

Punnett Square Practice Worksheet

Name: _____

Date: _____

1. Let's say that in rabbits, the gene for fur color has two alleles. The dominant allele (B) codes for black fur, while the recessive allele (b) codes for white fur.

What is the probability of producing offspring with white fur from a cross of two black-furred rabbits, one that is homozygous dominant and one that is heterozygous?

	B	B
B		
b		

_____ % black fur

_____ % white fur

Questions:
