

HD Flex™ Fiber Optic Splitter Cassettes

specifications

HD Flex™ Fiber Optic Splitter Cassettes offer a wide array of deployment options to support Passive Optical Networks (PON). Cassette types are available in the very small, high density HD Flex form factor and can be deployed in all HD Flex enclosure and distribution products. Splitters are available in one or two input ports and from two to sixteen output ports that provide uniform splitting of the input(s) power. All LC connectors contain integral shutters to help prevent contamination.

applications

Allows system designers to tailor PON architecture, reach and splitting configuration to application requirements; to minimize waste, optimize cable power budget, speed deployment, and improve flexibility and manageability for lower installation costs.
