

COUNTING ATOMS WORKSHEETS

Section 1: Slightly More Complex Molecules

These molecules have more than one type of atom. Count each type.

1) Methane (CH_4)

2) Table Salt (NaCl)

Draw and count atoms in Glucose ($\text{C}_6\text{H}_{12}\text{O}_6$).

For each molecule, write down the number of each type of atom.

1) Water (H_2O)

2) Carbon Dioxide (CO_2)

3) Ammonia (NH_3)
