

Reading a Tape Measure Worksheet

Name: Name: _____ Date: _____

Above is measure tape with 8 cm highlighted with arrow. In the same way draw a tape below for 5 cm with arrow pointing.

Critical Thinking:

1. Why do you think most tape measures include both inches and fractions (like $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$, and $\frac{1}{16}$)? How does this help in real life?
