

**A FURNITURE PROTECTION PROGRAM YOU CAN 'BELIEVE IN'**

**Guardian Fabric Protector**

\*Water based fluoropolymer that does not bioaccumulate and is not biopersistent. The active ingredient has a six carbon backbone does not contain PFOA (Perfluorooctanoic acid) PFOS (Perfluorooctanesulfonic acid). The polymer when cured will provide oil and water resistance. The polymer when left on the fabric will also impart soil release properties aiding in cleaning efforts.

\*Safe for all W, SW and S coded fabrics (Always pretest).

\*Formulated with a UV additive which helps to reduce fading to sunlight exposure.

\*Contains an antistatic additive to help reduce dry soiling from dust accumulation.

\*No harmful CFC's or silicones. Compliant with all regulations and will not harm the fabric.

\*Invisible to sight, smell, or touch. Will not affect the fabric upholstery look or feel.

\*Consumer safe. Non-toxic, non-allergenic, and non-carcinogenic.

\*Dries to the touch in 30-60 minutes. Fully cures in 24 hours.

\*Toll-Free customer support service in North America.
