MASK DISTRIBUTION

Those in the school bus industry are doing all they can to deliver food to children in need, ensure continuance of education, and prepare for students' return. To help with the fight against Covid-19 pandemic, First Light is donating 90,000 FDA and CE certified sterile disposable masks to schools throughout the USA. We would like to work with NASDPTS and State Directors to get 50,000 of the masks in the hands of those in need.

How: A First Light team member will work with each State Director to determine how to distribute the masks to the schools in need. Each state may deploy their own strategy. It could be based on the State Director's choosing, first come first serve basis, draw, or any other method. First Light will handle contacting all schools to coordinate the shipment.

Quantity: The number of masks allocated to each state will be based on the total number of school buses per state, rounded to the nearest 10, refer to Table 1. The minimum quantity of masks per school is 100. The maximum quantity of masks per school is 500. Refer to Table 2.

Shipping: The masks are a donation. The schools will provide a shipping account for First Light to ship against. The masks will be coming from First Light's facility in Winnipeg, Manitoba, Canada. The estimated shipping cost for 100 and 500 masks is US\$15 and US\$33, respectively. Rates are estimated with DHL.

When: This program will run until July 30, 2020. If masks for each state has not been distributed by this time, the left over quantity will be redistributed to other states. Any masks not consumed after the redistribution by September 30, 2020 by the respective state, First Light will redistribute the excess through other channels.

Next Steps: A First Light team member will contact you to discuss how you would like to proceed with the distribution of the masks. If you have any questions, feel free to contact Sam Borges at 204.794-8448 or samanthaborges@firstlightsafety.com.
