

Creative Color Wheel

Shades and Tints

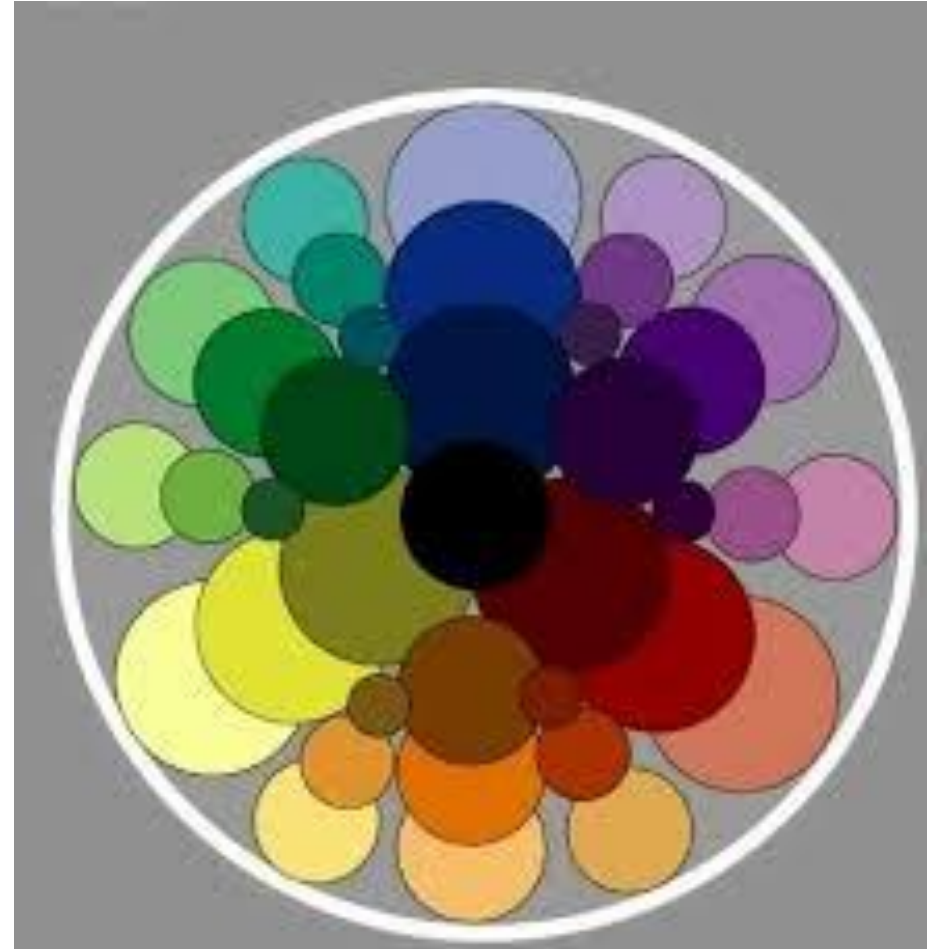

For this assignment, you will create a creative color wheel with the primary, secondary and intermediate (tertiary) colors in correct order using watercolor paints.

You will also use at least one shade (making the color darker using black) and one tint (making the color lighter by adding white or using less paint)

You can create any image you want as long as it has all the colors and the shades and tints of each color. Be as creative as possible!

It doesn't have to be a circle as long as you place them in correct order...

Other ideas, surrealism/fantasy...

You will get a grading sheet for this assignment...

- Do you have all 12 colors?
- Art the colors in correct order?
- Do you have a shade and tint of each color?
- How creative is your color wheel?
