.
Pamplefleur	Citrus, grapefruit, floral vetivert.
Petitgrain Abs.	The best of petitgrain oil free of terpenic harsh by notes.
Petitgrain Bigarade Abs.	A beautiful product where the sulphur notes of petitgrain are muted. Has a green tea, citrus like woody note representing the essential oil to its finest.
Petitgrain Bigarade Oil	Pleasant fresh floral sweet odor.
Petitgrain Citronnier Oil	Distinct and pleasant, a fresh lemony floral woody odor.
Petitgrain Oil Moroc Sur Fleurs	Fresh floral citrus scent and a woody-herbaceous undertone.
Petitgrain Oil Mandarin	A fresh lemony floral woody odor extremely tenacious.
Petitgrain Oil Paraguay	Strong, bitter sweet, woody floral odor. The topnote is somewhat harsh, but it quickly gives way to a heavy and sweet bodynote of typical petitgrain character, bitter floral, with a sweet and slightly woody backnote. The dryout, which comes quickly since the odor of this oil is not very tenacious, is sweet and slightly woody floral. According to the age of the oil, there are wide variations in the topnote of its odor. Most often, the topnote smells like the topnote of crude bois de rose oil, almost nutmeg like and warm spicy.
Petitgrain Oil S A	A fresh lemony floral woody odor.
Petitgrain Oil Terpeneless	Diffusive less bitter sweet floral woody odor.
Psuedo Linalyl Acetate	Citrus, bergamot floral lavender.
Rhodinol Augaflor 18	This crisp, citrusy type compound can implant an element of Lemon in a perfume. Gives the finished fragrance a freshness of smell, and touch much sought after.
Schiff Base	Ligantraal, green citrus, orange blossom best in 10 % solution.
Sino Citral	Fresh citral lemony with a floral background.

Sinocitril ABQ4020	Powerful aldehydic floral which has an enhanced tangerine character.
Stymonile ABQ7020	Is a zesty citrusy, radiant, ozone fresh complex.
Tamarine Base 41.310	Very diffusive and natural note of the green mandarine.
Tangelo Oil	The fragrance is a cross between a grapefruit and a tangerine. They have become a popular fruit commercially, since they are larger than tangerines with less seeds. Altogether fresh and citrusy.
Tangerine Essence	Fruity, characteristic sweet tangy tangerine.
Tangerine Oil	Fresh sweet odor reminiscent of valencia oranges.
Tangerine Oil Florida	Fresh sweet odor of valencia oranges.
Tangerine Terpenes	Fresh sweet fruity odor of valencia oranges.
Tangerine Type Oil	Sweet tangy tangerine like reminiscent of the peel.
Tangeris Givco 212	A pleasant citrus accord that evokes freshly squeezed tangerine peel, blended with floral, marine notes that give it an unusual sparkling zest. The fruity back ground enhances the composition's natural aspect. Extremely diffusive and long-lasting, it performs well in most functional product bases. Designed for use as a top and middle note, it gives freshness and volume to all citrus, floral and green accords.
Terpinene Gamma	Terpeney, sweet, citrus with tropical and lime nuances.
Terpinyl Acetate Extra	Sweet slightly herbaceous of the bergamot lavender.
Terpinyl Acetate (CST)	Sweet, herbal, bergamot pure.
Terpinyl Acetate (GUM)	Sweet, herbal, bergamot lavender.
Tetra Hydro Mugol Coeur	Floral, citrus woody.
Tetra Hydro Myrcenol	Citrus, lime, sweet juicy.
Triplal	Powerful citrus green.
Triplal Extra	Green, citrus, herbal, aldehydic.

Unitene D	Piney lemony type odor.
Vandor B	Aldehydic, green, citrus fatty.
Vertocitral	Strong grassy green note, citric, somewhat herbal camphor like.
