I really like Amazon's choice of cardstock paper as the results are far better than ordinary printer paper. If you're in the throes of planning your child's birthday celebration, you no doubt want to give them the party of their dreams. A lot of pressure is on parents to host bigger and better celebrations, and what better way to set the tone than to create and send out personalized, professional-looking invitations. This resource will help with what information to include in kids birthday invitations, and what to consider when designing and printing. Key ElementsAfter you've chosen a theme, finalized the guest list, and locked in where and when to hold your child's party, it's time to write the invitations. There should be enough information, but not so much that guests overlook some of the key details. Here are the sections you should include: - The child's name should take pride of place along with how old they are going to be. As an example, let the guests know that "Maddy is turning 5" and that they are invited to help celebrate her birthday.

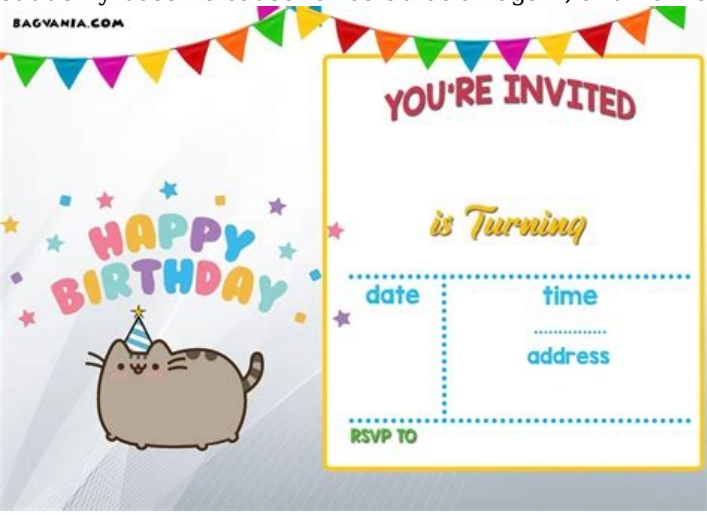

- It's best to include the day of the week and date of the party on the invite. That way, there will be no confusion on the guest's part as to whether their child may need to skip their usual activity that day. - Don't forget to include the start and end times so parents know how long they need to stay or when they are required to pick up their child. - Whether you are holding the celebrations at your house or at another location, make it clear on the invitation by writing out the address in full. You could even include a map or directions if the venue is a little difficult to find. - It can be extremely frustrating when guests fail to let you know whether they're able to attend your party. RSVP means "Please reply," but some guests may overlook this section of the invite. Make it easy on guests and yourself by asking them to respond to a particular person using the provided contact number or email address. - Do guests need to come dressed as their favorite character for your Disney theme party? Will they need to bring their swimsuit or a change of clothes? Let them know well in advance to allow time to prepare and so that nobody is left out of the fun because you didn't give clear instructions. You've added all the necessary information, and now you have the chance to create a custom invitation with a section of special text. You can keep it simple or, if you have a way with words, devise a rhyme or poem. Not sure what to write? Here are some examples to help get your creative juices flowing: I'm turning 7! You're invited to help celebrate my big day. My first birthday will be really fun. Come and join me as I turn one! Our little man is turning 4 and we want to hear your loudest ROAR! Please come dressed as a dinosaur. Would you like more ideas? Head over to Pinterest and browse the Birthday party invitation wording Pin board for inspiration. Design, Printing, & PresentationThe invitation details are key to ensuring your guests arrive at the right place, at the right time, and with the right costume. However, to create a child birthday party invitation that will be the envy of other children and parents alike, here is what you need to consider: - Making use of striking graphics and illustrations will take your invitation to the next level. An Internet search can bring up thousands of royalty-free stock images, and you may even be able to source suitable images for free on sites such as Pixabay. If you want a truly unique design, including a photo of the birthday girl or birthday boy is a cute way to personalize your invitations. - Once you have finalized the invitation text and design, selecting high-quality print finishes is essential to creating a lasting impression on your invitees. Card stock is thicker and more durable than standard printing paper, so it is a great choice for professional-looking birthday invitations. - To give your invitation card a special final touch, opt for envelopes that complement the style of your chosen invitation.

Build the excitement for your little guests by hinting at what's to come. Maybe seal the envelopes using themed stickers, or you could eliminate an envelope altogether and present the invitation in person as a scroll tied with ribbon instead.
