TWO-STEP EQUATIONS WORD PROBLEMS WORKSHEET

Solve Each Word Problem by Writing and Solving an Equation

1. Emma bought 3 notebooks and a \$5 pen. She spent a total of \$20. How much did each notebook cost?

2. Liam is three times as old as his younger brother. If their combined age is 24 years, how old is Liam?

3. A taxi company charges \$4 per ride plus \$2 per mile. If the total fare was \$18, how many miles were traveled?

4. Sophia spent half of her money on a book and then spent \$5 on a snack. If she has \$15 left, how much money did she have originally?
