

Combining Like Terms Worksheet

Name: _____ Date: _____

Instructions: For each expression, follow these steps:

1. Distribute the number outside the parentheses to each term inside the parentheses.
2. Combine like terms (terms with the same variable and exponent) to simplify the expression

$$2(x+3)+4x$$

$$3(y-5)+y$$

$$5(2m-1)+3m$$

$$2(x-4)+3(x+1)$$

$$4(b-3)+2(b+6)$$

$$3(y-2)+4(2y+1)$$
